| <b>PREFACE</b>  | <b>vii</b> |
| <b>1 INTRODUCTION</b>   | <b>1</b>   |
| 1-1 Introduction to System Dynamics                           | 1          |
| 1-2 Mathematical Modeling of Dynamic Systems                  | 3          |
| 1-3 Analysis and Design of Dynamic Systems                    | 5          |
| 1-4 Summary   | 6          |
| <b>2 THE LAPLACE TRANSFORM</b>                                | <b>8</b>   |
| 2-1 Introduction  | 8          |
| 2-2 Complex Numbers, Complex Variables, and Complex Functions | 8          |
| 2-3 Laplace Transformation                                    | 14         |
| 2-4 Inverse Laplace Transformation                            | 29         |
| 2-5 Partial-Fraction Expansion with MATLAB                    | 34         |
| 2-6 Solving Linear, Time-Invariant, Differential Equations    | 36         |
| Example Problems and Solutions                                | 38         |
| Problems  | 53         |
| <b>3 MECHANICAL SYSTEMS</b>                                   | <b>58</b>  |
| 3-1 Introduction  | 58         |
| 3-2 Mechanical Elements                                       | 62         |
| 3-3 Mathematical Modeling of Mechanical Systems               | 65         |
| 3-4 Mechanical Systems with Dry Friction                      | 79         |

|          |  |     |            |
|----------|--|-----|------------|
| 3-5      | Work, Energy, and Power                                | 84  |            |
| 3-6      | Motion, Energy, and Power Transformers                 | 93  |            |
|          | Example Problems and Solutions                         | 100 |            |
|          | Problems   | 122 |            |
| <b>4</b> | <b>ELECTRICAL SYSTEMS</b>                              |     | <b>134</b> |
| 4-1      | Introduction   | 134 |            |
| 4-2      | Review of Basic Materials of Electrical Circuits       | 137 |            |
| 4-3      | Mathematical Modeling of Electrical Systems            | 143 |            |
| 4-4      | Analogous Systems                                      | 156 |            |
|          | Example Problems and Solutions                         | 160 |            |
|          | Problems   | 175 |            |
| <b>5</b> | <b>FLUID SYSTEMS AND THERMAL SYSTEMS</b>               |     | <b>183</b> |
| 5-1      | Introduction   | 183 |            |
| 5-2      | Mathematical Modeling of Liquid-Level Systems          | 184 |            |
| 5-3      | Mathematical Modeling of Pneumatic Systems             | 190 |            |
| 5-4      | Linearization of Nonlinear Systems                     | 195 |            |
| 5-5      | Mathematical Modeling of Hydraulic Systems             | 198 |            |
| 5-6      | Mathematical Modeling of Thermal Systems               | 205 |            |
|          | Example Problems and Solutions                         | 209 |            |
|          | Problems   | 229 |            |
| <b>6</b> | <b>LINEAR SYSTEMS ANALYSES IN THE TIME DOMAIN</b>      |     | <b>236</b> |
| 6-1      | Introduction   | 236 |            |
| 6-2      | Transient-Response Analysis of First-Order Systems     | 237 |            |
| 6-3      | Transient-Response Analysis of Second-Order Systems    | 242 |            |
| 6-4      | Impulse Response of Mechanical Systems                 | 251 |            |
| 6-5      | Transient-Response Analysis with MATLAB                | 256 |            |
|          | Example Problems and Solutions                         | 264 |            |
|          | Problems   | 285 |            |
| <b>7</b> | <b>LINEAR SYSTEMS ANALYSIS IN THE FREQUENCY DOMAIN</b> |     | <b>292</b> |
| 7-1      | Introduction   | 292 |            |
| 7-2      | Sinusoidal Transfer Function                           | 292 |            |
| 7-3      | Vibrations in Rotating Mechanical Systems              | 299 |            |
| 7-4      | Vibration Isolation                                    | 302 |            |
| 7-5      | Dynamic Vibration Absorbers                            | 308 |            |
| 7-6      | Vibrations in Multi-Degrees-of-Freedom Systems         | 314 |            |
|          | Example Problems and Solutions                         | 318 |            |
|          | Problems   | 344 |            |

|           |   |            |
|-----------|---|------------|
| <b>8</b>  | <b>ANALYSIS AND DESIGN OF CONTROL SYSTEMS<br/>IN THE TIME DOMAIN</b>      | <b>351</b> |
| 8-1       | Introduction  | 351        |
| 8-2       | Block Diagrams  | 354        |
| 8-3       | Automatic Controllers   | 359        |
| 8-4       | Transient-Response Analysis   | 366        |
| 8-5       | Transient-Response Specifications   | 373        |
| 8-6       | Improving Transient-Response and Steady-State Characteristics             | 381        |
| 8-7       | Stability Analysis  | 397        |
| 8-8       | Root-Locus Analysis   | 403        |
| 8-9       | Root-Locus Plots with MATLAB  | 422        |
| 8-10      | Tuning Rules for PID Controllers  | 425        |
|           | Example Problems and Solutions  | 436        |
|           | Problems  | 462        |
| <b>9</b>  | <b>ANALYSIS AND DESIGN OF CONTROL SYSTEMS<br/>IN THE FREQUENCY DOMAIN</b> | <b>470</b> |
| 9-1       | Introduction  | 470        |
| 9-2       | Bode Diagram Representation of Frequency Response                         | 471        |
| 9-3       | Plotting Bode Diagrams with MATLAB  | 491        |
| 9-4       | Nyquist Plots and Nyquist Stability Criterion                             | 492        |
| 9-5       | Drawing Nyquist Plots with MATLAB   | 503        |
| 9-6       | Design of Control Systems in the Frequency Domain                         | 507        |
|           | Example Problems and Solutions  | 532        |
|           | Problems  | 554        |
| <b>10</b> | <b>MATHEMATICAL MODELING OF DYNAMIC SYSTEMS<br/>IN STATE SPACE</b>        | <b>559</b> |
| 10-1      | Introduction  | 559        |
| 10-2      | State-Space Models for Dynamic Systems                                    | 560        |
| 10-3      | Transformation of System Models   | 570        |
| 10-4      | Solution of the State Equation  | 576        |
| 10-5      | MATLAB Approach to State-Space Analysis                                   | 586        |
|           | Example Problems and Solutions  | 602        |
|           | Problems  | 623        |
| <b>11</b> | <b>DISCRETE-TIME SYSTEMS</b>  | <b>629</b> |
| 11-1      | Introduction  | 629        |
| 11-2      | The $z$ Transformation  | 630        |
| 11-3      | The Inverse $z$ Transformation  | 642        |
| 11-4      | Solving Difference Equations by the $z$ -Transform Method                 | 648        |
| 11-5      | Discretization of Linear, Time-Invariant, Differential Equations          | 653        |

|      |   |     |
|------|---|-----|
| 11-6 | State-Space Representation for Discrete-Time Systems      | 665 |
| 11-7 | Solving the Discrete-Time State Equation                  | 669 |
| 11-8 | Discretization of Linear, Time-Invariant, State Equations | 675 |
| 11-9 | Analysis of Discrete-Time Systems with MATLAB             | 677 |
|      | Example Problems and Solutions                            | 694 |
|      | Problems  | 718 |

|                   |                               |            |
|-------------------|-------------------------------|------------|
