## PART I

### BASIC CONCEPTS 1

#### 1

#### **An Overview of Database Management 3**

- 1.1 An Introductory Example 3
- 1.2 What Is a Database System? 5
- 1.3 What Is a Database? 9
- 1.4 Why Database? 13
- 1.5 Data Independence 17
- 1.6 Relational Systems and Others 22
- Exercises 24
- References and Bibliography 26
- Answers to Selected Exercises 28

#### 2

#### **An Architecture for a Database System 31**

- 2.1 Purpose 31
- 2.2 The Three Levels of the Architecture 31
- 2.3 The External Level 34
- 2.4 The Conceptual Level 38

2.5	The Internal Level	39
2.6	Mappings	40
2.7	The Database Administrator	40
2.8	The Database Management System	42
2.9	The Data Communications Manager	45
2.10	Backend vs. Frontends	45
2.11	Utilities	47
2.12	Distributed Processing	48
	Exercises	52
	References and Bibliography	53

## 3

### **The Internal Level 55**

3.1	Introduction	55
3.2	Database Access: An Overview	57
3.3	Page Sets and Files	61
3.4	Indexing	68
3.5	Hashing	77
3.6	Pointer Chains	82
3.7	Compression Techniques	85
3.8	Concluding Remarks	90
	Exercises	90
	References and Bibliography	92
	Answers to Selected Exercises	102

---

## P A R T I I

### **RELATIONAL SYSTEMS 107**

## 4

### **An Overview of DB2 111**

4.1	Background	111
4.2	Relational Databases	112
4.3	The SQL Language	116
4.4	Major System Components	124
	References and Bibliography	131

# 5

## **Data Definition 135**

- 5.1 Introduction 135
- 5.2 Base Tables 135
- 5.3 Indexes 140
- 5.4 Concluding Remarks 141
- Exercises 142
- Answers to Selected Exercises 143

# 6

## **Data Manipulation 145**

- 6.1 Introduction 145
- 6.2 Simple Queries 146
- 6.3 Join Queries 149
- 6.4 Aggregate Functions 153
- 6.5 Advanced Features 156
- 6.6 Update Operations 163
- 6.7 Concluding Remarks 166
- Exercises 169
- Answers to Selected Exercises 173

# 7

## **The System Catalog 179**

- 7.1 Introduction 179
- 7.2 Querying the Catalog 181
- 7.3 Updating the Catalog 182
- Exercises 183
- Answers to Selected Exercises 184

# 8

## **Views 187**

- 8.1 Introduction 187
- 8.2 View Definition 189
- 8.3 DML Operations on Views 191

- 8.4 Logical Data Independence 196
- 8.5 Advantages of Views 198
  - Exercises 199
  - Answers to Selected Exercises 199

## 9

### **Embedded SQL 203**

- 9.1 Introduction 203
- 9.2 Operations Not Involving Cursors 205
- 9.3 Operations Involving Cursors 207
- 9.4 A Comprehensive Example 210
- 9.5 Dynamic SQL 213
- 9.6 Concluding Remarks 214
  - Exercises 216
  - Answers to Selected Exercises 216

## 10

### **An Overview of INGRES 221**

- 10.1 Background 221
- 10.2 Data Definition 223
- 10.3 Data Manipulation: Retrieval Operations 226
- 10.4 Data Manipulation: Update Operations 232
- 10.5 Views 234
- 10.6 Embedded QUEL 235
  - Exercises 239
  - References and Bibliography 239
  - Answers to Selected Exercises 240

---

## PART III

### **THE RELATIONAL MODEL 245**

## 11

### **Relational Data Structure 249**

- 11.1 An Introductory Example 249
- 11.2 Domains 251

- 11.3 Relations 257
- 11.4 Relational Databases 266
- References and Bibliography 267

## 12

### **Relational Integrity Rules 275**

- 12.1 Introduction 275
- 12.2 Primary Keys 276
- 12.3 The Entity Integrity Rule 279
- 12.4 Foreign Keys 281
- 12.5 The Referential Integrity Rule 284
- 12.6 Foreign Key Rules 285
- 12.7 Concluding Remarks 288
- Exercises 288
- References and Bibliography 289
- Answers to Selected Exercises 291

## 13

### **Relational Algebra 295**

- 13.1 Introduction 295
- 13.2 A Syntax for the Relational Algebra 298
- 13.3 Traditional Set Operations 301
- 13.4 Special Relational Operations 306
- 13.5 Examples 311
- 13.6 What Is the Algebra For? 313
- 13.7 Additional Operators 315
- 13.8 Relational Assignment 320
- Exercises 321
- References and Bibliography 322
- Answers to Selected Exercises 325

## 14

### **Relational Calculus 335**

- 14.1 Introduction 335
- 14.2 Tuple-Oriented Relational Calculus 337
- 14.3 Examples 342
- 14.4 Relational Calculus vs. Relational Algebra 344

- 14.5 Domain-Oriented Relational Calculus 349
- 14.6 Query-By-Example 351
  - Exercises 355
  - References and Bibliography 357
  - Answers to Selected Exercises 358

# 15

## Some Ramifications of the Model 369

- 15.1 The Relational Model: A Summary 369
- 15.2 Essentiality 371
- 15.3 What Is a Relational System? 376
- 15.4 Data Value Atomicity 378
- 15.5 Views 380
- 15.6 Missing Information 385
- 15.7 Whither the Relational Model? 388
  - Exercises 393
  - References and Bibliography 394
  - Answers to Selected Exercises 397

---

# PART IV

## THE DATABASE ENVIRONMENT 399

# 16

## Recovery and Concurrency 401

- 16.1 Introduction 401
- 16.2 Transaction Recovery 401
- 16.3 System and Media Recovery 405
- 16.4 Two-Phase Commit 407
- 16.5 Three Concurrency Problems 409
- 16.6 Locking 411
- 16.7 Concluding Remarks 417
  - Exercises 418
  - References and Bibliography 419
  - Answers to Selected Exercises 425

# 17

## Security and Integrity 429

- 17.1 Introduction 429
- 17.2 Security: General Considerations 430
- 17.3 Security in SQL 431
- 17.4 Other Aspects of Security 435
- 17.5 Integrity: General Considerations 436
- 17.6 A Hypothetical Integrity Language 437
- 17.7 Security and Integrity in QUEL 442
- 17.8 Concluding Remarks 444
  - Exercises 445
  - References and Bibliography 446
  - Answers to Selected Exercises 450

# 18

## Query Optimization 455

- 18.1 Introduction 455
- 18.2 A Simple Example 457
- 18.3 The Optimization Process: An Overview 458
- 18.4 Optimization in System R 464
- 18.5 Optimization in INGRES 467
- 18.6 Implementing the Relational Operators 471
  - Exercises 474
  - References and Bibliography 475
  - Answers to Selected Exercises 488

# 19

## Frontend Subsystems 491

- 19.1 Introduction 491
- 19.2 Data Access 492
- 19.3 Data Presentation 499
- 19.4 Application Generation 506
  - Exercises 511
  - References and Bibliography 511

# 20

## Administration Facilities 513

- 20.1 Introduction 513
- 20.2 Application Preparation and Execution 514
- 20.3 Utilities and System Commands 515
- 20.4 Performance Management 516
- 20.5 Conclusion 518

---

# P A R T V

## DATABASE DESIGN 521

# 21

## Further Normalization 525

- 21.1 Introduction 525
- 21.2 Functional Dependence 529
- 21.3 First, Second, and Third Normal Forms 532
- 21.4 Good and Bad Decompositions 540
- 21.5 Boyce/Codd Normal Form 543
- 21.6 Fourth Normal Form 549
- 21.7 Fifth Normal Form 552
- 21.8 Concluding Remarks 557
  - Exercises 561
  - References and Bibliography 563
  - Answers to Selected Exercises 569

# 22

## Semantic Modeling 579

- 22.1 Introduction 579
- 22.2 The Overall Approach 581
- 22.3 The Entity/Relationship Model 583
- 22.4 Entity/Relationship Diagrams 587
- 22.5 Database Design with the Entity/Relationship Model 589
- 22.6 The Extended Relational Model RM/T 593
- 22.7 Database Design with RM/T 600
- 22.8 Analysis and Comparisons 606

- 22.9 Concluding Remarks 609
- Exercises 609
- References and Bibliography 610

---

## P A R T V I

### DIRECTIONS 615

# 23

## Distributed Systems 617

- 23.1 Introduction 617
- 23.2 The Twelve Rules 621
- 23.3 Problems of Distributed Systems 627
- 23.4 Gateways 633
- 23.5 Concluding Remarks 635
- Exercises 636
- References and Bibliography 636

# 24

## Logic-Based Systems 641

- 24.1 Background 641
- 24.2 Overview 642
- 24.3 Propositional Calculus 644
- 24.4 Predicate Calculus 649
- 24.5 A Proof-Theoretic View of Databases 656
- 24.6 Deductive Database Systems 659
- 24.7 Recursive Query Processing 665
- 24.8 Concluding Remarks 671
- Exercises 673
- References and Bibliography 674
- Answers to Selected Exercises 680

# 25

## Object-Oriented Systems 683

- 25.1 Introduction 683
- 25.2 What Object-Oriented Technology Is Not 685

- 25.3 Object-Oriented Concepts 687
- 25.4 Data Definition 691
- 25.5 Data Manipulation 695
- 25.6 Concluding Remarks 700
- References and Bibliography 704

## 26

### Further Research Topics 709

- 26.1 Introduction 709
- 26.2 Database Programming Languages 709
- 26.3 The Universal Relation 714
- 26.4 Time 717
- 26.5 Nested Relations 721
- 26.6 New Application Areas 724
- 26.7 Extendable Systems 727
- 26.8 The Future 730

---

## A P P E N D I X E S 733

### A

#### An Inverted List System: DATACOM/DB 737

- A.1 Background 737
- A.2 The Inverted List Model 738
- A.3 An Overview of DATACOM/DB 740
- A.4 Data Definition 742
- A.5 Data Manipulation 746
- A.6 The Compound Boolean Selection Feature 749
- Exercises 751

### B

#### A Hierarchic System: IMS 753

- B.1 Background 753
- B.2 The Hierarchic Model 754
- B.3 An Overview of IMS 759
- B.4 Data Definition 761
- B.5 Data Manipulation 763

- B.6 Storage Structure 769
- B.7 Logical Databases 773
- B.8 Secondary Indexes 779
- B.9 Concluding Remarks 782
  - Exercises 784
  - References and Bibliography 786
  - Answers to Selected Exercises 787

## C

### **A Network System: IDMS 791**

- C.1 Background 791
- C.2 The Network Model 792
- C.3 An Overview of IDMS 798
- C.4 Data Definition 799
- C.5 Data Manipulation 802
- C.6 Storage Structure 810
- C.7 The Logical Record Facility 812
- C.8 The Automatic System Facility 817
- C.9 Concluding Remarks 822
  - Exercises 826
  - References and Bibliography 827
  - Answers to Selected Exercises 828

## D

### **Abbreviations and Acronyms 833**

### **Index 836**
