
CONTENTS

| | |
|---|----|
| Preface | xi |
| Chapter 1 General Concepts and Formulae | 1 |
| 1-1 Introduction | 1 |
| 1-2 The Present Study | 2 |
| 1-3 Some Preliminary Concepts and Formulae | 6 |
| 1-3-1 Domain (or Region) and Boundary | 6 |
| 1-3-2 Boundary and Initial-Value Problems | 8 |
| 1-3-3 Gradient and Divergence Theorems | 9 |
| 1-3-4 Summation Convention, and Kronecker Delta and Permutation Symbols | 11 |
| Problems | 15 |
| Chapter 2 A Review of the Field Equations of Engineering | 17 |
| 2-1 Introduction | 17 |
| 2-2 Kinematics | 19 |
| 2-2-1 Descriptions of Motion | 19 |
| 2-2-2 Material Derivative in Spatial Coordinates | 20 |
| 2-2-3 Strain Tensors | 21 |
| 2-2-4 Compatibility Equations | 26 |
| 2-3 Kinetics and Mechanical Balance Laws | 26 |
| 2-3-1 Stress | 26 |
| 2-3-2 Conservation of Mass: the Continuity Equation | 29 |
| 2-3-3 Momentum Principles | 31 |
| 2-4 Thermodynamic Principles | 33 |
| 2-4-1 Introduction | 33 |
| 2-4-2 The First Law of Thermodynamics: The Energy Equation | 33 |
| 2-5 Constitutive Laws | 35 |
| 2-5-1 General Comments | 35 |
| 2-5-2 Linear Elastic Solids: Generalized Hooke's Law | 35 |
| 2-5-3 Newtonian Fluids | 37 |
| 2-5-4 Thermoelasticity | 37 |

| | | |
|------------------|--|------------|
| 2-6 | Specialization of the Equations to Linear Field Problems | 38 |
| 2-6-1 | Introductory Comments | 38 |
| 2-6-2 | Linear Theory of Elasticity | 39 |
| 2-6-3 | Newtonian Fluid Mechanics | 41 |
| 2-6-4 | Heat Transfer in Solids | 42 |
| | Problems | 43 |
| Chapter 3 | Concepts from Functional Analysis | 50 |
| 3-1 | Introduction | 50 |
| 3-1-1 | General Comments | 50 |
| 3-1-2 | Notation | 51 |
| 3-1-3 | Supremum and Infimum of Sets | 52 |
| 3-1-4 | Functions | 54 |
| 3.2 | Linear Vector Spaces | 55 |
| 3-2-1 | Introduction | 55 |
| 3-2-2 | Linear Spaces and Subspaces | 59 |
| 3-2-3 | Linear Dependence and Independence of Vectors | 64 |
| 3-2-4 | Span, Basis and Dimension | 65 |
| | Problems 3-1 | 70 |
| 3-3 | Linear Transformations and Functionals | 72 |
| 3-3-1 | Introduction | 72 |
| 3-3-2 | Linear Transformations | 73 |
| 3-3-3 | Linear Transformations on Finite-Dimensional Spaces | 76 |
| 3-3-4 | Linear, Bilinear and Quadratic Forms | 78 |
| | Problems 3-2 | 82 |
| 3-4 | Theory of Normed Spaces | 85 |
| 3-4-1 | Norm and Normed Spaces | 85 |
| 3-4-2 | Continuous Linear Transformations | 91 |
| 3-4-3 | Complete Normed Spaces: Banach Spaces | 97 |
| 3-4-4 | Closure, Denseness and Separability | 101 |
| | Problems 3-3 | 103 |
| 3-5 | Theory of Inner Product Spaces | 105 |
| 3-5-1 | Inner Product and Inner Product Spaces | 105 |
| 3-5-2 | Orthogonal Vectors, Complements and Projections | 108 |
| 3-5-3 | Complete Inner Product Spaces: Hilbert Spaces | 112 |
| 3-5-4 | Orthonormal Bases and Generalized Fourier Series | 118 |
| | Problems 3-4 | 123 |
| Chapter 4 | Variational Formulations of Boundary-Value Problems | 125 |
| 4-1 | Linear Functionals and Operators on Hilbert Spaces | 125 |
| 4-1-1 | Introduction | 125 |
| 4-1-2 | Representation of Linear Functionals | 127 |
| 4-1-3 | Adjoint Operators | 129 |
| 4-1-4 | Symmetric, Positive and Positive-Definite Operators | 133 |
| | Problems 4-1 | 134 |
| 4-2 | Sobolev Spaces and the Concept of Generalized Solution | 135 |
| 4-2-1 | Sobolev Spaces, $H^m(\Omega)$ | 135 |
| 4-2-2 | Traces of Functions from $H^m(\Omega)$ | 138 |

| | | |
|------------------|--|------------|
| 4-2-3 | The Friedrichs and Poincaré Inequalities | 139 |
| 4-2-4 | Weak (or Generalized) Solutions | 141 |
| 4-3 | The Minimum of a Quadratic Functional | 142 |
| 4-3-1 | The Minimum Functional Theorem | 142 |
| 4-3-2 | The Energy Space | 148 |
| 4-3-3 | Concepts from Variational Calculus | 152 |
| 4-3-4 | Nonhomogeneous Boundary Conditions | 159 |
| | Problems 4-2 | 163 |
| 4-4 | Problems with Equality Constraints | 165 |
| 4-4-1 | Introduction | 165 |
| 4-4-2 | The Lagrange Multiplier Method | 166 |
| 4-4-3 | The Penalty Function Method | 181 |
| | Problems 4-3 | 188 |
| Chapter 5 | Existence and Uniqueness of Solutions | 191 |
| 5-1 | Introduction | 191 |
| 5-2 | Linear Algebraic Equations | 192 |
| 5-2-1 | Vector Interpretation of Algebraic Equations | 192 |
| 5-2-2 | Solvability Conditions | 193 |
| 5-3 | Linear Operator Equations | 198 |
| 5-3-1 | Introduction | 198 |
| 5-3-2 | Solvability Conditions | 199 |
| 5-3-3 | The Contraction Mapping Theorem | 202 |
| | Problems 5-1 | 208 |
| 5-4 | Variational Boundary-Value Problems | 209 |
| 5-4-1 | Introduction | 209 |
| 5-4-2 | Regularity of the Solution | 210 |
| 5-4-3 | The Lax–Milgram Theorem | 211 |
| 5-4-4 | Nonhomogeneous Boundary Conditions | 219 |
| 5-4-5 | The Neumann Boundary-Value Problems | 229 |
| | Problems 5-2 | 235 |
| 5-5 | Boundary-Value Problems with Equality Constraints | 237 |
| 5-5-1 | Introduction | 237 |
| 5-5-2 | The Dirichlet Problem for a Second-Order Differential Equation | 238 |
| 5-5-3 | Nearly Incompressible and Incompressible Elastic Solids and Viscous Fluids | 241 |
| 5-5-4 | The Penalty Formulation of Incompressible Fluids | 246 |
| 5-6 | Eigenvalue Problems | 250 |
| 5-6-1 | Introduction | 250 |
| 5-6-2 | Existence and Uniqueness Results | 251 |
| | Problems 5-3 | 254 |
| Chapter 6 | Variational Methods of Approximation | 257 |
| 6-1 | Introduction | 257 |
| 6-2 | The Ritz Method | 258 |
| 6-2-1 | Introduction | 258 |
| 6-2-2 | Description of the Method | 259 |
| 6-2-3 | Convergence and Stability | 262 |
| 6-2-4 | Applications | 265 |

| | |
|---|------------|
| Problems 6-1 | 285 |
| 6-3 The Weighted-Residual Method | 287 |
| 6-3-1 Introduction | 287 |
| 6-3-2 The Bubnov-Galerkin Method | 289 |
| 6-3-3 The Method of Least Squares | 297 |
| 6-3-4 Collocation and Subdomain Methods | 302 |
| Problems 6-2 | 305 |
| 6-4 The Kantorovich and Trefftz Methods | 306 |
| 6-4-1 The Kantorovich Method | 306 |
| 6-4-2 The Trefftz Method | 315 |
| Problems 6-3 | 319 |
| 6-5 Time-Dependent Problems | 320 |
| 6-5-1 Introduction | 320 |
| 6-5-2 Parabolic Equations | 322 |
| 6-5-3 Hyperbolic Equations | 326 |
| 6-5-4 The Method of Discretization in Time | 329 |
| Problems 6-4 | 340 |
| | |
| Chapter 7 The Finite-Element Method | 343 |
| 7-1 Some General Properties of the Method | 343 |
| 7-1-1 Introduction | 343 |
| 7-1-2 Division of Whole into Parts (Partitioning of Domain) | 344 |
| 7-1-3 Finite-Element Interpolation | 345 |
| 7-1-4 Connectivity (or Assembly) of Elements | 348 |
| 7-1-5 Existence and Convergence of Solutions | 350 |
| 7-2 One-Dimensional Second-Order Equations | 350 |
| 7-2-1 The Model Problem | 350 |
| 7-2-2 The Ritz Finite-Element Model | 351 |
| 7-2-3 Applications of the Ritz Finite-Element Model | 366 |
| 7-2-4 Weighted-Residual Finite-Element Models | 378 |
| 7-3 One-Dimensional Fourth-Order Equations | 385 |
| 7-3-1 Model Problem | 385 |
| 7-3-2 The Ritz Finite-Element Model | 386 |
| 7-3-3 Applications | 390 |
| 7-4 Time-Dependent Problems in One Dimension | 392 |
| 7-4-1 Introduction | 392 |
| 7-4-2 Semidiscrete Finite-Element Models | 393 |
| 7-4-3 Time Approximations | 394 |
| 7-4-4 The Method of Discretization in Time | 396 |
| 7-5 Approximation Errors in the Finite-Element Method | 399 |
| 7-5-1 Introduction | 399 |
| 7-5-2 Convergent Approximations | 400 |
| 7-5-3 Accuracy of the Solution | 400 |
| Problems 7-1 | 404 |
| 7-6 Two-Dimensional Second-Order Equations | 407 |
| 7-6-1 Model Equation | 407 |
| 7-6-2 The Ritz Finite-Element Model | 407 |
| 7-6-3 Interpolation Functions | 412 |

| | | |
|------------------------------|--|-----|
| 7-6-4 | Existence of Solutions and Error Estimates | 419 |
| 7-6-5 | Illustrative Examples | 421 |
| 7-6-6 | Weighted-Residual Finite-Element Models | 430 |
| Problems 7-2 | | 434 |
| 7-7 | Coupled Second-Order Equations | 440 |
| 7-7-1 | Introduction | 440 |
| 7-7-2 | Plane Elasticity | 441 |
| 7-7-3 | Viscous Incompressible Flows in Two Dimensions | 454 |
| 7-7-4 | Bending of Elastic Plates | 469 |
| 7-8 | Time-Dependent Problems in Two Dimensions | 485 |
| 7-8-1 | Introduction | 485 |
| 7-8-2 | Semidiscrete Approximations | 486 |
| 7-8-3 | Time Approximations | 487 |
| Problems 7-3 | | 490 |
| References | | 493 |
| Bibliography | | 495 |
| Answers to Selected Problems | | 505 |
| Index | | 535 |
