
CONTENTS

Preface xv

Introduction 1

A View of Earth 2

Hydrosphere • Atmosphere • Biosphere • Lithosphere

The Earth Sciences 5

Earth Science and the Environment 10

Resources • Population • Environmental Problems

The Nature of Scientific Inquiry 12

Collecting Facts • Hypothesis • Theory • Scientific Law

Studying Earth Science 13

■ Box 1.1 Earth as a System 7

■ Box 1.2 Earth's Place in the Cosmos 9

Part One

The Solid Earth

1 MINERALS: BUILDING BLOCKS OF ROCKS 17

Minerals Versus Rocks 19

Composition and Structure of Minerals 19

How Atoms Are Constructed • How Atoms Bond Together

Properties of Minerals 21

Crystal Form • Luster • Color • Streak • Hardness •
Cleavage • Fracture • Specific Gravity • Other Properties
of Minerals

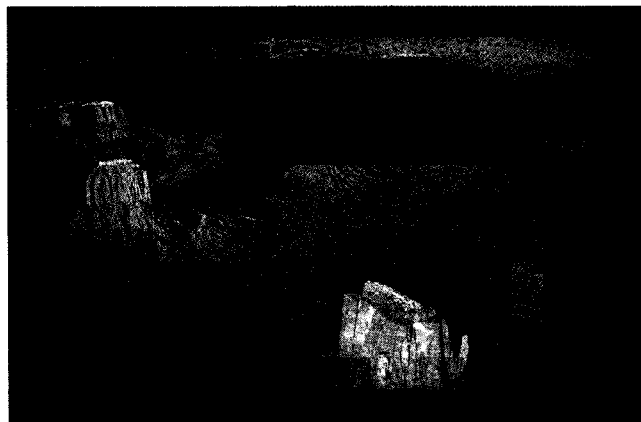

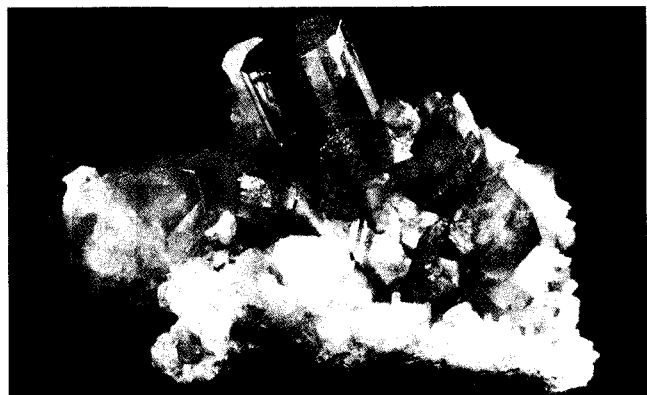

Mineral Groups 24

Rock-Forming Silicates • Important Nonsilicate Minerals

Mineral Resources 27

■ Box 1.1 Carrot, Karat, or Carat 25

■ Box 1.2 Gemstones 29

2 ROCKS: MATERIALS OF THE LITHOSPHERE 33

Earth as a System: The Rock Cycle 34

The Basic Cycle • Alternative Paths

Igneous Rocks: "Formed By Fire" 35

Magma Crystallizes to Form Igneous Rocks • Classifying
Igneous Rocks • Naming Igneous Rocks

**Sedimentary Rocks: Compacted and Cemented
Sediment** 41

Classifying Sedimentary Rocks • Lithification
of Sediment • Features of Sedimentary Rocks

Metamorphic Rocks: Changed in Form 47

Three Metamorphic Agents • Metamorphism Changes
Texture • Classifying Metamorphic Rocks

Resources from Rocks and Minerals 52

Metallic Mineral Resources • Nonmetallic Mineral
Resources

■ Box 2.1 Asbestos: What Are the Risks? 53

3 WEATHERING, SOIL, AND MASS WASTING 57

Earth's External Processes 58

Weathering 58

Mechanical Weathering 58

Frost Wedging • Unloading • Thermal Expansion •
Biological Activity

Chemical Weathering 61

Water and Carbonic Acid • How Granite Weathers •
Weathering of Silicate Minerals • Spheroidal Weathering

Rates of Weathering 63

Mineral Makeup • Climate

Soil 64

An Interface in the Earth System • What Is Soil? • Soil Texture and Structure

Controls of Soil Formation 69

Parent Material • Time • Climate • Plants and Animals • Slope

The Soil Profile 71

Soil Types 72

Pedalfers • Pedocals • Laterites

Soil Erosion 73

How Soil Is Eroded • Rates of Erosion • Sedimentation and Chemical Pollution

Weathering Creates Ore Deposits 75

Bauxite • Other Deposits

Mass Wasting 76

Mass Wasting and Landform Development 77

Controls and Triggers of Mass Wasting 77

The Role of Water • Oversteepened Slopes • Vegetation • Earthquakes as Triggers

Falls, Slides, and Flows 79

Slump 79

Rockslide 80

Mudflow 80

Mudflows in Semiarid Regions • Lahars

Earthflow 82

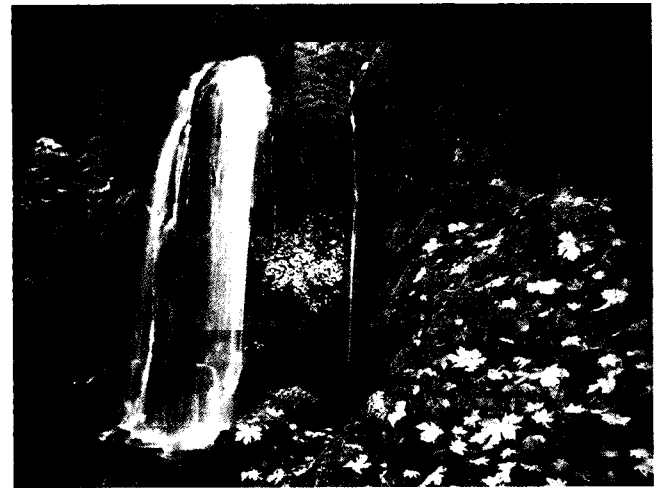

Slow Movements 83

Creep • Solifluction

■ Box 3.1 Acid Precipitation: A Human Impact on the Earth System 66

■ Box 3.2 Laterites and the Clearing of the Rain Forest 74

■ Box 3.3 The Gros Ventre Slide: A Classic Case Study 81

4 RUNNING WATER AND GROUNDWATER

87

Earth as a System: The Hydrologic Cycle 88

Running Water 89

Streamflow • Changes from Upstream to Downstream

Base Level 92

Work of Streams 93

Erosion • Transportation • Deposition

Stream Valleys 97

Narrow Valleys • Wide Valleys

Drainage Basins and Patterns 100

Stages of Valley Development 102

Water Beneath the Surface 105

The Importance of Groundwater • Groundwater's Geological Roles

Distribution and Movement of Groundwater 106

Distribution • Movement

Springs 109

Hot Springs • Geysers

Wells 109

Artesian Wells 111

Environmental Problems of Groundwater 113

Treating Groundwater as a Nonrenewable Resource • Land Subsidence Caused by Groundwater Withdrawal • Groundwater Contamination

The Geologic Work of Groundwater 116

Caverns • Karst Topography

■ Box 4.1 The Effect of Urbanization on Discharge 91

■ Box 4.2 The Midwest Floods of 1993 99

■ Box 4.3 Dowsing for Water 106

■ Box 4.4 Geothermal Energy: An Alternative 110

5 GLACIERS, DESERTS, AND WIND

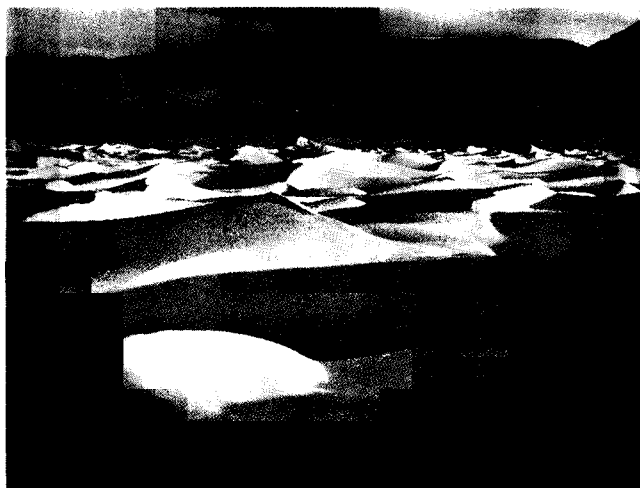

121

- Glaciers: A Part of the Hydrologic Cycle** 122
How Glaciers Move 122
Glacial Erosion 125
 How Glaciers Erode • Features of Valley Glaciers
Glacial Deposits 129
 Types of Glacial Drift • Moraines, Outwash Plains,
 and Kettles • Drumlins, Eskers, and Kames
Glaciers of the Past 134
Some Indirect Effects of Ice Age Glaciers 136
Causes of Glaciation 137
 Plate Tectonics • Variations in Earth's Orbit
Deserts 139
Geologic Processes in Arid Climates 141
 Weathering • The Role of Water
**Basin and Range: The Evolution of a Desert
 Landscape** 143
Wind Erosion 144
Wind Deposits 146
 Loess • Sand Dunes • Types of Sand Dunes
 ■ Box 5.1 Do Glaciers Move? An Application
 of the Scientific Method 125
 ■ Box 5.2 What If the Ice Melted? 136
 ■ Box 5.3 Common Misconceptions About Deserts 140
 ■ Box 5.4 Dust Bowl: Soil Erosion in the Great Plains 145

6 EARTHQUAKES AND EARTH'S INTERIOR

153

- What Is an Earthquake?** 155
 Earthquakes and Faults • Elastic Rebound • Foreshocks
 and Aftershocks • Tectonic Forces and Earthquakes
Earthquake Waves 159
Finding Earthquake Epicenters 162
Earthquake Intensity and Magnitude 162
Destruction from Earthquakes 164
 Destruction from Seismic Vibrations • Tsunami •
 Landslides and Ground Subsidence • Fire
Can Earthquakes Be Predicted? 171
 Short-Range Predictions • Long-Range Predictions
Earthquakes Reveal Earth's Interior 173
 Discovering Earth's Structure • Discovering Earth's
 Composition
 ■ Box 6.1 Damaging Earthquakes East of the Rockies 156
 ■ Box 6.2 Tsunami Warning System 169

7 PLATE TECTONICS

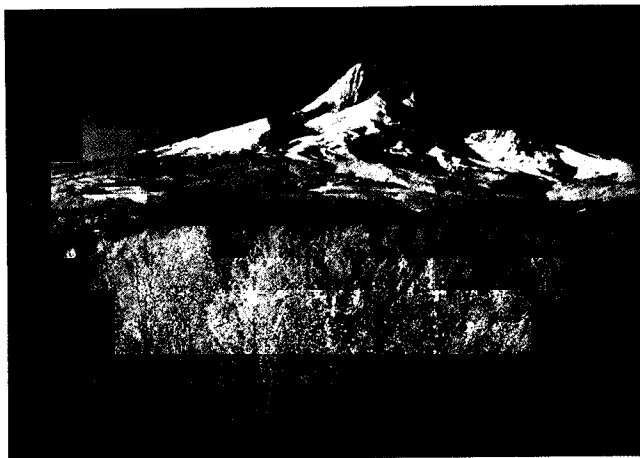

179

- Continental Drift: An Idea Before Its Time** 181
 Evidence: The Continental Jigsaw Puzzle • Evidence:
 Fossils Match Across the Seas • Evidence: Rock Types
 and Structures Match • Evidence: Ancient Climates
The Great Debate 184
Plate Tectonics: A Modern Version of an Old Idea 185
Plate Boundaries 188
 Divergent Boundaries • Convergent Boundaries •
 Transform Boundaries
Testing the Plate Tectonics Model 196
 Evidence: Paleomagnetism • Evidence: Earthquake
 Patterns • Evidence: Ocean Drilling • Evidence: Hot Spots
Pangaea: Before and After 202
 Breakup of Pangaea • Before Pangaea
The Driving Mechanism 206
 Convection Current Hypothesis • Slab-Push
 and Slab-Pull Hypotheses • Hot Plumes Hypothesis
 ■ Box 7.1 A New Test for Plate Tectonics 196
 ■ Box 7.2 Plate Tectonics into the Future 206
 ■ Box 7.3 The Earth System: Plate Tectonics
 and the Rock Cycle 208

8 IGNEOUS ACTIVITY

211

- The Nature of Volcanic Eruptions** 215
 Factors Affecting Viscosity • Importance of Dissolved
 Gases in Magma
What Is Extruded During Eruptions? 216
 Lava Flows • Gases • Pyroclastics

Volcano Types 218

Shield Volcanoes • Cinder Cones • Composite Cones

Other Volcanic Landforms' 225

Calderas • Volcanic Necks • Fissure Eruptions and Lava Plateaus • Pyroclastic Flows

Intrusive Igneous Activity 228

Dikes and Sills • Laccoliths and Batholiths

Igneous Activity and Plate Tectonics 230

Origin of Magma • Distribution of Igneous Activity

■ Box 8.1 The Year Without a Summer 218

■ Box 8.2 Volcano Sizes 220

■ Box 8.3 Volcanic Activity and Climate 234

9 MOUNTAIN BUILDING 237

Crustal Uplift 239

Isostasy • Isostatic Adjustment

Rock Deformation 241

Folds • Faults and Joints

Mountain Types 247

Fault-Block Mountains • Folded Mountains • Upwarped Mountains

Mountain Building 252

Mountain Building at Convergent Boundaries • Mountain Building and Continental Accretion

■ Box 9.1 The San Andreas Fault System 246

■ Box 9.2 Oil Traps 249

■ Box 9.3 The Rocky Mountains 253

10 GEOLOGIC TIME 261

A Short History of Geology 263

Birth of Modern Geology • Geology Today

Relative Dating—Key Principles 264

Law of Superposition • Principle of Original Horizontality • Principle of Cross-Cutting Relationships • Inclusions • Unconformities • Using Relative Dating Principles

Correlation of Rock Layers 267

Fossils: Evidence of Past Life 268

Types of Fossils • Conditions Favoring Preservation • Fossils and Correlation

Absolute Dating with Radioactivity 273

Radioactivity • Half-Life • Radiometric Dating • Carbon-14 Dating • Importance of Radiometric Dating

The Geologic Time Scale 277

Difficulties in Dating the Geologic Time Scale 281

■ Box 10.1 Radon 278

11 EARTH HISTORY: A BRIEF SUMMARY 285

Origin of Earth 286

Earth's Atmosphere Evolves 288

Precambrian Time: Vast and Enigmatic 289

Precambrian Rocks • Precambrian Fossils

Paleozoic Era: Life Explodes 291

Early Paleozoic History • Early Paleozoic Life • Late Paleozoic History • Late Paleozoic Life

Mesozoic Era: Age of the Dinosaurs 296

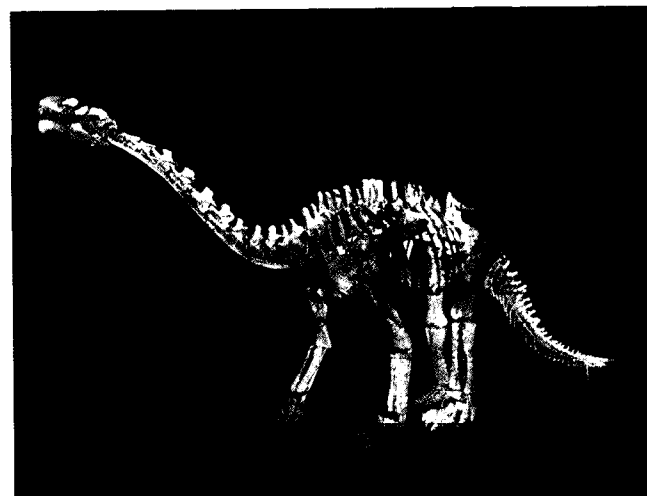

Mesozoic History • Mesozoic Life

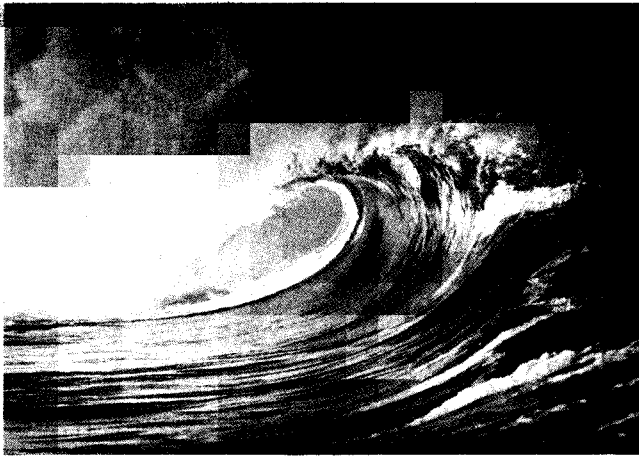

Cenozoic Era: Age of Mammals 300

Cenozoic North America • Cenozoic Life

■ Box 11.1 The Great Paleozoic Extinction 298

■ Box 11.2 Farewell to the Dinosaurs 304

Part Two The Oceans

12 OCEAN WATERS AND THE OCEAN FLOOR 313

- The Vast World Ocean 314
- Composition of Seawater 315
- Resources from Seawater 317
- The Ocean's Layered Structure 318
- Earth Beneath the Sea 318
- Continental Margins 322
 - Continental Shelf • Continental Slope and Rise
- Submarine Canyons and Turbidity Currents 323
- The Ocean Basin Floor 324
 - Deep-Ocean Trenches • Abyssal Plains • Seamounts
- Mid-Ocean Ridges 326
- Coral Reefs and Atolls 327
- Seafloor Sediments 328
 - Terrigenous Sediment • Biogenous Sediment • Hydrogenous Sediment
- Box 12.1 Evidence for the Existence of Turbidity Currents 325
- Box 12.2 Seafloor Sediments and Climatic Change 329

13 THE RESTLESS OCEAN 333

- Surface Currents 334
 - Ocean Circulation Patterns • Ocean Currents and Upwelling • The Importance of Ocean Currents
- Deep-Ocean Circulation 337

- Tides 338
 - Causes of Tides • Types of Tides • Tidal Currents
- Waves Modify the Shoreline 341
 - Characteristics of Waves • Types of Waves
- Wave Erosion 345
- Wave Refraction 345
- Moving Sand Along the Beach 346
- Shoreline Features 346
 - Wave-Cut Cliffs and Platforms • Arches, Stacks, Spits, and Bars • Barrier Islands • The Evolving Shore
- Shoreline Erosion Problems 349
 - Groins • Breakwaters and Seawalls • Beach Nourishment • Contrasting the Atlantic and Pacific Coasts
- Emergent and Submergent Coasts 356
 - Box 13.1 Tidal Power 344
 - Box 13.2 Is Global Warming Causing Sea Level to Rise? 356

Part Three The Atmosphere

14 COMPOSITION, STRUCTURE, AND TEMPERATURE 361

- Weather and Climate 362
- Composition of the Atmosphere 363
 - Major Components • Variable Components
- Height and Structure of the Atmosphere 365
 - Pressure Changes • Temperature Changes
- Earth-Sun Relationships 369
 - Earth's Rotation and Revolution • Seasons

- Mechanisms of Heat Transfer 375**
 - Conduction and Convection • Radiation
- Paths Taken by Incoming Solar Radiation 377**
 - Scattering • Albedo • Absorption
- Heating the Atmosphere: The Greenhouse Effect 379**
- Temperature Measurement and Data 379**
- Controls of Temperature 380**
 - Land and Water • Altitude • Geographic Position • Cloud Cover and Albedo
- World Distribution of Temperature 383**
 - Box 14.1 Altering the Atmosphere's Composition: Sources and Types of Air Pollution 364
 - Box 14.2 The Ozone Problem 366
 - Box 14.3 Solar Energy 374

15

MOISTURE

387

- Changes of State 388**
 - Importance of Latent Heat
- Humidity: Water Vapor in the Air 389**
 - Specific Humidity • Relative Humidity • Dew Point • Measuring Humidity
- The Basis of Cloud Formation: Adiabatic Cooling 395**
 - Fog and Dew versus Cloud Formation • Adiabatic Temperature Change
- Stability of Air 396**
 - Determining Stability • Stability and Daily Weather
- Processes That Lift Air 402**
 - Orographic Lifting • Frontal Wedging • Convergence
- Condensation and Cloud Formation 404**
 - Types of Clouds
- Fog 408**
 - Fogs Caused by Cooling • Evaporation Fogs

- How Precipitation Forms 410**
 - Bergeron Process • Collision-Coalescence Process
- Forms of Precipitation 412**
 - Rain and Drizzle • Snow • Sleet and Glaze • Hail • Rime
- Measuring Precipitation 414**
 - Box 15.1 Dry Air at 100 Percent Relative Humidity? 393
 - Box 15.2 Atmospheric Stability Influences Air Pollution 399
 - Box 15.3 Precipitation Probability Forecasts 417

16

AIR PRESSURE AND WIND

419

- Measuring Air Pressure 420**
- Factors Affecting Wind 421**
 - Pressure Gradient Force • Coriolis Effect • Friction with Earth's Surface
- Cyclones and Anticyclones 424**
 - Cyclonic and Anticyclonic Winds • Weather Generalizations About Highs and Lows
- General Circulation of the Atmosphere 428**
 - Circulation on a Nonrotating Earth • Idealized Global Circulation • Influence of Continents
- Circulation in the Mid-Latitudes 431**
- Local Winds 431**
 - Sea and Land Breezes • Valley and Mountain Breezes • Chinook and Santa Ana Winds
- How Wind Is Measured 432**
- Global Distribution of Precipitation 433**
 - Box 16.1 Scales of Atmospheric Motion 425
 - Box 16.2 Wind Energy: An Alternative with Potential 435

17 WEATHER PATTERNS AND SEVERE STORMS 437

Air Masses 438

Source Regions • Weather Associated with Air Masses

Fronts 441

Warm Fronts • Cold Fronts • Stationary Fronts
and Occluded Fronts

The Middle-Latitude Cyclone 444

Life Cycle • Idealized Weather • The Role of Airflow Aloft

What's in a Name? 448

Thunderstorms 448

Thunderstorm Occurrence • Stages of Thunderstorm
Development

Tornadoes 452

Tornado Occurrence and Development • Tornado
Destruction • Tornado Warnings

Hurricanes 455

Profile of a Hurricane • Hurricane Formation and Decay •
Hurricane Destruction

■ Box 17.1 Lake-Effect Snow 440

■ Box 17.2 The Deadliest Weather 450

■ Box 17.3 Hurricane Andrew 458

18 CLIMATE 463

The Climate System 464

World Climates 465

Climate Classification 465

Humid Tropical (A) Climates 467

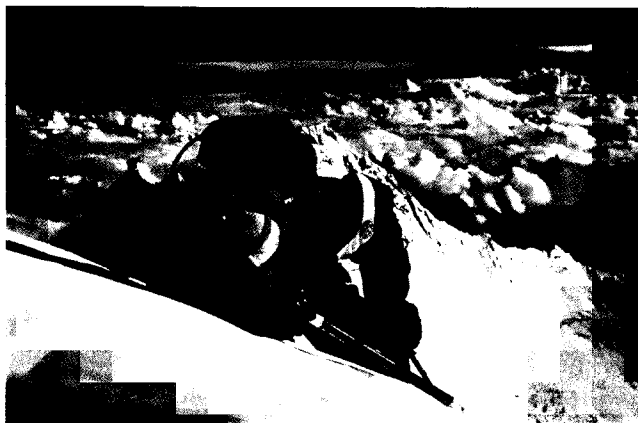

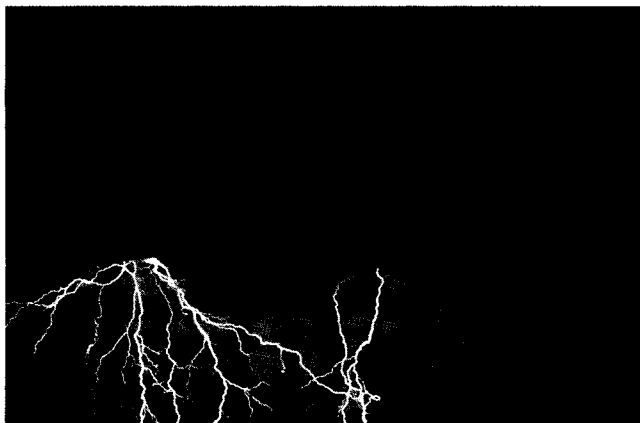

The Wet Tropics • Tropical Wet and Dry

Dry (B) Climates 471

Low-Latitude Deserts and Steppes • Middle-Latitude
Deserts and Steppes

Humid Middle-Latitude Climates with Mild Winters

(C Climates) 473

Humid Subtropics • Marine West Coast • Dry-Summer
Subtropics

Humid Middle-Latitude Climates with Severe Winters (D Climates) 475

Humid Continental • Subarctic

Polar (E) Climates 477

Highland Climates 478

Human Impact on Global Climate 478

Carbon Dioxide, Trace Gases, and Global Warming •
Some Possible Consequences of Greenhouse Warming

■ Box 18.1 The World's Hottest and Coldest Places 466

■ Box 18.2 Precipitation Record and Mountainous Terrain 474

■ Box 18.3 Climate Change in Cities 480

■ Box 18.4 Earth as a System: Climate Feedback Mechanisms 483

Part Four Astronomy

19 EARTH'S PLACE IN THE UNIVERSE 489

Ancient Astronomy 490

Early Greeks • The Ptolemaic System

The Birth of Modern Astronomy 493

Nicolaus Copernicus • Tycho Brahe • Johannes Kepler •
Galileo Galilei • Sir Isaac Newton

Constellations 502

Positions in the Sky 503

Motions of Earth 505

Rotation • Revolution • Precession

Motions of the Earth-Moon System 508

Phases of the Moon • Lunar Motions • Eclipses

■ Box 19.1 Proof of Earth's Rotation 492

■ Box 19.2 Astrology 503

■ Box 19.3 Calendars 508

20 TOURING OUR SOLAR SYSTEM 515

- The Planets: An Overview** 516
- Evolution of the Planets** 518
- Earth's Moon** 519
 - The Lunar Surface • Lunar History
- The Planets: A Brief Tour** 522
 - Mercury: The Innermost Planet • Venus: The Veiled Planet • Mars: The Red Planet • Jupiter: Lord of the Heavens • Saturn: The Elegant Planet • Uranus and Neptune: The Twins • Pluto: Planet X
- Minor Members of the Solar System** 537
 - Asteroids • Comets • Meteoroids
- Box 20.1 Venus and the Runaway Greenhouse Effect: A Lesson for Planet Earth? 527
- Box 20.2 The Search for Extraterrestrial Intelligence 528
- Box 20.3 Discovery of Planet X 538
- Box 20.4 Is Earth on a Collision Course? 539
- Box 20.5 Comet Shoemaker-Levy Impacts Jupiter 540

21 LIGHT, ASTRONOMICAL OBSERVATIONS, AND THE SUN 545

- The Study of Light** 546
 - Nature of Light • Spectroscopy • The Doppler Effect
- Astronomical Tools** 549
 - Refracting Telescopes • Reflecting Telescopes • Properties of Optical Telescopes • Detecting Invisible Radiation
- The Sun** 556
 - Structure of the Sun • The Active Sun • The Solar Interior
- Box 21.1 The Largest Telescopes 553
- Box 21.2 Variable Sun and Climatic Change 557

22 BEYOND OUR SOLAR SYSTEM 567

- Properties of Stars** 568
 - Measuring Distances to the Stars • Stellar Brightness • Stellar Color and Temperatures • Binary Stars and Stellar Mass
- Hertzsprung-Russell Diagram** 571
- Variable Stars** 573
- Interstellar Matter** 573
- Stellar Evolution** 574
 - Star Birth • Protostar Stage • Main-Sequence Stage • Red Giant Stage • Burnout and Death • H-R Diagrams and Stellar Evolution
- Stellar Remnants** 579
 - White Dwarf • Neutron Stars • Black Holes
- The Milky Way Galaxy** 582
 - Structure of the Milky Way Galaxy
- Galaxies** 584
 - Four Types of Galaxies • Galactic Clusters
- Red Shifts** 586
 - Expanding Universe
- The Big Bang** 588
 - Box 22.1 Determining Distance from Magnitude 573
 - Box 22.2 Supernova 1987A 581
 - Box 22.3 From Stardust to You 583
- Appendix A: Metric and English Units Compared** 591
- Appendix B: Mineral Identification Key** 592
- Appendix C: Earth's Grid System** 595
- Appendix D: Topographic Maps** 598
- Appendix E: Star Charts** 602
- Appendix F: World Soils** 607
- Appendix G: Landforms of the Conterminous United States** 611
- Appendix H: Periodic Table of the Elements** 614
- Glossary** 615
- Index** 633
