

Contents

1. Microcomputers and Basic Connectivity 1

Objectives	1
Key Terms	1
Introduction	2
The Microcomputer Operating Environment	3
The MS-DOS Environment	4
The UNIX Environment	6
The Personal Computer and UNIX	7
Graphical User Interfaces (GUIs)	7
Functions of a GUI	7
Microsoft Windows	8
The Macintosh Environment	9
Multitasking and Multiuser Solutions	9
Stand-Alone Microcomputers	10
Multitasking Microcomputers	11
Multiuser Microcomputers	12
Zero-Slot Local Area Networks (LANs)	15
Sharing Printers	16
Virtual Drives	16
Connections	17
Printer Sharing Buffers	18
Connectivity and Features	18
Data Switches	19
Private Branch Exchanges (PBX)	19
Capabilities	20
Matrix Switch	24
Features and Capabilities	25
Advantages	25
Disadvantages	26
Microcomputers and Networks	26
The Role of the Microcomputer Workstation and Client/Server Computing	27
Services Offered Through Communication Networks	29
Electronic Data Interchange	30
Electronic Funds Transfer	30
Electronic Mail	30
Beyond E-mail?	31

Facsimile Technology and the Personal Computer	32
The Facsimile Transmission Process	34
Transmitting a FAX Document	35
Bulletin Boards	35
Types of Bulletin Boards	36
Commercial Bulletin Boards	36
Local Public Bulletin Boards	37
Specialized Bulletin Boards	37
Components of an Electronic Bulletin Board	37
Services Provided	38
Popular Electronic Bulletin Board Systems	39
Summary	39
Questions	41

2. Device Connectivity 43

Objectives	43
Key Terms	43
Introduction	44
Microcomputer Communication Protocols	44
Protocol Functions	46
Asynchronous Communication	47
Using DOS	47
Communication Software	49
Available Protocols	50
X-On/X-Off	50
Xmodem	51
Xmodem-CRC	52
Xmodem-1K	52
WXmodem	52
Ymodem	53
Zmodem	53
Kermit	53
X.PC	54
Synchronous Transmission	54
Character-Type	55
Byte-Count-Type	55
Bit-Type	56
Synchronous Software	57
Terminal Emulation in the IBM World	58
GUIs and the IBM Mainframe	59
Communication Hardware	62
The RS-232 Cable and Null Modems	63
Micro-to-Micro Connections	64
Communication Between PCs	64

Macintosh-PC Communications	66
Micro-to-Minicomputer and Mainframe Connections	70
Connecting through Modems	70
Direct Connection	73
Network Connection	74
Protecting the Hardware	75
Power Surges	76
Power Sags	77
Electrical Noise	79
Static Electricity	80
Summary	81
Questions	83

3. LAN Basics 85

Objectives	85
Key Terms	85
Introduction	86
Local Area Networks	86
Benefits	86
Sharing Software	88
Sharing Data	89
Sharing System Resources	89
Security and Backup	89
Easy Maintenance and Upgrades	89
Applications	90
Office Automation	90
Education	91
CAD	91
CAM	92
LAN Characteristics	94
Flexibility	94
Speed	95
Reliability	95
Hardware and Software Sharing	95
Transparent Interface	96
Adaptability	97
Access to Other LANs and WANs	97
Security	97
Centralized Management	98
Private Ownership	99
LAN Components	99
Servers	99
Choosing Servers	101
Workstations	103

LAN Software	104
Choosing a Directory for Shared Software	104
LAN and Circuit Media	106
Guided Media	108
Twisted Pair Cables	108
Coaxial Cable	110
Optical Fiber	112
Unguided Media	116
Microwave	116
Cellular Radio	119
Circuit Media Selection	120
Cost	120
Speed	122
Expandability	123
Security	124
Distance Requirements	125
Environment	126
Maintenance	126
Summary	127
Questions	130

4. Advanced Network Concepts 133

Objectives	133
Key Terms	133
Introduction	134
Types of Networks	134
Wide Area Network (WAN)	135
Metropolitan Area Network (MAN)	136
Local Area Network (LAN)	136
Network Architectures and Standards	137
IEEE 802 Project LAN Standards	138
802.1	138
802.2: LLC Protocol	139
802.3: CSMA/CD Baseband Bus	139
802.4: Token Passing Bus	139
802.5: Token Passing Ring	139
802.6: MAN	140
802.7: Broadband Technology	140
802.8: Fiber Optic Technology	140
802.9: Isochronous Ethernet (also known as IsoEne ^t)	140
802.10: LAN Security	140
802.11: Wireless LAN	140
802.12: Demand Priority Committee	140

Open Systems Interconnect (OSI)	141
History	141
Benefits	143
Functional Layers	143
Systems Network Architecture (SNA)	145
The SNA Strategy	145
Concepts	146
The Systems Application Architecture (SAA) Extension to SNA	148
SAA Standards	148
Common User Access	148
Common Communication Support	148
Common Programming Interface	148
Transmission Control Protocol/Internet Protocol (TCP/IP)	149
The Internet	149
The Layers of TCP/IP	150
Process/Application Layer	150
File Transfer Protocol	150
Trivial File Transfer Protocol	150
TELNET	151
Host-to-Host Layer	151
Transmission Control Protocol	151
User Datagram Protocol	151
The Internet Layer	151
The Internet Protocol	152
The Internet Control Message Protocol	152
Address Resolution Protocol	152
Reverse Address Resolution Protocol	152
The Network Access Layer	152
The Future of TCP/IP?	153
Packet Data Networks	153
Virtual Circuits	154
Example of a PDN	154
Network Interconnectivity	156
Connecting Networks	156
Devices for Interconnecting Networks	157
Repeaters	157
Bridges	158
Routers	159
Brouters	160
Gateways	160
Planning a Hybrid Network	161
Summary	163
Questions	164

5. Top Three Network Protocols & Topologies 167

- Objectives 167
- Key Terms
- Introduction 168
- The LAN Communication System 168
- LAN Configurations 170
 - Baseband vs. Broadband 171
 - Topologies 171
 - Bus Topology 172
 - Ring Topology 172
 - Star Topology 173
 - LAN Protocols 174
 - LLC Protocol 175
 - CSMA/CD Protocol 175
 - Token Passing Protocol 176
- Ethernet 177
 - History and General Characteristics 177
 - Cabling 178
 - Ethernet Thinnet 178
 - Ethernet Thicknet 179
 - 10BaseT 181
 - Ethernet Frame Format 182
 - Troubleshooting Typical Ethernet LAN Communications Problems 183
 - Missing Terminators 183
 - Duplicate Addresses 183
 - Failed NICs or Failed Concentrators 183
 - Cables Improperly Built 183
 - Cable Lengths Longer Than Specifications or More Stations Than Allowed on a Segment 184
- Token Ring 184
 - History and General Characteristics 184
 - Cabling 184
 - Token Ring Frame Format 186
 - SD Field 186
 - AC Field 187
 - FC Field 187
 - DA Field 187
 - SA Field 187
 - Info or Data Field 187
 - FCS Field 187
 - ED Field 188

Troubleshooting Typical Token Ring LAN Communications Problems	188
Duplicate Addresses	188
Failed NICs or Failed MAU	188
Cables Improperly Built	189
Cable Lengths Longer Than Allowed Specifications	189
Speed Disparity	189
ARCnet and ARCNETPLUS	189
History	189
Cabling	191
ARCnet Frame Format	191
ITT Frame	193
FBE Frame	193
ACK Frame	193
NAK Frame	193
PAC Frame	193
Troubleshooting Typical ARCnet LAN Communications Problems	194
Missing Terminators	194
Terminators with Wrong Ohm Rating	194
Duplicate Addresses	194
Failed NICs or Failed Hubs	195
Cables Improperly Built	195
Cable Lengths Longer Than Specifications	195
Outside Interference	195
ARCNETPLUS	195
Considerations in Choosing Ethernet, Token Ring, or ARCnet for a LAN	196
Summary	198
Questions	199

6. Local Area Network Operating Systems 201

Objectives	201
Key Terms	201
Introduction	202
Types of Networks	202
Microsoft LAN Manager	204
Basic Software Features	204
OS/2 Platform	204
Network Management and Monitoring Tools	205
Fault Tolerance Features	205
Connectivity to Other Systems	205
Performance Features	205
Network Administration and Use	205
Domains and Aliases	206
Help	206

Basic Server Hardware and Other Specifications	206
Summary	206
IBM OS/2 LAN Server	207
Basic Software	207
Server Versions Available	207
Workstation Support	207
Domains and Aliases	208
Network Administration and Use	208
Security	208
Fault Tolerance	209
Application Programming Interface	209
Help	209
Performance	209
Audit Control	210
File Caching	210
Basic Hardware	210
Summary	210
VINES	210
Basic Software Features	211
Installation	211
StreetTalk III	211
Mail	211
Modem Support	212
Network Management and Monitoring	212
Printing	212
Backup	212
Basic Hardware and Other Specifications	213
Summary	213
LANtastic	213
Basic Software Features	214
Global Resources	214
Operator Privileges and Management Command Options	214
File Level Security	214
High-Speed Data Transfer/LANcache	215
Printer Control Features	215
Electronic Mail	215
Support for UPS and CD-ROM Sharing	215
Audit Trails	215
Help	215
LANtastic for Windows	216
Basic Hardware Requirements and Other Specifications	216
Microsoft Windows for Workgroups	217
Basic Software	217
Network Operating System Versions	217

32-Bit Driver Model	218
Installation	218
Network Administration and Management	218
Audit Logging	218
Connectivity	219
Other Features	219
Basic Hardware and Other Specifications	219
Microsoft Windows NT and Microsoft Windows NT Server	220
General Background	220
Microsoft Windows NT Desktop Edition Basic Features	221
Installation and Training	221
Device Support	221
Reliability	221
Multitasking and Multithreading	222
Network Administration	222
Security	223
Connectivity	224
Software Support	224
Filename Support	224
Windows NT Server Edition - Basic Features	225
Network Administration	225
Domains	225
Fault Tolerance	226
Remote Access	227
Connectivity	227
Microsoft Windows 95	227
Basic Hardware and Other Specifications for Microsoft NT	228
Basic Hardware Requirements for Microsoft Windows NT Server	229
Summary	229
Novell NetWare	231
History and General Overview	231
Type of Clients for Client/Server	232
NetWare 3.11/3.12	232
Installation and Administration	232
File and Directory Services	233
Security	233
Print Services	234
Help	234
UPS and CD-ROM Support	234
Connectivity	235
Basic Hardware and Other Specifications	235
NetWare Version 4	235
Basic Software	236
Installation	236
Workstation Interface	236

Network Administration	236
NetWare Directory Services	236
Security	237
Independent Auditor Capability	237
Upgrading from NetWare 2.x and 3.x	237
Migration and Compression	238
Performance	238
Basic Hardware and Other Specifications	238
Backup/Restore Hardware/Software	239
Summary	240
Personal NetWare	240
Basic Software	240
Installation	240
Shared Peripherals Including CD-ROM	241
Connectivity	241
Single Network View/Network Administration	241
Network Management	241
Auto Reconnect	241
Reliability	241
Virtual Loadable Modules	242
Security	242
Audit Trails	242
Basic Hardware and Other Specifications	242
Summary	242
Macintosh	243
Basic Software	243
AppleShare File Server	243
AppleShare Print Server	243
AppleShare PC	243
Network Administration and Management	243
Printer Control	244
Connectivity	244
Basic Hardware and Other Specifications	244
Summary	245
The Future	245
Questions	248

7. LAN Installation 251

Objectives	251
Key Terms	251
Introduction	252
General Installation of a LAN	252
Installing the LAN Hardware	253
Protecting the LAN Components	254

Installing the LAN Software	255
The Network Profile	256
Login to the Network	256
Remote LAN Software	257
Legal Issues	257
The Network Server	258
Server Hardware	258
The Central Processing Unit (CPU)	259
The Hard Disk and Controller	260
Random Access Memory	261
Server Software	262
LAN Security	263
Volume Security	263
Locking	263
Others	264
Summary	264
Questions	265

8. Network Management and Operations 267

Objectives	267
Key Terms	267
Introduction	268
Monitoring Server Performance	268
Maintaining User and Workstation Information	269
Monitoring Network Devices	269
Maintaining Software	270
Making Regular Backups	270
LAN Metering Software	270
Network Management Architectures	271
Components of a Network Management Architecture	271
SNMP	272
CMIP	273
NetView	273
Network Security	274
Physical Security	275
Encryption	275
User Identification and Passwords	277
Time and Location Controls	278
Audit Logs	278
Viruses	279
Disaster Recovery Planning	280
Disaster Prevention	281
Backup Procedures	282
Backup Approaches	282

Contents

Backup Schedule	284
Backup Logs	284
Plan for Replacement Equipment	285
Characteristics of the Disaster Recovery Plan	286
Reliability	286
Operability	286
Response Time to Activate the Plan	287
Cost Effectiveness	287
Disaster Recovery Methodologies	287
The Planning Process	288
Summary	289
Questions	290

9. Linking Standards and Workgroup Software 293

Objectives	293
Key Terms	293
Introduction	294
ISDN	294
What Is It?	294
Why ISDN?	295
Characteristics	295
Software Interface with ISDN	296
Benefits and Availability	296
E-mail and Document Transfer Standards	296
X.25	296
Mission	297
X.400	298
Electronic Mail	299
Types of E-mail Systems	299
Functions of an E-mail Package	300
Choosing an E-mail System	302
WordPerfect Office as an Example of Workgroup Software	303
Using Application Programs in a Network Environment	304
Installing Microsoft Windows	305
Using the Setup /a Option	306
Using the Setup /n Option	307
Using the Setup /h Option	308
Accessing Windows	313
Guidelines for Using Windows on a Novell Network	314
Summary	316
Questions	317

10. Networking and Multimedia Technology 319

Objectives 319

Key Terms 319

Introduction 320

Multimedia Today 320

 Digital Video 323

Video Applications and Networking 324

 Characteristics of Video-Based Applications 325

 Requests for Video Files 325

 Requests for Video Structures 325

 Requests for Stream Management 326

 Challenges of Networking Video 326

 Solutions 327

 The Hardware 328

 The Software 329

 The Server 330

 Microsoft Windows and Multimedia 331

 The Sound Recorder 332

 The Media Player 334

Summary 340

Questions 341

Appendix 343

Glossary 351

Index 355
