# Contents

## 0 Numerical Computing and Computers 1

Contents of This Chapter 1
0.1 Introduction 2
0.2 Using a Computer to Do Numerical Analysis 3
0.3 A Typical Example 5
0.4 Implementing Bisection 8
0.5 Computer Arithmetic and Errors 11
0.6 Theoretical Matters 20
0.7 Parallel Processing 22
Chapter Summary 26
Exercises 26

## 1 Solving Nonlinear Equations 29

Contents of This Chapter 29
1.1 Improved Ideal Gas Laws 31
1.2 Interval Halving (Bisection) Revisited 33
1.3 Linear Interpolation Methods 35
1.4 Newton's Method 39
1.5 Muller's Method 43
1.6 Fixed-Point Iteration: $x = g(x)$ Method 46
1.7 Newton's Method for Polynomials 52
1.8 Bairstow's Method for Quadratic Factors 58
1.9 Other Methods for Polynomials 61
1.10 Multiple Roots 68

**1.11** Theoretical Matters 72
**1.12** Using DERIVE 78
Chapter Summary 82
Computer Programs 83
Exercises 94

## 2 Solving Sets of Equations 102

Contents of This Chapter 102
**2.1** Computing the Forces in a Planar Truss 104
**2.2** Matrix Notation 105
**2.3** The Elimination Method 113
**2.4** Gauss and Gauss–Jordan Methods 116
**2.5** Other Direct Methods 126
**2.6** Pathology in Linear Systems—Singular Matrices 136
**2.7** Determinants and Matrix Inversion 140
**2.8** Norms 144
**2.9** Condition Numbers and Errors in Solutions 147
**2.10** Iterative Methods 155
**2.11** The Relaxation Method 159
**2.12** Systems of Nonlinear Equations 164
**2.13** Theoretical Matters 169
**2.14** Using MAPLE 173
**2.15** Parallel Processing 176
Chapter Summary 182
Computer Programs 183
Exercises 200

## 3 Interpolation and Curve Fitting 210

Contents of This Chapter 210
**3.1** An Interpolation Problem 212
**3.2** Lagrangian Polynomials 213
**3.3** Divided Differences 219

3.4 Evenly Spaced Data 226
3.5 Interpolating with a Cubic Spline 233
3.6 Bezier Curves and B-Spline Curves 244
3.7 Polynomial Approximation of Surfaces 253
3.8 Least-Squares Approximations 260
3.9 Theoretical Matters 271
3.10 Using *Mathematica* 278
Chapter Summary 286
Computer Programs 287
Exercises 300

## 4 Numerical Differentiation and Numerical Integration 308

Contents of This Chapter 308
4.1 Getting Derivatives and Integrals Numerically 310
4.2 Derivatives from Difference Tables 311
4.3 Higher-Order Derivatives 318
4.4 Extrapolation Techniques 323
4.5 Newton–Cotes Integration Formulas 328
4.6 The Trapezoidal Rule—A Composite Formula 330
4.7 Simpson's Rules 337
4.8 Other Ways to Derive Integration Formulas 341
4.9 Gaussian Quadrature 343
4.10 Adaptive Integration 348
4.11 Multiple Integrals 352
4.12 Multiple Integration with Variable Limits 357
4.13 Applications of Cubic Splines 360
4.14 Theoretical Matters 364
4.15 Using *Mathematica* 372
4.16 Parallel Processing 376
Chapter Summary 377
Computer Programs 377
Exercises 384

## 5 Numerical Solution of Ordinary Differential Equations 393

Contents of This Chapter 393
5.1 The Spring–Mass Problem—A Variation 396
5.2 The Taylor-Series Method 398
5.3 Euler and Modified Euler Methods 400
5.4 Runge–Kutta Methods 403
5.5 Multistep Methods 409
5.6 Milne's Method 412
5.7 The Adams–Moulton Method 416
5.8 Multivalued Methods 421
5.9 Convergence Criteria 426
5.10 Errors and Error Propagation 429
5.11 Systems of Equations and Higher-Order Equations 432
5.12 Comparison of Methods/Stiff Equations 437
5.13 Using MAPLE 441
5.14 Theoretical Matters 444
Chapter Summary 446
Computer Programs 446
Exercises 455

## 6 Boundary-Value Problems and Characteristic-Value Problems 467

Contents of This Chapter 467
6.1 The "Shooting Method" 469
6.2 Solution Through a Set of Equations 473
6.3 Derivative Boundary Conditions 479
6.4 Rayleigh–Ritz, Collocation, and Galerkin Methods 482
6.5 The Finite-Element Method 490
6.6 Characteristic-Value Problems 497
6.7 Eigenvalues by Iteration—The Power Method 500
6.8 Eigenvalues by the *QR* Method 508
6.9 Applications of Eigenvalues 513
6.10 Theoretical Matters 516
6.11 Using DERIVE 520

Chapter Summary 523
Computer Programs 524
Exercises 534

**7 Numerical Solution of Partial-Differential Equations 542**

Contents of This Chapter 542
7.1 Equilibrium Temperatures in a Heated Slab 544
7.2 Equation for Steady-State Heat Flow 546
7.3 Representation as a Difference Equation 549
7.4 Laplace's Equation on a Rectangular Region 552
7.5 Iterative Methods for Laplace's Equation 557
7.6 The Poisson Equation 562
7.7 Derivative Boundary Conditions 564
7.8 Irregular Regions and Nonrectangular Grids 567
7.9 The Laplacian Operator in Three Dimensions 575
7.10 Matrix Patterns, Sparseness, and the A.D.I. Method 577
7.11 The Finite-Element Method 579
7.12 Theoretical Matters 594
7.13 Using *Mathematica* 599
Chapter Summary 600
Computer Programs 601
Exercises 611

**8 Parabolic Partial-Differential Equations 616**

Contents of This Chapter 616
8.1 Equation for Time-Dependent Heat Flow 618
8.2 The Explicit Method 620
8.3 The Crank–Nicolson Method 628
8.4 A Generalization—The Theta Method 630
8.5 Derivative Boundary Conditions 632
8.6 Parabolic Equations in Two or Three Dimensions 636
8.7 Finite Elements for Heat Flow 642
8.8 Theoretical Matters 644
Chapter Summary 650

Computer Programs 650
Exercises 658

## 9 Hyperbolic Partial-Differential Equations 663

Contents of This Chapter 663
9.1 The Wave Equation 664
9.2 Solving the Wave Equation by Finite Differences 666
9.3 Comparison to the d'Alembert Solution 668
9.4 Method of Characteristics 672
9.5 The Wave Equation in Two Space Dimensions 682
9.6 Finite Elements and the Wave Equation 685
9.7 Theoretical Matters 687
Chapter Summary 688
Computer Program 689
Exercises 692

## 10 Approximation of Functions 696

Contents of This Chapter 696
10.1 Chebyshev Polynomials 697
10.2 Economized Power Series 700
10.3 Approximation with Rational Functions 705
10.4 Fourier Series 713
10.5 Getting Fourier Coefficients Numerically and the Fast Fourier Transform 723
10.6 Theoretical Matters 734
10.7 Using DERIVE 736
Chapter Summary 738
Computer Programs 738
Exercises 745

## Appendixes

A Some Basic Information from Calculus A-1
B Deriving Formulas by the Method of Undetermined Coefficients A-5
C Software Libraries A-18
References A-20
Answers to Selected Exercises A-24
Index I-1
