<b>Chapter 1</b>	<b>Introduction to RenderWare .....</b>	<b>1</b>
1.1	RenderWare Features .....	2
1.1.1	3D Software Performance .....	3
1.1.2	3D Hardware Acceleration Support .....	3
1.1.3	API Features .....	3
1.1.4	Cross-Platform Support .....	5
1.2	3D Software Glossary .....	5
1.2.1	Basic Terminology .....	5
1.2.2	Transformations .....	6
1.2.3	Modeling .....	7
1.2.4	Materials .....	8
1.2.5	Rendering .....	9
1.2.6	Cameras .....	10
1.2.7	Color .....	12
1.2.8	Application Software .....	13
1.2.9	Scenes .....	13
1.2.10	Computer Environment .....	14
1.3	Creating a 3D Software Application .....	14
1.3.1	Application Responsibilities .....	15
1.3.2	Graphics Library Responsibilities .....	16
1.3.3	Preparation .....	16
1.3.4	Creating a Scene .....	17
1.4	The RenderWare Components .....	22
1.4.1	Set Up Functions .....	22
1.4.2	Scenes .....	23

1.4.3	Cameras .....	24
1.4.4	Polygons .....	24
1.4.5	Clumps .....	24
1.4.6	Lighting .....	24
1.4.7	Materials .....	25
1.4.8	Textures .....	25
1.4.9	Rasters and Bitmaps .....	25
1.4.10	Point, Vector, and Matrix Operations .....	25
1.4.11	Spline Paths .....	26
1.4.12	Color Management .....	26
1.4.13	Picking .....	26
1.4.14	Rendering .....	27
1.4.15	User Draws .....	27
1.4.16	Call Backs .....	27
1.4.17	Designing Objects .....	27
1.4.18	Script Files .....	28
1.4.19	Debugging and Error Processing .....	28
1.4.20	Operating System Specific Functions .....	28
1.4.21	The CD-ROM .....	28
1.4.22	Appendix A: Library Defaults .....	29
1.4.23	Appendix B: Data Types .....	29
1.4.24	Appendix C: Error Codes .....	29
1.4.25	Appendix D: Useful Tips .....	29
1.4.26	Appendix E: Suggested Reading .....	29
1.4.27	Appendix F: Manufacturer's Reference .....	29
1.4.28	Appendix G: RenderWare Functions by Topic .....	29
1.4.29	Appendix H: RenderWare Scripting Language .....	30
1.5	The Structure of a RenderWare Program .....	30
1.6	A "Hello World" example .....	31
1.6.1	Initializing the Library .....	31
1.6.2	Creating and Initializing a Camera .....	31
1.6.3	Creating a Scene .....	32
1.6.4	Creating a Light Source and adding it to a Scene .....	32
1.6.5	Creating a Clump and adding it to a Scene .....	32
1.6.6	Rendering a Scene .....	33
1.6.7	Closing the Library .....	33
1.7	The RenderWare Object Hierarchy .....	33
<b>Chapter 2</b>	<b>Setting Up RenderWare .....</b>	<b>35</b>
2.1	Opening and Closing the Libraries .....	36
2.2	Getting System Information .....	38
2.3	Getting Device Information .....	39

2.4	Controlling the Device .....	42
2.5	Testing for WinG .....	42
<b>Chapter 3</b>	<b>Scenes .....</b>	<b>45</b>
3.1	What is a Scene? .....	45
3.1.1	What's in a Scene? .....	45
3.1.2	What's Not in a Scene? .....	45
3.1.3	Default Scene .....	47
3.1.4	Multiple Scenes .....	48
3.2	RenderWare Scene Functions .....	50
3.3	The Default Scene .....	51
3.4	Creating and Destroying Scenes .....	52
3.5	Adding Objects to Scenes .....	53
3.6	Inquiring What is in a Scene .....	55
3.7	Performing Operations on all Objects in a Scene .....	55
3.8	Rendering a Scene .....	56
3.9	User Data Associated with Scenes .....	57
<b>Chapter 4</b>	<b>Cameras .....</b>	<b>59</b>
4.1	Creating, Destroying, and Duplicating Cameras .....	60
4.1.1	Cameras and Their Image Buffers .....	61
4.1.2	Creating, Destroying, and Duplicating a Camera .....	63
4.1.3	Camera Default Parameters .....	65
4.1.4	Creating Multiple Cameras .....	66
4.2	The Camera View Window .....	68
4.2.1	Camera and World Space .....	70
4.2.2	Left-Handed Camera Coordinate System .....	71
4.2.3	Size of the View Window and Field of View Angle .....	71
4.2.4	Aspect Ratio: Width and Height of the View Window .....	74
4.2.5	View Window and Viewport RenderWare Related Functions .....	75
4.2.6	Relationship of View Window and Viewport .....	77
4.2.7	The Camera View Offset .....	80
4.3	The Camera Viewport .....	81
4.3.1	Device Space Coordinates .....	82
4.3.2	Rendering into the Viewport .....	85
4.4	Maintaining Aspect Ratio using Viewports and View Windows .....	90
4.5	Changing the Position of the Camera .....	91
4.6	Changing the Orientation of the Camera .....	108
4.6.1	Camera Orientation Vectors in a Matrix .....	109

4.6.2	Camera Look At Vector .....	111
4.6.3	Camera Up Vector .....	112
4.6.4	Camera Right Vector .....	114
4.6.5	Correct Order for Loading Camera Up and Camera Right .....	114
4.6.6	Pointing the Camera .....	115
4.6.7	Panning the Camera .....	117
4.6.8	Tilting .....	119
4.6.9	Revolving .....	122
4.6.10	Orienting a Camera with Pan, Revolve, and Tilt ..	122
4.7	Using the Camera LTM .....	124
4.8	The Camera Backdrop .....	126
4.8.1	Raster Backdrop Images .....	132
4.8.2	Raster Backdrop Offset .....	135
4.8.3	Backdrop Viewport Rectangle .....	135
4.9	Camera Projections .....	136
4.9.1	Parallel Projections .....	136
4.9.2	Perspective Projection .....	136
4.10	Near and Far Clipping Planes .....	137
4.11	Camera Buffer .....	138
4.11.1	Rendering into the Camera Buffer .....	142
4.11.2	Copying the Camera Buffer to the Display .....	143
4.12	Camera User Data .....	144
4.13	Begin and End Camera Update .....	145
4.14	Experimenting with Cameras using rfView .....	146
<b>Chapter 5</b>	<b>Polygons .....</b>	<b>149</b>
5.1	Using Polygons in <i>RenderWare</i> .....	162
5.2	Creating and Destroying Polygons .....	164
5.2.1	Vertex Lists .....	164
5.2.2	Polygon Faces .....	164
5.3	Polygon Material .....	164
5.3.1	Polygon Material Color .....	165
5.3.2	Polygon Opacity .....	166
5.3.3	Polygon Reflection Coefficients .....	168
5.4	Rendering Polygons .....	169
5.5	Polygon Tags .....	170
5.6	Polygon User Data .....	170
5.7	Polygon Geometry Sampling .....	170
5.8	Polygon Shading .....	171
5.9	Polygon Texture .....	171
5.10	Polygon Texture Mode .....	171

5.11	Texture Mapping .....	172
5.12	Performing Operations on All Polygons .....	177
<b>Chapter 6</b>	<b>Clumps .....</b>	<b>179</b>
6.1	Creating a Clump .....	180
6.2	What is a Clump? .....	181
6.2.1	Clump Geometries .....	181
6.2.2	Placing a Clump in the World Coordinate System .....	189
6.2.3	Coordinate System Operations are Called Transformations .....	194
6.2.4	Sprites .....	200
6.3	Creating, Destroying, and Duplicating Clumps .....	210
6.4	Creating a Sprite .....	215
6.5	Reading a Clump .....	216
6.6	Setting the State of a Clump .....	216
6.7	Tagging a Clump .....	218
6.8	Finding a Clump .....	
6.8.1	Finding a Clump Through Callbacks .....	
6.8.2	Finding a Tagged Clump .....	
6.8.3	Finding a Clump's Bounding Box in the Viewport .....	220
6.8.4	Finding a Vertex in Viewport Coordinates .....	222
6.9	Clump User Data .....	222
6.10	Clump Hints .....	223
6.10.1	Clump Is a Container Hint (rwCONTAINER) .....	224
6.10.2	Clump Deserves Hidden Surface Removal (rwHS) .....	225
6.10.3	Clump Geometry Is Editable (rwEDITABLE) .....	226
6.11	Rendering a Clump .....	231
6.12	Hierarchical Clumps .....	233
6.12.1	Ownership .....	241
6.12.2	Parents and Children .....	242
6.12.3	Hierarchical Clumps .....	242
6.13	Positioning and Orienting Clumps .....	243
6.13.1	Clump Origin .....	243
6.13.2	Clump Alignment .....	245
6.14	Determining the Distance from a Point to a Clump .....	247
6.15	Manipulating Vertices in a Clump .....	247
6.15.1	Adding Vertex to a Clump .....	248
6.15.2	Position Vertex .....	249
6.15.3	Vertex Normals .....	251

6.15.4	Vertex Texture Coordinates .....	251
6.16	Manipulating Polygons in a Clump .....	253
6.17	Transforming Clumps .....	253
6.17.1	Model Matrix .....	253
6.17.2	Local Transformation Matrix .....	258
6.17.3	Joint Transformation Matrix .....	262
6.17.4	Normalizing a Clump .....	265
6.18	Performing Operations on All Clumps .....	266
6.19	Bounding Boxes .....	267
6.20	Clump Texture Mapping .....	268
6.21	Environment Mapping .....	269
<b>Chapter 7</b>	<b>Lighting .....</b>	<b>271</b>
7.1	Lighting a Scene .....	271
7.2	Light Attributes .....	273
7.2.1	On or Off .....	273
7.2.2	Brightness .....	273
7.2.3	Color .....	275
7.2.4	Color and Surface Characteristics .....	277
7.2.5	Experimenting with Colored Lights using <code>rwView</code> .....	278
7.3	Light Types .....	281
7.3.1	There Is No Ambient Light Type .....	283
7.3.2	Point (Omni-Directional) Light Sources .....	284
7.3.3	Directional (Distant) Light Sources .....	284
7.3.4	Conical (Spot) Light Sources .....	285
7.3.5	Conical Light Cone Angle .....	289
7.4	Example of Light Types: Lighting a Sphere .....	290
7.5	Light Position and Orientation .....	291
7.6	Light Is Not Stopped by an Object .....	293
7.7	Light Source Geometry .....	294
7.8	Using <code>RenderWare</code> Lights .....	295
7.8.1	Lighting in <code>rwView</code> .....	295
7.8.2	Lighting in <code>rwMaze</code> .....	298
7.8.3	Lighting in <code>rwKnight</code> and <code>rwRoller</code> .....	299
7.8.4	Lighting in <code>rwCyber</code> .....	300
7.9	Querying about a Light .....	300
7.10	Light User Data .....	301
7.11	Using Histograms as a Light Meter .....	302
<b>Chapter 8</b>	<b>Materials .....</b>	<b>305</b>
8.1	<code>RenderWare</code> Object Hierarchy .....	307
8.2	Creating Materials .....	308
8.2.1	Using <code>rwPaint</code> to Create Materials .....	308

8.2.2	Using 3D Studio to Create Materials .....	308
8.2.3	Using trueSpace to Create Materials .....	309
8.2.4	Functions that Create, Destroy, Duplicate, and Copy Materials .....	310
8.2.5	Building Materials using RenderWare .....	311
8.3	Referencing Materials .....	313
8.3.1	Changing a Material's Appearance .....	314
8.3.2	Keeping Track of Your Materials .....	316
8.4	Material Properties .....	319
8.5	Color .....	322
8.6	Opacity .....	323
8.6.1	Picking a Semi-Opaque Object .....	325
8.6.2	Picking a Back-Facing Polygon .....	326
8.7	Reflection Coefficients .....	328
8.7.1	Ambient Reflections .....	330
8.7.2	Diffuse Reflections .....	331
8.7.3	Specular Reflections .....	336
8.7.4	Specular and Diffuse Combinations .....	339
8.8	Materials Can Reference Textures .....	339
8.9	Material Texture Modes .....	340
8.9.1	Lit Textures .....	345
8.9.2	Foreshortened Perspectively Correct Textures ...	345
8.9.3	Filtered Anti-aliased Textures .....	345
8.10	The Material Stack .....	347
8.11	Using rfPaint and rfView .....	349
<b>Chapter 9</b>	<b>Textures .....</b>	<b>353</b>
9.1	Creating and Destroying Textures .....	358
9.2	Texture Dictionaries .....	359
9.2.1	Texture Dictionary Search Mode .....	363
9.2.2	Creating and Destroying a Dictionary .....	363
9.3	Texture Modes .....	365
9.3.1	Experimenting with Texture Modes using rfView .....	365
9.3.2	Lighting a Texture .....	369
9.3.3	Foreshortening a Texture .....	369
9.3.4	Filtering a Texture .....	372
9.4	Texture Rasters and Bitmaps .....	372
9.4.1	Spatial Resolution .....	373
9.4.2	Maintaining Texture Aspect Ratio .....	374
9.4.3	Color Resolution .....	374
9.4.4	Modifying the Texture Raster .....	375
9.4.5	Raster Options .....	375

9.5	Texture Storage .....	375
9.5.1	File Naming Format .....	376
9.5.2	Texture Dictionaries .....	376
9.6	Reading and Finding Textures .....	377
9.6.1	Reading a Texture from a File .....	378
9.6.2	Retrieving Named Textures .....	379
9.6.3	Finding a Texture .....	380
9.6.4	Operating on All Named Textures .....	380
9.7	Texture Mapping .....	381
9.7.1	Where Do Textures Get Mapped? .....	381
9.7.2	Setting the Texture Mapping Coordinates .....	385
9.7.3	RenderWare Texture Mapping Coordinate Data Type .....	387
9.7.4	Maximum Texture Coordinate Range .....	387
9.7.5	Texture Wrap-Around .....	387
9.7.6	Getting the Texture Oriented Correctly .....	388
9.7.7	Texture Mapping Example .....	394
9.7.8	Texture Mapping onto a Cube .....	396
9.7.9	Planar Mapping .....	399
9.8	Setting the Texture for all Polygons in a Clump ....	399
9.8.1	Spherical Mapping .....	399
9.8.2	Cubic Mapping .....	401
9.8.3	Environment Mapping .....	401
9.9	Texture User Data .....	402
9.10	Texture Dithering, Gamma Correction, and Masking .....	402
9.10.1	Texture Dithering .....	403
9.10.2	Gamma Correction .....	404
9.10.3	Texture Masking .....	404
9.11	Tiling Textures .....	405
9.12	Animating Textures .....	405
9.12.1	Multiple Textures or a Multiframe Texture .....	409
9.12.2	Advancing to a Different Frame .....	409
9.12.3	Frame Stepping Rate .....	410
9.13	Example of Textured Space Ship .....	412
<b>Chapter 10</b>	<b>Rasters and Bitmaps .....</b>	<b>417</b>
10.1	Raster Size .....	417
10.2	Raster Options .....	418
10.3	Types of Rasters .....	419
10.4	Raster Color Compression .....	421
10.5	Creating, Duplicating, and Destroying Rasters .....	421
10.6	Reading Rasters .....	423

10.7	Raster User Data .....	424
10.8	Inquiring the Raster Size and Format .....	424
10.9	Raster Masks .....	425
10.10	Writing Directly into a Raster .....	427
<b>Chapter 11</b>	<b>Points, Vectors, and Matrices .....</b>	<b>433</b>
11.1	Spaces .....	433
11.2	Coordinate Systems .....	434
11.2.1	Left or Right Handed .....	434
11.2.2	Cartesian .....	435
11.2.3	Polar .....	436
11.2.4	Measuring Angles .....	438
11.3	Trigonometry .....	438
11.4	Points .....	442
11.5	Vectors .....	442
11.5.1	Unit Vector .....	443
11.5.2	Vector Operations .....	444
11.5.3	Projecting onto a Vector .....	449
11.6	Planes .....	450
11.6.1	Normal Direction of a Plane .....	450
11.6.2	Distance of a Point to a Plane .....	451
11.7	Matrices .....	452
11.7.1	Transformations as a Black Box .....	453
11.7.2	The Homogeneous Matrix .....	454
11.7.3	The Identity Matrix .....	454
11.7.4	The RenderWare Scratch Matrix Stacks .....	455
11.7.5	The Model Matrix .....	457
11.7.6	The Local Transformation Matrix .....	457
11.7.7	The Joint Transformation Matrix .....	458
11.8	Matrix Operations .....	458
11.8.1	Adding .....	459
11.8.2	Subtracting .....	459
11.8.3	Multiplying Two Matrices Together .....	459
11.8.4	Multiplying a Vector by a Matrix .....	460
11.8.5	Matrix Transpose .....	460
11.8.6	Matrix Determinant .....	461
11.8.7	Matrix Inversion .....	461
11.8.8	Concatenating Matrices .....	461
11.9	Transformations .....	467
11.9.1	Translations .....	467
11.9.2	Rotations .....	469
11.9.3	Rotating in Place .....	472
11.9.4	Scaling .....	475

11.9.5	Scaling in Place .....	477
11.10	Experimenting with rfView .....	479
11.11	Point Functions .....	481
11.12	Vector Functions .....	483
11.13	Matrix Functions .....	486
11.13.1	Creating, Copying, Duplicating, and Destroying Matrices .....	488
11.13.2	Addressing Individual Elements in a Matrix .....	490
11.13.3	The Matrix Stack .....	493
11.13.4	Matrix Operations .....	493
11.14	Random Numbers .....	499
11.15	Homogeneous Space .....	500
<b>Chapter 12</b>	<b>Spline Paths .....</b>	<b>503</b>
12.1	Properties of Splines .....	505
12.2	Creating Splines .....	506
12.3	Spline Type .....	508
12.4	Spline Path Type .....	508
12.5	Examples Using Splines .....	510
12.5.1	rfView Example .....	510
12.5.2	rwRoller Example .....	520
12.5.3	rwCyber Example .....	528
12.6	Creating, Duplicating, and Destroying Spline Paths .....	531
12.7	Spline User Data .....	531
12.8	Accessing Shapes to and from Disk .....	532
12.9	Modifying a Spline .....	534
12.10	Finding a Point on a Spline .....	536
12.11	The Frenet Transform Matrix .....	538
<b>Chapter 13</b>	<b>Color Management .....</b>	<b>543</b>
13.1	Direct Color .....	543
13.1.1	Bit-Per-Color Mode .....	543
13.1.2	Hi-Color Mode .....	545
13.1.3	True-Color Mode .....	545
13.2	Indexed Color .....	546
13.3	Color Related Data Types .....	547
13.3.1	Open Option Type .....	547
13.3.2	RwPaletteEntry Data Type .....	548
13.3.3	Returning Information about the Device .....	548
13.3.4	Palette Options .....	549
13.4	Color Matching, Dithering, and Gamma Correction .....	549
13.4.1	Color Matching .....	549

13.4.2	Dithering .....	550
13.4.3	Gamma Correction .....	551
13.5	Palette Management .....	552
13.5.1	Palettes and Lighting .....	554
13.5.2	Palettes and Lit Textures .....	554
13.6	Optimizing Palettes .....	555
13.6.1	Using PaintShop Pro .....	556
13.6.2	Creating a Common Palette .....	557
13.6.3	Creating a Shading Friendly Palette .....	559
13.6.4	Shading a Texture in <i>rfView</i> .....	560
13.7	Windows and the Palette .....	561
13.7.1	<i>RenderWare</i> and Palette Ownership .....	562
13.8	<i>RenderWare</i> and the Palette .....	563
13.8.1	<i>RenderWare</i> Color Compression .....	563
13.8.2	<i>RenderWare</i> Default Palette .....	564
13.9	Using <i>rfView</i> to Experiment with Palettes .....	564
13.9.1	Reading a Palette File .....	565
13.10	Examples Using the Palette .....	566
13.10.1	Manipulating the Color Palette .....	567
13.10.2	Building Palette Ramps .....	569
13.10.3	A Palette Viewer .....	573
13.11	Using <i>rfView</i> to Experiment with Palettes .....	576
13.11.1	Viewing the Composite Palette in <i>rfView</i> .....	576
13.11.2	Shading the Composite Palette in <i>rfView</i> .....	577
<b>Chapter 14</b>	<b>Picking .....</b>	<b>579</b>
14.1	Opacity and Picking .....	579
14.2	Picking Back-Facing Polygons .....	579
14.3	Pick-Related Structures .....	581
14.4	Pick Object Type .....	583
14.5	Picking in <i>rwView</i> .....	584
14.6	Picking in <i>rwRoller</i> .....	594
14.7	Related <i>RenderWare</i> Functions .....	595
<b>Chapter 15</b>	<b>Rendering .....</b>	<b>597</b>
15.1	Computer Software and Hardware Environment ...	600
15.1.1	Computer Software Involved in Rendering .....	600
15.1.2	Computer System and Rendering .....	601
15.1.3	Graphics System and Rendering .....	602
15.2	Geometry Sampling .....	604
15.3	Improving Rendering Performance .....	606
15.3.1	Make Your World as Simple as Possible .....	607
15.3.2	Careful Use of Texture Modes and Animation ...	607
15.3.3	Cull the Database .....	607

15.3.4	Careful Use of Hints .....	608
15.3.5	Limit the Viewport Size .....	608
15.3.6	Minimize the Clearing of the Viewport .....	609
15.3.7	Scene Management .....	609
15.4	Clump Hints .....	609
15.4.1	The NOHS Hint .....	610
15.4.2	The HS Hint .....	610
15.4.3	The EDITABLE Hint .....	610
15.4.4	The CONTAINER Hint .....	610
15.5	Z-Buffering .....	611
15.5.1	Scene Management .....	611
15.5.2	Editable Clumps .....	611
15.6	Depth Sorting .....	612
15.7	Using Large Worlds .....	612
15.7.1	Using Hints to Help Reduce Z-Buffering .....	612
15.7.2	Adjusting the Far and Near Clipping Planes .....	613
15.7.3	Clump Ordering .....	613
15.7.4	Rendering in Slabs .....	613
15.8	Can RenderWare perform like Doom and Dark Forces? .....	616
15.9	Object Memory Requirements .....	617
15.10	Examples .....	617
15.10.1	Rendering Example in rfView .....	617
15.10.2	Rendering Example in rwRoller .....	619
15.10.3	Rendering Example in rwMaze .....	621
15.10.4	Rendering Example in rwKnight .....	625
15.10.5	Rendering Example in rwCyber .....	627
15.10.6	Rendering Hints .....	656
15.11	Rendering Functions .....	656
15.12	User Draws .....	657
<b>Chapter 16</b>	<b>User Draws .....</b>	<b>659</b>
16.1	User Draw Ownership .....	660
16.2	User Draw Size .....	660
16.3	User Draw Types .....	660
16.4	Alignment Point on the User Draw .....	663
16.5	Alignment Point on the Reference for the User Draw .....	664
16.6	Using User Draws .....	665
16.7	Creating, Duplicating, and Destroying User Draws .....	668
16.8	User Draw Data .....	673
16.9	Clumps Qwn User Draws .....	673

16.10	User Draw Offset and Size .....	673
16.11	User Draw Type and Alignment .....	674
16.12	User Draw Callback Functions .....	676
<b>Chapter 17</b>	<b>Callback Functions .....</b>	<b>677</b>
17.1	Callback Variants .....	677
17.2	Simple Examples .....	677
17.2.1	For All Polygons In Clump .....	678
17.2.2	For All Clumps In Scene .....	679
17.2.3	For All Lights In Scene .....	680
17.3	If an Error Occurs .....	681
17.4	Expected Callback Return Value .....	681
17.5	Layered Callback Functions .....	681
17.6	Showing and Hiding Objects .....	682
17.7	Setting Surface Characteristics of Polygons .....	683
17.8	Destroying a Viewer Scene .....	684
17.9	Turn Lights On or Off .....	686
17.10	Animate Textures .....	687
<b>Chapter 18</b>	<b>Object-Building Functions .....</b>	<b>689</b>
18.1	Relationship of Object Builder Function Calls to Script Files .....	689
18.2	Prototyping .....	693
18.2.1	RwProtoInstance and RwProtoInstanceGeometry .....	693
18.3	Including Clumps into a Clump .....	693
18.4	Creating Models .....	694
18.4.1	Primitive Shapes .....	694
18.4.2	Modeling .....	696
18.4.3	Model Begin and Model End .....	700
18.4.4	Clump Begin and Clump End .....	700
18.4.5	Vertices .....	701
18.4.6	Polygons .....	702
18.4.7	Discs .....	702
18.4.8	Cylinders .....	703
18.4.9	Blocks .....	704
18.4.10	Spheres .....	704
18.5	Hints .....	705
18.6	Tags .....	705
18.7	Materials .....	705
18.8	Surfaces .....	706
18.9	Texture .....	707
18.9.1	Texture Modes Associated with Textures .....	707
18.9.2	Loading Textures .....	707

18.9.3	Texture Rendering .....	708
18.10	Axis Alignment .....	709
18.11	Transforming the Current Transformation Matrix .....	709
18.12	Transforming the Joint Transformation Matrix ....	710
18.13	Rendering .....	711
18.14	Identifying a Clump using Tags as Opposed to Pointers .....	711
<b>Chapter 19</b>	<b>Script Language .....</b>	<b>713</b>
19.1	Designing Objects using Script Files .....	715
19.2	Relationship of Script Files to Object-Building Function Calls .....	715
19.3	Prototyping .....	717
19.3.1	ProtoBegin and ProtoEnd .....	719
19.3.2	ProtoInstance and ProtoInstance Geometry ....	719
19.4	Including External Script Files .....	721
19.4.1	Include and IncludeGeometry .....	722
19.5	Creating Models .....	722
19.5.1	ModelBegin and ModelEnd .....	727
19.5.2	ClumpBegin and ClumpEnd .....	727
19.5.3	Specifying Vertices using Vertex and VertexExt ..	727
19.5.4	Building Polygons using Polygon and PolygonExt .....	732
19.5.5	Building Quads using Quad and QuadExt .....	734
19.5.6	Building Triangles using Triangle and TriangleExt .....	735
19.5.7	Building a Disc .....	735
19.5.8	Cylinder .....	736
19.5.9	Filling a Cylinder .....	736
19.5.10	Cone .....	737
19.5.11	Block .....	738
19.5.12	Sphere and Hemisphere .....	738
19.6	Using Hints with AddHint, Hints, and RemoveHint .....	739
19.7	Tagging a Clump using Tag .....	740
19.8	Building Materials within MaterialBegin and MaterialEnd .....	740
19.9	Creating Surfaces using Surface, Ambient, Diffuse, Specular .....	740
19.10	Specifying Color .....	742
19.11	Specifying Opacity .....	743
19.12	Texture .....	743

19.12.1	Texture Modes Associated with Textures .....	744
19.12.2	TextureDithering .....	745
19.12.3	TextureGammaCorrection .....	746
19.13	Axis Alignment .....	746
19.14	Transforming the Model Matrix .....	746
19.14.1	TransformBegin and TransformEnd .....	746
19.14.2	Identity .....	748
19.14.3	Transform .....	749
19.14.4	Translate .....	749
19.14.5	Scale .....	757
19.14.6	Rotate .....	758
19.15	Transforming the Joint Transformation Matrix ....	758
19.15.1	JointTransformBegin and JointTransformEnd ...	759
19.15.2	IdentityJoint .....	760
19.15.3	TransformJoint .....	761
19.15.4	RotateJoint .....	761
19.16	Rendering .....	761
19.16.1	GeometrySampling .....	762
19.16.2	LightSampling .....	762
19.17	Considerations Regarding Shared Vertices .....	763
19.18	Debugging using Trace .....	769
<b>Chapter 20</b>	<b>Debugging and Error Processing .....</b>	<b>771</b>
20.1	Error Reporting .....	771
20.1.1	Error Codes in the Enumerated Types .....	779
20.1.2	Error Code Type .....	780
20.1.3	Error Related RenderWare Functions .....	780
20.2	Using the Debugging System under Windows .....	781
20.3	Debugging Messages and Data Types .....	782
20.3.1	Assertion Failure Messages .....	783
20.3.2	Scripting Trace Messages .....	783
20.3.3	Miscellaneous Messages .....	783
20.3.4	API Function Tracing Messages .....	784
20.3.5	API Function Tracing Example Scenarios .....	784
20.3.6	Debug Severity Data Type .....	785
20.3.7	Debug State Data Type .....	785
20.4	Debugging in the rfView Program .....	787
20.5	The Debugging Stream .....	787
20.5.1	Debug Severity .....	789
20.6	Debugging States .....	789
20.6.1	Message State .....	790
20.6.2	Assertion State .....	790
20.6.3	Debugging Trace State .....	790
20.6.4	Debugging during Scripting .....	790

<b>Chapter 21</b>	<b>Operating-System-Specific Functions .</b>	<b>791</b>
21.1	Running under the Windows Environment . . . . .	791
21.1.1	System Requirements when Running under Windows . . . . .	791
21.1.2	Environment Variables . . . . .	792
21.1.3	RenderWare Windows Libraries . . . . .	792
21.1.4	RenderWare DLL Libraries . . . . .	792
21.1.5	RenderWare Static Libraries . . . . .	797
21.1.6	Include Files . . . . .	798
21.1.7	Compilers . . . . .	798
21.1.8	RenderWare and Windows Bitmap Types . . . . .	806
21.1.9	RenderWare and Windows Palettes . . . . .	812
21.2	Windows-Specific API Functions . . . . .	814
21.2.1	Opening the RenderWare Library in Windows API Functions . . . . .	814
21.2.2	Device-Related Windows API Functions . . . . .	817
21.2.3	Get Device Information Windows API Functions . . . . .	818
21.2.4	Camera-Related Windows API Functions . . . . .	821
21.2.5	Debugging-Related API Functions . . . . .	822
21.3	Running under the MS-DOS Environment . . . . .	823
21.3.1	System Requirements when Running under MS-DOS . . . . .	823
21.3.2	Environment Variables . . . . .	824
21.3.3	RenderWare Library Configuration . . . . .	824
21.3.4	Using the DOS Configuration File dosrw.ini . . . . .	824
21.3.5	Using the UNIVBE Universal VESA Driver included on the CD . . . . .	826
21.3.6	Include Files . . . . .	826
21.3.7	Using the DOS Configuration Include File rwdos.h . . . . .	827
21.3.8	Building Programs: Watcom C/386 Compiler . . . . .	827
21.4	MS-DOS-Specific API Functions . . . . .	828
21.4.1	Opening the RenderWare Library DOS API Functions . . . . .	829
21.4.2	Device-Related DOS API Functions . . . . .	832
21.4.3	Get Device Information DOS API Functions . . . . .	843
21.4.4	Camera-Related DOS API Functions . . . . .	844
21.4.5	Debugging-Related DOS API Functions . . . . .	846
<b>Chapter 22</b>	<b>The CD-ROM . . . . .</b>	<b>847</b>
22.1	RenderWare 1.4 Directories . . . . .	847
22.2	RenderWare Function Help System . . . . .	850

22.3	The <i>rwView</i> and <i>rfView</i> <i>RenderWare</i> Viewers .....	850
22.4	The Demonstration Source Code Examples .....	852
22.4.1	<i>rwView</i> Clump Viewer .....	852
22.4.2	<i>rfView</i> Book Viewer .....	853
22.4.3	<i>rwRoller</i> Interactive Roller Coaster .....	862
22.4.4	<i>rwMaze</i> Maze .....	867
22.4.5	<i>rwKnight</i> : Two Knights Jousting .....	869
22.4.6	<i>rwVis</i> Surface Visualization .....	871
22.4.7	<i>rwSim</i> Simulate Physics .....	872
22.4.8	<i>rwCyber</i> .....	874
22.5	Conversion Programs .....	876
22.5.1	3D Studio Convert .....	876
22.5.2	DXF Convert .....	878
22.6	The Universal VESA Device Driver (UNIVBE) ....	880
22.7	Illustration Program: <i>PaintShop Pro</i> .....	880
<b>Appendix A</b>	<b>Library Defaults .....</b>	<b>883</b>
A.1	Cameras .....	883
A.2	Clumps .....	883
A.3	Debugging .....	884
A.4	Device Information .....	884
A.5	Errors .....	884
A.6	Library Global Defaults .....	886
A.7	Lights .....	886
A.8	Materials .....	888
A.9	Matrices .....	888
A.10	Polygons .....	888
A.11	Rasters .....	889
A.12	Scenes .....	890
A.13	Splines .....	890
A.14	System Information .....	890
A.15	Textures .....	890
A.16	Texture Dictionaries .....	890
A.17	<i>UserDraw</i> .....	892
A.18	Vertices .....	892
<b>Appendix B</b>	<b>Data Types .....</b>	<b>893</b>
B.1	Opaque Data Types .....	894
B.2	Public Data Types .....	894
B.2.1	Numeric Types .....	895
B.2.2	Structure Types .....	897
B.2.3	Enumerated Types .....	900
B.2.4	Bitfield Types .....	906

<b>Appendix C</b>	<b>Error Codes .....</b>	<b>911</b>
C.1	Error Descriptions .....	911
C.2	Error Identifiers and Codes Sorted Alphabetically ..	917
C.3	Error Identifiers and Codes Sorted Numerically ....	919
<b>Appendix D</b>	<b>Some Useful Tips .....</b>	<b>923</b>
D.1	Responding to User Input .....	923
D.2	Useful Tips in Windows .....	924
D.2.1	Initializing RenderWare in Windows .....	924
D.2.2	Retrieving RenderWare System Information in Windows .....	926
D.2.3	Drag and Drop Files in Windows .....	927
D.2.4	Restarting after Crashing a DLL .....	928
D.3	Reading a Script from the Command Line .....	929
D.4	Converting from 3D Studio .....	930
D.5	Printing from RenderWare .....	930
D.6	Collision Detection .....	931
D.7	Tracking a Backdrop .....	932
D.8	Providing a Character Purpose .....	938
D.8.1	Random Numbers .....	942
D.9	Creating a Drop Shadow .....	943
D.10	Multiple Scenes in rwMaze .....	944
D.10.1	The Maze Unit Data Structure .....	945
D.10.2	The Maze Map .....	945
D.10.3	Scene as a Catch-All .....	948
D.10.4	Neighbors .....	949
D.10.5	Clumps .....	950
D.10.6	Rendering .....	950
D.11	Hardware-Related Issues .....	952
D.11.1	ATI Graphics Cards .....	952
D.11.2	Using 16-bit Hi-Color .....	952
<b>Appendix E</b>	<b>Suggested Reading .....</b>	<b>955</b>
<b>Appendix F</b>	<b>Manufacturers Reference .....</b>	<b>957</b>
<b>Appendix G</b>	<b>RenderWare API Functions by Topic ...</b>	<b>959</b>
<b>Appendix H</b>	<b>Scripting Language Keywords .....</b>	<b>997</b>
<b>Index</b> .....		<b>1015</b>
