

INDICE

Introduction and acknowledgement	1
1. Executive summary	
Infrastructure reform	3
Cross-cutting themes	4
Sectorial overview	
Electricity	5
Telecommunications	7
Transportation	8
Water and sanitation	9
Solid waste	10
Private participation opportunities	11
Action plan	
PPI facilitation unit	12
Specific priorities for action by sector	
Cross cutting actions	13
2. Cross-cutting themes, sector comparisons, and an action plan to frame PPI in Lesotho	14
Macroeconomic policies and economic development strategy	
Political environment	
Capacity for public sector financing of infrastructure	15
Business environment and investment regime	
Underdeveloped status of basic infrastructure	17
Human capital deficiencies	
Administrative and legislative barriers to business	
Reform initiatives and privatization policies	18
Competitive and transparent procurement procedure for PPI	19
Financing environment for PPI	20
Environment, land use, urban planning, and biodiversity issues	21
Capability assessment of local contractors	22
Comparison infrastructure of local contractors	
Comparison of infrastructure coverage in Lesotho and the region	23
Electricity sector	
Water sector	
Telecommunication sector	24
Transportation sector	
Sector reform status and cross-cutting challenges	25
Sector interaction, priorities for expansion, and the role of the GOL in promoting a pro-poor growth strategy	29
The promise of PPI	32
The responsibility and potential consequences of PPI	
A proposed strategy for PPI in Lesotho	34
An action plan to realize the potential of PPI in Lethoso	35
Tier 1: create PPI oversight capacity within the public sector	
Tier 2: priority actions by infrastructure sector	36
Tier 3: cross-cutting enabling measures	37
3. Electricity	
Institutional and market structure	40

An institutional barrier? Sector policies and regulation The new regulatory commission	41
Sector performance	42
Supply situation	43
Demand side The issue of electricity tariff	45
Rural electrification	47
Role of output-based aid in rural areas	48
Key initiatives LEC privatization Service territory for the LEC Privatization of muela? Issues and recommendation	49
LEC concession to a private sector firm and Basotho participation in the electricity sector Case for a multisector regulatory agency Time for multi-modal rural utility? Opportunities for PPI	50
A visio51n for the future?	51
4. Telecommunications	
Institutional and market structure Transition from a public monopoly to comparative market structure	52
Sector policies Sector performance Lesothos teledensity improvement under the competitive landscape	54
Comparison of Lesothos achievement to regional benchmarks and trends	55
Fixed-line services	56
Wireless services Internet services	57
Tariffs and affordability	58
Sector regulation Exclusivity regulation Granting of licenses and regulation of Fees	59
Universal service and coverage regulation	60
