The Seismic Cycle	.76
Earthquake Prediction: Is It Possible?	.78
Quake Precursors: Truth or Myth?	.80
Beyond Prediction: Reducing Risk	.84
Volcanoes	.97
Galeras Volcano, Colombia, 1993	.97
Uncorking a Volcano	.100
Tools of the Volcanology Trade	.102
Where Volcanoes Lurk	.113

Types of Volcanoes .....	119
How Big is Big? .....	128
Warnings, Precursors, and Eruptive Styles .....	129
Italy, 79 A.D.: Vesuvius .....	130
Washington State, 1980: Mount St. Helens .....	133
Colombia, 1985: Nevado Del Ruiz .....	143
Philippine Islands, 1991: Mount Pinatubo .....	145
Forecasting Volcanic Eruptions .....	150
Volcanic Hazards and Risks .....	153
Reducing Risk .....	156
Regions at Risk .....	161
Tsunamis .....	165
Papua New Guinea, 1998 .....	165
Tsunami or Tidal Wave? .....	170
Tsunamis vs. Wind Waves .....	171
The Trigger .....	180
Tsunami Modeling .....	184
Local vs. Distant Tsunamis .....	192
Tsunami Prediction .....	196
Paleotsunamis and Asteroid Impacts .....	198
Tsunamis and the Pacific Northwest .....	200
Tsunami Impacts and Reducing the Risks .....	203
Warning Systems .....	210
Selected Sources, Readings, and Web Sites .....	217
The Underlying and Dynamic Earth .....	217
Earthquakes .....	219
Volcanoes .....	220
Tsunamis .....	222
