

# Table of Contents

<b>Introduction .....</b>	<b>1</b>
Who Should Read this Book? .....	1
Using AutoCAD for Design, Engineering, and Technical Drafting .....	2
2D versus 3D: Choosing the Right Tool for the Right Job .....	2
What You Need To Use this Book .....	2
DOS Version .....	2
UNIX, Macintosh, and Other Operating Systems .....	2
AutoCAD Version and Equipment .....	3
Compatibility with Earlier Versions of AutoCAD .....	3
How this Book Is Organized .....	4
The Optional AutoCAD: Drafting and 3D Design Drawing Disk .....	4
How To Use the ACAD Disk's Exercise Drawings .....	5
The Y14.5 Menu System .....	5
About this Book .....	5
Things To Watch For .....	5
How Exercises Are Shown .....	6
<b>1 Hardware Tools for CAD .....</b>	<b>9</b>
Overview .....	10
Understanding Input Devices .....	10
Keyboard .....	10
Mice and Digitizer Tablets .....	11
Selecting an Input Device .....	14
Using the Numeric Pad for Cursor Control .....	14
Understanding Disks and Disk Drives .....	15
Hard Disks .....	15
Floppy Disks .....	15
Backup Systems .....	16
Understanding Monitors .....	16
Display Resolution .....	16
Autosync Monitors .....	18
Ghosting or Cursor Trails .....	18
AutoCAD's Advanced User Interface (AUI) .....	18
Understanding Output Devices .....	20
Pen Plotters .....	20
Printer Plotters .....	21
Dot-Matrix Printers .....	22
Ink Jet, Thermal, and Laser Printers .....	22
Networking AutoCAD .....	23
Summary .....	23

<b>2 AutoCAD Commands and Command Entry .....</b>	<b>25</b>
Overview .....	26
Booting Up to AutoCAD's Main Menu .....	26
Using AutoCAD's Main Menu Options .....	26
Drawing File Names .....	29
File Utilities Menu .....	29
Getting To Know AutoCAD's Drawing Editor Menus .....	30
Accessing the Screen Menu .....	31
Applying Screen Menu Rules .....	31
Selecting Menu Items from the Keyboard .....	33
Using Pull-Down Menus .....	33
Using Dialogue Boxes .....	35
Using Scroll Bars .....	36
Using Icon Menus .....	36
Using Toggles and Function Keys .....	37
Giving Commands to the Drawing Editor .....	38
Selecting Defaults and Entering Values .....	39
Using Transparent Commands .....	39
Correcting Data Entry Errors .....	40
Undoing Mistakes .....	41
Summary .....	41
<b>3 Starting a Drafting Project .....</b>	<b>43</b>
Overview .....	44
Establishing Parameters and Values for PART1 .....	45
Entering the Drawing Editor .....	45
AutoCAD's Automatic Drawing Setup .....	46
Selecting a Unit of Measure .....	48
Setting the Drawing Aids .....	50
Setting Drawing Tools Using the Screen Menus .....	51
Setting Drawing Tools with a Dialogue Box .....	52
Navigating Using AutoCAD's Coordinate System .....	54
The User Coordinate System Icon .....	55
Absolute Coordinates .....	56
Relative Coordinates .....	56
Polar Coordinates .....	57
Integrating Absolute, Relative, and Polar Coordinates .....	59
The Coordinate Readout .....	59
Drafting a Part .....	60
Drawing an Object with Lines and Circle .....	61
Using Text Tools .....	63
Applying Text Justification .....	64
Editing Text Using a Dialogue Box .....	67
Inserting Text Control Codes .....	68
Using Various Text Styles .....	70
Saving and Quitting .....	73
Getting Help When You Need It .....	74
Asking for Assistance about Specific Commands .....	76

Using Drafting Inspection Tools .....	77
Using AutoCAD's Built-in Calculator .....	80
Saving and Exiting the Drawing Editor .....	80
Summary .....	82

#### **4 AutoCAD's Line Conventions ..... 83**

Overview .....	84
Establishing Parameters and Values for PART2 .....	85
Understanding Polylines .....	86
Drawing the PART2 Profile .....	87
Assigning Linetypes and Colors .....	89
Choosing Entity Linetypes .....	90
Changing the Linetype To Draw Hidden Lines .....	93
Using Linetype Scale .....	93
Establishing Entity Colors .....	94
Changing a Drawing's Linetypes and Colors .....	95
Summary .....	100

#### **5 Drawing and Erasing Simple Entities ..... 101**

Overview .....	102
Establishing Parameters and Values for PART3 .....	103
Drawing the PART3 Profile .....	104
Drawing the Circles .....	105
Redrawing the Screen .....	106
Drawing Arcs .....	107
Using Object Selection and Erasing Techniques .....	109
Applying AutoCAD's Object Selection .....	110
Selecting Objects for Erasing .....	111
Using Oops To Replace Mistaken Erasures .....	112
Using the Window and Crossing Options To Erase .....	113
Using the U, Undo, and Redo Commands .....	114
Summary .....	117

#### **6 Drafting In TILEMODE Model Space ..... 119**

Overview .....	120
Beginning the Drawing .....	121
Setting Up Multiple Viewports in TILEMODE Model Space .....	122
Controlling the Screen Display with Pan and Zoom .....	124
Displacing the Drawing Using Pan .....	125
Taking a Closer Look Using Zoom .....	126
Drawing the PART4 Profile .....	128
Drawing Polygons .....	131
Saving and Restoring Views .....	132
Saving and Restoring Viewport Configurations .....	136
Summary .....	139

<b>7 Drafting in Paper Space .....</b>	<b>141</b>
Overview .....	142
Establishing Parameters and Values for PART5 .....	142
Drawing the Object Profile .....	144
Adding Ellipses .....	145
Using Paper Space Tools for Drafting .....	146
Creating Viewports in Paper Space .....	147
Metaview Options .....	148
Using Model Space with TILEMODE Off .....	150
Using Multiple Viewports in Paper Space .....	152
Magnifying Objects Relative to the Paper Space Scale .....	154
Saving a Viewport as a View .....	158
Stretching Entities or Selection Sets .....	158
Moving Entities .....	162
Using Paper Space Viewports To Create Drawings .....	163
Plotting Your Drawings .....	165
Summary .....	170
<b>8 Prototype Drawings .....</b>	<b>171</b>
Overview .....	172
Creating a Generic Drafting Prototype .....	173
Starting the Drawing and Setting the Limits .....	174
Setting and Changing System Variables .....	175
Getting the Prototype Ready for Dimensioning .....	179
Saving a Dimensioning Style .....	182
Creating a Border and Title Block .....	182
Drafting a Polyline Border .....	184
Setting a User Coordinate System .....	185
Organizing Layers with Linetypes and Colors .....	186
Using the Modify Layer Dialogue Box .....	188
Using the Layer Command .....	191
Listing Layers .....	192
Changing the Current Layer .....	193
Using a Title Block Format .....	194
Drawing the Main Title Block .....	195
Establishing Standards for General Notes .....	201
Controlling Layer Status .....	202
Paper Space Viewport Layer Control .....	203
Dialogue Paper Space Viewport Layer Control .....	204
Startup Layer Status for the Prototype .....	204
Saving a View ALL .....	205
Creating a Paper Space Bordered Sheet and Title Block .....	206
Checking and Ending the Prototype .....	207
Setting Up a Scratch View and UCS .....	208
Organizing Multiple Prototypes .....	212
Scaling for Plotting .....	213
Scale Factor Settings .....	214
Adjusting Settings and Graphics for Scale .....	215
Summary .....	215

## **9 2D Orthographic Drafting and Advanced Editing ..... 217**

Overview .....	218
Using Multiple Viewports .....	219
Drafting the BRACKET Profile .....	223
Working in a Temporary UCS .....	225
Editing by Breaking the BRACKET Drawing .....	227
Picking Precise Geometric Positions Using Object Snap .....	229
The Object Snap Command .....	234
Trimming Entities .....	234
Extending Lines .....	236
Mirroring the Bracket .....	241
Summary .....	243

## **10 Dimensioning Engineering Drawings ..... 245**

Overview .....	246
Using AutoCAD'S Built-In Dimensioning .....	247
Associative Dimensioning .....	249
Customizing Dimensioning .....	249
Setting Dimensioning Variables from the Pull-Down Menu .....	250
Dimensioning Flexibility Leads to Choices .....	250
Recommended Spacing for Dimensions .....	252
Dimensioning in Model Space and Paper Space .....	252
Dimensioning the Bracket Drawing .....	253
Linear Dimensioning .....	254
Editing Dimension Text .....	256
Drafting with Tolerances .....	258
Updating Dimensions .....	259
Selecting Entities To Dimension .....	260
Vertical and Continue Dimensions with Tolerances .....	260
Continuous (Chain) Dimensions .....	261
Controlling Dimension Text .....	263
Baseline Dimensioning .....	263
Diameter Dimensions with Tolerances .....	264
Completing the Bracket—Optional .....	266
Summary .....	268

## **11 Creating a Multi-Detail Working Drawing—Phase 1 ... 269**

Overview .....	270
Understanding Parts and Parts Libraries .....	271
Drafting the Arm .....	272
Copying Entities and Selection Sets .....	274
Constructions with Point Filters .....	276
Filletting the Arm .....	280
Dimensioning the Arm .....	282
Radius Dimensioning .....	282
Associative Dimensioning .....	284
Associative Dimensioning Variables .....	285
Exploding Associative Dimensions .....	285

Stretching and Scaling Associatively Dimensioned Geometry .....	286
Updating Associative Dimensions .....	288
Completing the Arm's Dimensions—Optional .....	289
Blocking Entities into Groups .....	291
Writing the Arm to Disk .....	293
Drafting the Spacing Pin .....	295
Chamfering Geometry .....	297
The Pin's Right Side View—Optional .....	300
Dimensioning the Pin .....	301
Pointing to Specific Locations with Leaders .....	303
Completing the Pin's Dimensions—Optional .....	305
Write Blocking the Pin to Disk .....	306
Drafting the Servo Motor Mount .....	306
Rectangular Arrays .....	308
Completing the Two Views—Optional .....	310
Dimensioning Circles to ANSI Standards .....	311
Completing the Mount's Dimensions .....	313
Writing the Mount to Disk .....	315
Drafting the Adjustment Plate .....	315
Inserting Pre-Exploded Blocks .....	316
Changing Existing Entities .....	319
Developing Line-Arc Continuations .....	322
Completing the Plate's Dimensions—Optional .....	325
Drafting the Pulley .....	327
Polar Arrays .....	380
Hatch and Pattern Filling .....	335
Hatch Pattern Icon Menus .....	336
Hatch Options .....	337
Hatch Styles .....	337
Hatch and Pattern Boundaries .....	338
Dimensioning the Pulley .....	344
Angular Dimensioning .....	344
Suppressing Extension Lines .....	346
Cutting Planes .....	350
Finishing the Pulley—Optional .....	352
Writing the Pulley to Disk .....	353
Summary .....	354

## **12 Creating a Multi-Detail Working Drawing—Phase 2 ... 355**

Setting Up and Drafting the Robot Arm .....	356
Drawing Setup .....	357
Inserting Blocks .....	361
Editable Block Inserts .....	361
Block Scale and Rotation .....	362
Editing the B-ARM Dimensions—Optional .....	363
Insertion and DIMLFAC .....	364
Insertion and Scratch Block Redefinition .....	364
Numbering and Labeling the Parts and Title Block .....	365
Plotting the Multi-Detail Drawing .....	366
Summary .....	370

<b>13 Creating Symbol Libraries and Attributes .....</b>	<b>371</b>
Overview .....	372
Building Smart Symbols with Attributes .....	374
Attributes: Intelligent Symbol Text .....	375
Defining an Attribute .....	376
Including Attributes in Blocks .....	377
Editing Attribute Definitions .....	378
Inserting Attribute-Laden Blocks .....	378
Presetting Block Scale and Rotation .....	380
Editing Attributes .....	381
Attribute Editing and Insertion by Dialogue Box .....	384
Attribute Entry by Dialogue Box .....	384
Using the Y14.5—GDT Symbol Library .....	385
Creating Parts and Extracting Their Data .....	387
Attribute Modes .....	389
Attribute Selection Order .....	392
Invisible, Constant, Verify, and Preset Inserts .....	393
Controlling Attribute Visibility .....	393
Extracting Attribute Information .....	395
Working with Template Files .....	397
Summary .....	399
<b>14 Applying Geometric Dimensioning and Tolerancing .</b>	<b>401</b>
Overview .....	402
Drawing the M-COUPLE in Two Views .....	402
Drawing the M-COUPLE Front View .....	403
Drawing the M-COUPLE Section View .....	405
Following Steps and Rules for Production Dimensioning .....	409
Using Geometric Dimensioning and Tolerancing Steps .....	410
Establishing Dimensioning Datum Locations .....	411
Locating Holes and Slots .....	413
Locating and Sizing Features .....	415
Giving Overall Sizes .....	417
Sizing Holes .....	418
Adding Feature Control References, Symbols, and Finish Marks .....	419
Adding to the General Notes .....	423
Summary .....	425
<b>15 3D Extrusion Drafting .....</b>	<b>427</b>
Overview .....	428
Setting Up a Prototype for 3D .....	429
Using Viewpoints for Simultaneous 2D and 3D Views .....	431
Drawing with 3D Extrusions .....	434
Thickness Makes the Extrusion .....	436
Elevation, Thickness, UCSs, and Construction Planes .....	437
Drawing above and below the WCS Construction Plane .....	437

Hidden Line Removal .....	439
Hidden Line Removal Speed .....	440
Hiding and Plotting .....	441
Where Do Hidden Lines Go? .....	441
Shading 3D Images .....	441
Shade Options .....	442
Shading Reflection and Ambient Light—SHADEDIF .....	442
Solidifying Extrusions .....	443
Editing Polylines with the Pedit Command .....	446
Extruding a Hexagon Bolt .....	449
Covering Surfaces with the 3Dface Command .....	451
Setting Up for Plotting .....	454
Checking Scale and Alignment of Views .....	454
Setting Up ANSI Drawing Sheets .....	455
Using Mvsetup with TILEMODE Off .....	455
Freezing Viewport Frames for Plotting .....	458
Summary .....	460

## **16 3D Wireframe and Mesh Modeling ..... 461**

Overview .....	462
The User Coordinate System .....	463
3D Techniques for the Angle Support .....	465
Drawing the Construction Envelope .....	466
2D and 3D Polylines .....	470
Developing the Angle Base Profile .....	471
3D Polygon Mesh Surfaces .....	472
Controlling Mesh Density (Surface Tabulation)—Surftab .....	474
Tabulated Surfaces—Tbsurf .....	474
Extending the Base with Tbsurf .....	475
Surfaces of Revolution—Revsurf .....	476
Right Hand Rule—Direction of Rotation .....	479
Tabulated Surfaces—Tbsurf .....	480
Polygon Faces—Pface .....	484
Making Invisible Edges on Pfaces .....	485
Closing the Base's Top and Bottom — Optional .....	488
Edge Defined Coons Surface Patch—Edgesurf .....	488
Challenge Exercise—Optional .....	488
Summary .....	489

## **17 3D Manipulations ..... 491**

Overview .....	492
Creating Orthographic and Parallel Projection Views .....	492
Viewing 3D Drawings Using the Dview Command .....	493
Using the Dview Camera .....	496
Using the Dview Points Option .....	501
Using Dview Distance, Pan, and Zoom .....	505
Inserting Captured Blocks .....	509

Editing the Views into 2D .....	512
Purging Blocks, Layers, Linetypes, Shapes, and Styles .....	517
Cleaning Up the 3D View—Optional .....	517
Completing the 2D Front and Auxiliary Views—Optional .....	518
Dimensioning 2D Views .....	520
Creating a Multi-View Drawing in Paper Space .....	520
The Command Set for Paper Space Viewports .....	521
Dimensioning a 3D View .....	534
Summary .....	540

## **18 Advanced 3D Surface Modeling ..... 541**

Overview .....	542
Modeling the U-Joint Cap .....	543
Modeling the Yoke .....	544
Modeling the U-Joint .....	547
Creating a 3D Exploded Illustration .....	549
Summary .....	550

## **A DOS, Batch Files, and Text Editors ..... 551**

Working with Files .....	551
Using DOS Directory Commands To Manage Files and Directories .....	552
Navigating through Directories (DIR) .....	553
Creating Directories (MD or MKDIR) .....	553
Changing Directories (CD or CHDIR) .....	553
Saving AutoCAD Drawing Files in Subdirectories .....	555
Using Path Commands .....	555
Removing Directories (RD or RMDIR) .....	555
Using DOS File Commands .....	556
Copying Files (COPY) .....	556
Comparing Files (COMP) .....	557
Deleting Files (DEL) .....	557
Renaming Files (REN) .....	557
Using DOS Disk Commands .....	558
Changing the Default Drive .....	558
Checking Disks (CHKDSK) .....	558
Copying Floppy Disks (DISKCOPY) .....	559
Comparing Floppy Disks (DISKCOMP) .....	559
Formatting Disks (FORMAT) .....	560
Creating a Bootable Disk Using the FORMAT /S Command .....	560
Formatting with Volume Labels (FORMAT /V) .....	560
Displaying Directory Trees (TREE) .....	561
Setting Environment Variables (SET) .....	561
Creating Batch Files .....	561
Understanding the Automatic Executing .BAT File (AUTOEXEC.BAT) .....	562
Selecting Text Editors .....	562

<b>B Systems, Setup, Memory, and Errors .....</b>	<b>565</b>
Using AutoCAD on DOS-Based, Unix-Based, and Other Systems .....	565
Understanding the General System Components .....	566
Setting Up AutoCAD in a DOS Environment .....	566
Using Extended and Expanded Memory .....	567
Loading DOS Programs on a Hard Disk .....	567
The CONFIG.SYS File .....	568
The AUTOEXEC.BAT File .....	569
Setting Up AutoCAD .....	570
Creating a Subdirectory for AutoCAD .....	570
Configuring AutoCAD .....	570
Starting AutoCAD .....	571
Setting Up for AutoCAD: Drafting and 3D Design .....	571
Creating the D3D-ACAD Subdirectory in a UNIX Environment .....	572
Installing the AutoCAD: Drafting and 3D Design Disk .....	572
Copying the AutoCAD Configuration and Overlay Files .....	573
Automating AutoCAD Startup Using ACAD.BAT .....	573
Testing ACAD.BAT .....	574
Creating a Default ACAD.DWG .....	574
Automating AutoCAD with a UNIX Script .....	575
<b>C AutoCAD Command List .....</b>	<b>577</b>
Selecting Objects in AutoCAD .....	577
Picking Points Using Coordinates .....	578
AutoCAD Commands .....	579
Using the AutoLISP 3D Programs .....	607
<b>Index .....</b>	<b>613</b>
