Introduction	1
1. Stylized Facts	7
Trend and Cyclical Components of GDP Growth	14
Growth Accounting	19
Growth, Investment, and Saving	31
Summary	35
2. Determinants of Growth	37
Setup	37
Growth Determinants	38
Transitional convergence	38
Cyclical reversion	38
Structural policies and institutions	39
Stabilization policies	42
External conditions	43
Sample and Descriptive Statistics	43
Estimation Methodology	48
Results	51
Main results	51
Comparison with results under other estimation methods and time horizons	57
Growth Explanations	58
Explaining changes in growth rates over time	58
Explaining differences in growth rates across countries	72
3. Growth in the Future	77
Future Growth under Realistic Expectations	77
Projections for growth determinants	78
Forecasts for the average country in Latin America and the Caribbean	80
Country forecasts	81
Future Growth under Sharp Reform	81
4. Conclusions	91

APPENDIXES

A. Solow Growth Accounting 97
 B. Definitions and Sources of Variables Used in Regression Analysis 119
 C. Sample of Countries 123
 D. Explaining Changes in Growth by Country 127

Bibliography 149

LIST OF BOXES

1. Literature Review on Economic Growth in Latin America and the Caribbean . . . 3

LIST OF TABLES

1. Growth Rates of GDP Per Capita by Region, 1961–2000 8
 2. Growth Rates of GDP Per Capita by Country, 1961–2000 10
 3. Growth Rates of Trend GDP Per Capita by Region, 1961–2000. 14
 4. Growth Rates of Trend GDP Per Capita by Country, 1961–2000 16
 5. Volatility of GDP Per Capita by Region, 1961–2000 17
 6. Volatility of GDP Per Capita by Country, 1961–2000 18
 7. Simple Growth Accounting, 1961–2000. 25
 8. Growth Accounting Adjusted for Human Capital, 1961–2000 27
 9. Growth Accounting Adjusted for Human Capital and
 Input Utilization, 1971–2000. 29
 10. Saving, Growth, and Investment: Bivariate Causality Analysis. 33
 11. Descriptive Statistics of Economic Growth and Its Determinants:
 Univariate Statistics 45
 12. Descriptive Statistics of Economic Growth and Its Determinants:
 Bivariate Correlations 46
 13. Economic Growth Regressions: Various Estimation Methods. 52
 14. Economic Growth Regressions: Various Time Horizons 54
 15. Explaining Changes in Growth between Decades 60
 16. Explaining Changes in Growth between Five-Year Periods 62
 17. Explaining Differences in Growth Rates with the Best-Performing
 Country in the 1990s 74
 18. Procedures for Computing Projections under a Scenario of
 Continuing Trends 79
 19. Growth Forecasts under a Scenario of Continuous Trends 82
 20. Growth Forecasts under a Scenario of Sharp Progress to the
 Top 25 Percent of Latin American and the Caribbean 86
 21. Growth Forecasts under a Scenario of Sharp Progress to the
 Top 25 Percent of the World 88

LIST OF FIGURES

1. Growth Rates of GDP Per Capita by Region, 1961–2000	8
2. Growth Rates of GDP per Capita, Selected Latin American Countries, 1961–2000	9
3. Growth Rates of GDP Per Capita by Country, 1961–2000	10
4. Growth Rates of Trend GDP Per Capita by Region, 1961–2000	14
5. Volatility of GDP Per Capita by Region, 1961–2000	17
6. Simple Growth Decomposition, Median Country by Decade	23
7. Growth Decomposition Adjusted for Human Capital, Median Country by Decade	23
8. Growth Decomposition Adjusted for Human Capital and Input Utilization, Median Country by Decade	24
9. Explaining Changes in Growth between the 1980s and 1990s, Selected Latin American Countries	66
10. Explaining Changes in Growth between the 1970s and 1980s, Selected Latin American Countries	67
11. Changes in the Growth Rate due to Structural Reforms and Stabilization Policies between the 1980s and 1990s	68
12. Changes in the Growth Rate due to Structural Reforms and Stabilization Policies between the 1970s and 1980s	71
13. Projected Change in the Growth Rate due to Advances in Structural Reform, 2000–10 versus 1991–99	84
14. Projected Change in the Growth Rate due to Advances in Stabilization Policies, 2000–10 versus 1991–99	84
15. Growth Forecasts for South America under a Scenario of a Continuous Trend	85
16. Growth Forecasts for Central America and the Caribbean under a Scenario of a Continuous Trend	85
