<i>Foreword</i>		<i>xi</i>
<i>Acknowledgments</i>		<i>xiii</i>
<i>Acronyms and Abbreviations</i>		<i>xvii</i>
<i>Executive Summary</i>		<i>xix</i>
Chapter 1	Introduction	1
	Drought in Andhra Pradesh	1
	Andhra Pradesh's Drought-Related Initiatives	4
	Objectives of the Study	6
	Broader Context of Adaptation to Climate Variability and Changes	7
	Structure of the Report	8
Chapter 2	Drought and the Andhra Pradesh Economy: Historical Perspective	9
Chapter 3	Methodological Framework	15
	Selection of Districts and Crops for Analysis	15
	Probabilistic Drought Risk Assessment Model	17

Chapter 4	Reducing Vulnerability of Agriculture to Drought in Eight Drought-Prone Districts	31
	Crop Yield Variability: Benchmark Case	31
	Crop Production Losses	35
	Adaptation Strategies at the Farm Level	38
	Impact of Climate Change	43
	Implications for Agriculture Financing and Risk Insurance	46
Chapter 5	Managing Economic Impact of Drought at the State Level	51
	Assessment of Direct and Indirect Loss Potentials: Benchmark Case	51
	Simulating the Impact of Structural Changes in the Andhra Pradesh Economy	56
	Socioeconomic Strategies to Decrease Vulnerability to Drought Risk: Issues and Options	58
Chapter 6	Conclusions and Recommendations	63
	Methodology Development	63
	Findings and Observations from the Quantitative Analysis	65
	Areas for Future Action	69
Annex 1	Programs Addressing Drought in Andhra Pradesh	73
Annex 2	Definitions of Drought	79
Annex 3	Stochastic Crop Production Loss Model	83
Annex 4	WXGEN in EPIC	87
Annex 5	EPIC: Crop Growth Model	91
Annex 6	Planting Area Model	95
Annex 7	Input-Output Analysis for Andhra Pradesh	101
Annex 8	Structure of the Andhra Pradesh Economy (1980-1 to 2002-3)	113
Glossary		121
Bibliography		127
Index		131

Tables

S.1	Simulated Rice Yield Losses in Drought Years (Percent Normal Year)	xxiii
1.1	Government Programs and Initiatives Addressing Drought in Andhra Pradesh: Illustrative List	5
2.1	Sector-Wise VOP, Constant 1998–9 Prices (Rs. Lakhs)	11
3.1	Drought Events and Standard Precipitation Index Values	19
3.2	Simulated Return Periods (in Years) of Droughts in Drought-Prone Districts	19
3.3	Livestock in Andhra Pradesh	20
3.4	Employment Coefficients and Output Multipliers 1998–9	26
4.1	Rice Yields in Normal Years and Rice Yield Losses in Drought Years	35
4.2	Crop Yield Changes Under Climate Change Scenarios: Average Results for Anantapur and Mahbubnagar	45
5.1	Assistance Provided to Drought- Affected States from National Calamity Contingency Fund	53
5.2	Scenarios on the Structure of the Andhra Pradesh Economy, Percent	57
A1.1	Calamity Relief Fund for Andhra Pradesh, 2000–5 (Rs in Lakhs)	74
A3.1	Drought Categories	84
A7.1	Employment Coefficients and Output Multipliers	109
A7.2	Sector-Wise VOP at Current 1998–9 and 2002–3 at Constant 1998–9 Prices	111

Figures

S.1	Probabilistic Drought Risk Assessment Model	xxi
S.2	Conditional Average Loss in GVA Owing to Drought (Percent), by Sector and Drought Category (Minor, Moderate, Severe)	xxv
1.1	Rainfall Levels in the Most Drought-Prone Districts in Andhra Pradesh	3
1.2	Groundwater Assessment for Irrigation in Andhra Pradesh (Million Cubic Meters)	4
2.1	Rainfall and Economic Performance in Andhra Pradesh	10

2.2	2002 Drought Effect on Agriculture	10
2.3	Percentage Changes in Agriculture and LGVA, 1993–4 Constant Prices	12
2.4	Sector-Wise GVA Time Series, 1980–2003, 1993–4 Constant Prices	12
3.1	Seasonal Rainfall Deviation in Eight Selected Districts of Andhra Pradesh	16
3.2	Crop Area in the Eight Selected Districts of Andhra Pradesh	16
3.3	Probabilistic Drought Risk Assessment Model	18
3.4	Estimated and Observed AGVA	28
4.1	Average Normal Yield by Crop (Metric Tons per Hectare)	33
4.2	Impact of Severe Drought on Yield (Percent Decrease With Respect to Normal Yield)	34
4.3	Crop Production Losses Caused by Drought in the Eight Districts: EPC	36
4.4	Average Annual Loss of Value of Production Output, by District	36
4.5	Reducing Cultivable Rice Area in Anantapur: Value of Production LEC	40
4.6	Reducing Cultivable Rice Area in Mahbubnagar: Value of Production LEC	41
5.1	Average Sectoral GVA For Normal Years	52
5.2	Average Annual Loss as Percent of GVA Owing to Droughts	53
5.3	Conditional Average Loss in GVA, by Sector and Drought Category	54
5.4	Economic Losses, in Sectoral GVA, Caused by Droughts, Andhra Pradesh: EPC	55
5.5	Loss in Total GVA Under Different Economic Scenarios, by Drought Category	57
5.6	Losses in Total GVA Caused by Droughts Under Different Economic Scenarios: EPC	58
A2.1	Definitions of Droughts	80
A3.1	Validation of SPI for Anantapur	84
A6.1	Log of Lag Rain Versus Log of Lag Gross Rain-Fed Areas for Anantapur	97
A6.2	Previous Year June Rain Deviations Versus Current Year Gross Rain-Fed Area Deviation for Anantapur	97

A6.3	Log Transformed Current Year Rain Versus Gross Rain-Fed Area for Anantapur	98
A6.4	Gross Cropped Area and Monsoon Strike Date Variation Over the Years for Anantapur	98
A6.5	Change in Gross Irrigated Area Versus Change in Annual Rain for Anantapur	99
A6.6	Change in Gross Cropped Area Versus Change in Annual Rain for Anantapur	99
A6.7	Change in Gross Rain-Fed Area Versus Change in Annual Rain for Anantapur	100
A6.8	Structure of the Planting Area Model	100
A8.1	Agriculture GVA, 1993–4 to 2002–3, Estimated and Observed	116
A8.2	Livestock GVA, 1993–4 to 2002–3, Estimated and Observed	117
A8.3	Secondary Sector GVA, 1993–4 to 2002–3, Estimated and Observed	117
A8.4	Tertiary Sector GVA, 1993–4 to 2002–3, Estimated and Observed	117

Boxes

3.1	Risk Metrics	24
4.1	Coping With Drought: Findings From Mahbubnagar	37
4.2	Reducing Cultivable Rice Area: Assumptions	39
4.3	Farm-Level Adaptation Strategies: Expert Recommendations Regarding Cropping Patterns	42
4.4	Climate Change Scenarios	45
4.5	Weather Insurance in India: Advantages and Caveats	47
5.1	Financing Rapid Onset Natural Disaster Losses in India	56
