CONTENTS

Preface

1 The Evolution of Risk Management Products 1

The World Becomes a Riskier Place 2
Volatility of Foreign Exchange Rates 3
Volatility of Interest Rates 4
Volatility of Commodity Prices 4
The Impact of Increased Financial Price Risk on Firms 5
Exchange Rate Risk 7
Illustration 1–1: Laker Airlines an FX Risk 7
Illustration 1–2: Caterpillar's FX Whammy 8
Illustration 1–3: A Summer of Discontent for Japanese Manufacturers 9
Interest Rate Risk 11
Illustration 1–4: Time to Blame FX? 12
Illustration 1–5: From Money Machines to Money Pits: U.S. S&Ls 13
Illustration 1–6: Inherent Exposures to Interest Rates: Residential Construction 14
Commodity-Price Risk 11
Illustration 1–7: A Gulf War Casualty: Continental Airlines 14
The Forecasters Flunk 15
Illustration 1–8: Making Millions Trading Wheat Futures 17
The Markets' Response: Tools to Manage Financial Price Risk 18
Exchange Rate Risk Management Products 18
Interest Rate Risk Management Products 21
Commodity-Price Risk Management Products 22
How Much Is Really New? 23
Concluding Remarks 25

2 An Overview of the Risk Management Process 27

A Building-Block Approach to Forwards, Futures, Swaps, Options, and Hybrid Securities 27
An Overview of the Risk Management Products 27
Forward Contracts 29
Futures Contracts 30

Swap Contracts 31
Option Contracts 34
The Box of Financial Building Blocks 39

3 Impact of the Introduction of the Risk Management Products 42

The Impact of Risk Management on the Markets for the Underlying Assets 42
The Impact on Price Volatility 43
Authored Box: Less Is Brewing in Witching Hours
John Rozario, CIBC World Markets 45
The Impact on Adjustment Speed 48
The Impact on the Bid-Ask Spread 49
The Impact on Trading Volume of the Underlying Assets 49
Summary 50
The Impact of Risk Management on the Economy 51
The Impact of the Derivative Markets on Each Other 52
Authored Box: Impact of the Growth of OTC Derivatives on Exchange-Traded Markets
Robert Mackay, Virginia Tech

4 Forward Contracts 54

The Structure of a Forward Contract 54
ASIDE: Notional Principal 56
A Framework for Forward Pricing 57
Forward Prices Must Reflect Costs and Benefits 58
Forward Prices Must Be Arbitrage-Free 58
Forward Contracts and Default 60
Foreign Exchange Forwards 60
The Contract 61
The Forward Foreign Exchange Rate 62
ASIDE: Interest Rate Parity 64
Illustration 4–1: Pricing an FX Forward Contract 65
Bid-Ask Spreads 66
Illustration 4–2: Pricing an FX Forward Contract Again 66
Forward-Rate Agreements 67
The Contract 67
The Forward Interest Rate 68
Illustration 4–3: Deriving a Forward Rate 68
Bid-Ask Spreads 69
Authored Box: Pricing an FRA
George François, CIBC World Markets 71

5 Applications of Forwards 74

The Markets 74
Foreign Exchange Forwards 74
FRAs 76
The Trading Rooms 77
Foreign Exchange Forward Trading 77
Illustration 5–1: Laying Off an FX Forward 77
FRA Trading 79
Illustration 5–2: Using FRAs for Asset-Liability Management 79
End Users 81
Managing Foreign Exchange Risk 81
Illustration 5–3: Hedging Transaction Exposures 81
Managing Interest Rate Risk 83
Illustration 5–4: Using FRAs in an Insurance Company 86

6 Futures 89

The Futures Contract 89
Institutional Features That Reduce Credit Risk 91
Illustration 6–1: Implement Daily Settlement 92
Daily Settlement 91

Margin Requirements 93
Illustration 6–2: Tracing Margin Balances 95
The Clearinghouse 94
Price Limits 96
Institutional Features That Promote Liquidity 100
Standardized Contracts 100
Organized Exchanges 100
Futures Prices 101
Future Prices and the Cost of Carry 101
Illustration 6–3: Cash and Carry Limits on Wheat Futures Prices 104
Futures Prices and Expected Future Spot Prices 106
Cost of Carry versus Expectations 107
Illustration 6–4: Speculation and the Expectations Model 106
Illustration 6–5: Backwardation and Contango in Bond Futures 109
Futures Prices and the Cost of Hedging: Basis 109

7 Applications of Futures 116

Authored Box: To Hedge or Not to Hedge 119
Ira G. Kawaller, Chicago Mercantile Exchange 119
Using Futures to Hedge an Underlying Exposure 120
Illustration 7–1: No Basis Risk 122
Mismatches on Maturities: Basis Risk 123
Illustration 7–2: Basis Risk 123
Mismatches on Maturities: Strip and Rolling Hedges 124
Illustration 7–3: A Strip Hedge 125
Illustration 7–4: A Rolling Hedge 125
Illustration 7–5: A Rolling Hedge Again 126
Mismatches in the Asset: Cross-Hedging 127
Illustration 7–6A: A Cross-Hedge: Selecting the Appropriate Futures Contract 128
Illustration 7–6B: A Cross-Hedge: Selecting the Appropriate Number of Contracts, Part 1 129
Illustration 7–6C: A Cross-Hedge: Selecting the Appropriate Number of Contracts Part 2 130
Illustration 7–6D: A Cross-Hedge 131
Illustration 7–6E: The Results of the Cross-Hedge 132
Adjusting for the Margin Account: "Tailing" the Hedge 133
Illustration 7–7: A "Tailed" Hedge 135
Authored Box: Waging War against Currency Exposure
Ira G. Kawaller, Chicago Mercantile Exchange 136
Managing a Futures Hedge 139

8 Swaps 140

Evolution of the Swap Contract 140
From Parallel Loans to Currency Swaps 141
Illustration 8–1: Hedging a U.S. Parent/UK Subsidiary with a Parallel Loan 142
ASIDE: Currency Swap versus FX Swaps 146
From Currency Swaps to Interest Rate, Commodity, and Equity Swaps 145
Development of the Swap Market 150
Growth of the Swap Market 151
Comparative Advantage 153
ASIDE: Comparative Advantage 153
Underpriced Credit Risk (Risk Shifting) 153
Differential Cash Flow Packages 154
Illustration 8–2: Embedded Interest Rate Options 154

Information Asymmetries 155
Tax and Regulatory Arbitrage 156
Illustration 8–3: Arbitraging Japan's Tax and Regulatory Authorities 157
Exposure Management 162
Synthetic Instruments 162
Liquidity 162
Pricing and Valuing Swaps 162
Pricing an At-Market Swap 163
Illustration 8–4: Pricing an Interest Rate Swap 164
Swap Pricing Conventions 167
Valuing a Swap (Marking the Swap to Market) 167
Illustration 8–5: Valuing an Interest Rate Swap 168

9 Applications of Swaps 170

Using Swaps to Manage Interest Rate Risk 171
Using Swaps to Manage Foreign Exchange Rate Risk 173
Using Swaps to Manage Commodity-Price Risk 174
Using Swaps to Manage Equity Price Risk 176
Using Swaps to Reduce Transaction Costs 177
Authored Box: Using Swaps at McDonald's
Carleton Pearl, McDonald's Corporation 178
Using Swaps to Increase Debt Capacity (or Gain Access to Debt Markets) 181
Illustration 9–1: Mexicana de Cobre 182
Using Swaps to Create Synthetic Instruments 184
Authored Box: Using Interest Rate Swaps to Synthesize a Long-Dated Foreign Exchange Forward
Jacques Tierney, Michelin 185

10 A Primer on Options 190

The Option Contract 190
The Contracting Parties 190
The Right to Buy or to Sell 190
The Specified Asset 191
The Specified Price and Date 191
The Graphics of Options 191
Illustration 10–1: Reading the Options Quotes 192
Option Valuation 195
Put-Call Parity 195
Bounding the Value of the Option 197
A Simplified Approach to Option Valuation 200
Illustration 10–2: A Realistic Approach? 201
Illustration 10–3: Calculating the Hedge Ratio 203
Illustration 10–4: An Option Payoff Diagram 204
Authored Box: Risk Neutral Valuation
Greg Hayt, CIBC World Markets 210
A Note on American Options 214
American Calls 214
American Puts 216

11 First-Generation Options 218

The Black-Scholes Option Pricing Model 219
ASIDE: A Continuous Ito Process 220
ASIDE: Ito's Lemma 221
ASIDE: Differential Equations 224
The Analytical Models 227
Generalizations of the Black-Scholes Model 227
ASIDE: Interpreting the Black-Scholes Formula 228
Extensions to the Black-Scholes Model 230
Options on Futures 230
Options on Currencies 231
Compound Options 232

Path-Dependent Options 232
American-Style Options 232
The Numerical Models 233
The Binomial Models 233
The Finite Difference Methodology 235
Monte Carlo Simulations 235
ASIDE: Evolution of Models to Value Interest Rate Options 236
The Analytic Approximation Models 238
The Family Tree 238
ASIDE: Precursors to the Black-Scholes Model 238

12 Applications of Options 241

Activity Levels in the Option Markets 242
Exchange-Traded Options 242
Over-the-Counter Options 242
Using Options to Manage Interest Rate Risk 244
Authored Box: To Hedge or Not to Hedge—Part 2
Ira G. Kawaller, Chicago Mercantile Exchange 246
ASIDE: Hartmarx Corporation 249
Using Options to Manage Foreign Exchange Rate Risk 250
Illustration 12–1: Constructing a Currency Hedge 251
Using Options to Manage Commodity-Price Risk 253
Using Options to Manage Equity Price Risk 257
ASIDE: A Note on U.S. Tax Law Changes 260
Using Options to Increase Debt Capacity 261
Using Options as a Competitive Tool 263

13 Second-Generation Options 266

Path-Dependent Options 267
Mean-Dependent Options 267
Average Price 267
Average Strike 269
Cumulative 270
Extremum-Dependent Options 270
Barrier Options 270
Knock-Out Options
Illustration 13–1: Using Knock-Out Caps 272
Capped Options 273
Lookback Options 274
Ladder Options 274
Shout Options 275
Illustration 13–2: Using a Ladder Option to Hedge FX Risk 276
Illustration 13–3: Using a Shout Option to Hedge FX Risk 277
Valuing Path-Dependent Options 277
Analytic Method 277
Analytic Approximation Method 277
Binomial Model (Lattice) Method 278
Monte Carlo Simulation 278
Multifactor Options 278
Rainbow Options 279
"Better-of" Options 279
Outperformance Options 279
Max/Min Options 280
Quanto Options 280
Basket Options 282
Authored Box: Basket Options
Fred Stambaugh
Exchange-Traded Multifactor Options 283
Pricing and Risk Management for Multifactor Options 283
Time-Dependent Options 283
Chooser Options 283
Forward Start Options 284
Illustration 13–4: A Periodic Cap 284
Cliquet Options 284
Single-Payoff Options 285
Binary Options 285
Contingent Premium Options 286

14 Engineering "New" Risk Management Products 288

Combining Building Blocks to Produce "New" Instruments 288
Combining Forwards with Swaps 288
Combining Options with Forwards 290
ASIDE: Why Break Forwards? 291
Combining Options with Swaps 294
Combining Options with Other Options 296
Restructuring the Building Blocks to Produce "New" Instruments 298
Restructured Swaps 298
Diff Swaps 299
Illustration: A Delayed LIBOR Reset Swap 300
Option on Forwards or Futures or Swaps or Other Options 303
Options on Futures 303
Options on Swaps: Swaptions 304
Options on Options: Compound Options 305
Restructured Options 306
Applying the Building Blocks to New Underlying Markets to Produce "New" Instruments 306
Exchange-Traded Products 307
Catastrophe Insurance Futures and Options 307
Futures and Options on Commodity Indexes 307
Futures and Options on Financial Instruments of Emerging Economies 307
Electricity Futures 308
New OTC Swaps and Options 309
Commodity Derivatives 309
Electricity Derivatives 310
Real Estate Swaps 311
Derivatives on Emerging Country Debt 311
Credit Derivatives 312
Forward Agreements 312
Total Return Swaps 313
Options
Evolution of the Market 314
How Prevalent Are Credit Derivatives? 316

15 Hybrid Securities 319

The Evolution of Hybrid Securities 320
A Taxonomy of Hybrid Securities 320
Hybrids Composed of Debt and Derivatives 321
Authored Box: Decomposing Hybrids to Assess Value
Walter D. Hosp, Ciba Specialty Chemicals 322
Debt Plus Forward Contract 324
Dual-Currency Bond 324
Petrobonds 324
Debt Plus Swap 325
Inverse Floating-Rate Note 325
Adjustable-Rate Convertible Notes 326
Debt Plus One Option 326
Bonds with Equity Warrants 327
Convertible Bonds and Exchangeable Bonds 328
Bonds with Indexed Principal 328
Principal Indexed to Commodity Prices 328
Principal Indexed to Exchange Rates 330
Principal Indexed to Interest Rates 330
Principal Indexed to Equity Indexes 330
Bonds with Options on Issuer's Creditworthiness or Shareholder/Manager Behavior 331
Puttable, Callable, Extendable Debt 331
Convertible Debt 331
LYON 332
Authored Box: The End of the LYON
Ty Po 333

Explicit Options on Issuer's Creditworthiness 332
Bonds with Options on Catastrophes 335
Debt Plus a Package of Options 338
Commodity Interest-Indexed Bonds 338
Bonds with Interest Payments Determined by Equity Returns 340
Bonds with Packages of Interest Rate Options 340
Floored Floating-Rate Bonds 340
Step-Up Bonds 340
Index-Amortizing Notes 341
Range Notes 341
Inflation-Rate Interest-Indexed Bonds 343
Hybrids Composed of Equity and Derivatives 343
Equity Plus Swap 343
Equity Plus an Option 344
Convertible Preferred 344
Options on Equity or Equity Indexes 344
Hybrids Designed to Decompose Equity Claims 344
ASIDE: Index Participation Units 346
Authored Box: Observations on the Shad-Johnson Accord and SEC-CFTC Jurisdictional Disputes, Kenneth Lehn, University of Pittsburgh 347
Options on a Commodity 350
Options on Managerial Behavior 350
Options on the Outcome of Litigation 351
Why Hybrids? Part 1: The Economic Rationale for Issuing a Hybrid Security 351
To Provide Investors with a "Play" 351
To "Arbitrage" Tax and/or Regulatory Authorities 352
To Align Interests of Shareholders and Bondholders 353
Why Hybrids? Part 2: Investor Strategies for Using Hybrids 354
Using Hybrids to Enhance Yield 355
Using Hybrids to Enhance Yield by Reducing Transaction Costs 355
Using Hybrids to Enhance Yield by Taking a View 355
Using Hybrids to Control Risk 356

16 The Dealer's Perspective 360

Who are the Dealers? 360
The Functions of a Dealer 366
The Trend Toward Integrated Risk Management 367
Integrating Different Market Risks 367
Integrating Market, Credit, and Operational Risks 367

17 Measuring and Managing Default Risk 370

Box: The Basle Accord 371
Using the "Building Blocks" to Examine Default Risk 372
ASIDE: Approach of the Basle Committee on Banking Supervision 374
Exposure 375
Current and Potential Exposures 376
Exposure over the Life of the Transaction 378
The Amortization Effect 378
The Diffusion Effect 379
Combining the Amortization and Diffusion Effects 381
Maximum versus Expected Exposures 383
Maximum Exposure 383
Expected Exposure 385

Measuring the Exposure for an Individual Transaction 385
The Worst-Case Approach 386
The Simulation Approach 387
Measuring the Exposure for a Portfolio of Transactions 388
General Portfolio Effects 388
ASIDE: Probability of Default: Swap versus Loan 388
The Effect of Netting 389
Netting by Novation 389
Closeout Netting 389
Cross-Product Netting 389
Measuring the Probability of Default 390
Authored Box: International Bank Insolvencies and the Enforceability of Multibranch Master Netting Agreements
Dan Dunningham, Cravath Swaine and Moore 391
Methods for Reducing Credit Risk 395
Termination Provisions 395
Collateral 395
Coupon Resets 397
Assignments and Pair-Offs 398
Evidence on Default-Induced Losses for Risk Management Instruments 398
Settlement Risk 399
Authored Box: Settlement Risks for OTC Derivatives
Ronald D. Watson, The Bear Stearns Companies, Inc. 400

18 Managing Price Risk in a Portfolio of Derivatives 405

Introduction 405
Measuring Price Risk—"Fraternity Row" 405
Delta 405
Gamma 406
Vega 408
Authored Box: The Curse of Negative Convexity
Kosrow Dehnad, Chase Manhattan Bank 409
Managing the Price Risk in a Simplified Warehouse 411
Delta-Hedging a Warehouse 411
Delta-Hedging a Swap 412
Delta-Hedging a Cap 416
Delta-Hedging a Warehouse 418
Hedging the Warehouse against Risk Other Than Delta 419
Hedging the Warehouse against Term Structure Twists 420
Hedging Gamma and Vega 422
Hedging the Warehouse against Jumps 422
Implementing the Hedge 424
Hedging Beyond Delta-Gamma-Vega 426
Authored Box: Managing Price Risk in a Money Center Bank
Peter D. Hancock, J. P. Morgan 427

19 Risk Governance 433

Box—The Role of the Board of Directors in Risk Governance 434
Precursors to VAR 435
Interest Rate Sensitivity Measures 435
Maturity Gap 435
Value of an "01" and Duration 435
Convexity 436
Option-Based Sensitivity Measures 436
Weaknesses of Traditional Measures 438
Value-at-Risk—A Summary Measure of Market Risk 438
The VAR Concept 438
Calculating VAR 440
Historical Simulation Method 440
Illustration 19–1: Obtaining a Historical Simulation VAR 442
Monte Carlo Simulation Method 446

Illustration 19–2: Obtaining A Monte Carlo Simulation VAR 447
Analytic Variance-Covariance Method 449
Illustration 19–3: Obtaining an Analytic Variance-Covariance VAR 452
Authored Box: "Diversified" versus "Undiversified" VARs Ziad Zakharia, CIBC World Markets 462
Comparison of Calculated VARs 464
Comparison of VARs Generated by Different Methods 464
Comparison of VARs Generated by Same Method 469
Choosing Among the Methods 471
Authored Box: The Tradeoff: Accuracy vs. Computational Time Matthew Pritsker, Federal Reserve Bank 472
The Users 475
Derivatives Dealers and Other Financial Institutions 476
End-users—Institutional Investors 477
End-users—Nonfinancial Corporations 477
Authored Box: Using Derivatives at British Petroleum R. K. Hinkley, British Petroleum 477
Box—VAR: In Their Own Words
Regulators—Bank and Securities Firms Regulators 483
Box—The Basle Internal Models Approach 483
Regulators—Securities and Exchange Commissions 484
Implementing VAR—Parameter Selection 484
Time Horizon 484
Box—Using the Square Root of Time to Scale Up One-Day VARs 485
Confidence Level 486
Variance-Covariance Data 486
Implementing VAR—Beyond a Single VAR Number 487
Sensitivity Analysis 487
Scenario Analysis 487
Stress Testing 488
Back Testing 488

20 Risk Management and the Value of a Nonfinancial Firm 492

Authored Box: Do Corporations Have a Duty to Hedge? Daniel P. Cunningham, Cravath, Swaine & Moore 493
Tactical Risk Management 497
Using Risk Management to Reduce Funding Costs by Acting on a View 497
Authored Box: Do Forward Rates Predict Future Spot Rates? Greg Hayt, CIBC World Market 499
Using Risk Management to Reduce Funding Costs by "Arbitraging" the Markets 500
Using Risk Management to Reduce Funding Costs by Reducing Transaction Costs 501
Using Risk Management to Reduce Funding Costs by Selling Options 501
Strategic Risk Management 502
Theory 1—Risk Management Can Add Value by Decreasing Taxes 503
Illustration 20–1: Reducing Taxes with Risk Management 504
Theory 2—Risk Management Can Add Value by Decreasing Costs of Financial Distress 506

Illustration 20–2: The Impact of Financial Risk on Sales—The Case of Wang 508
Theory 3—Risk Management Can Add Value by Facilitating Optimal Investment 509
Illustration 20–3: The Impact of Volatility on Debt Capacity 510
Illustration 20–4: Cutting Rate Risk on Buyout Debt 510
Illustration 20–5: Controlling Underinvestment with Hedging 511
Illustration 20–6: The Impact of Earnings Volatility on Investment—The Case of Merck 514
Evidence 514

21 Measuring a Nonfinancial Firm's Exposure to Financial Price Risk 518

Authored Box: Risk Management at British Petroleum
R. K. Hinkley, British Petroleum 521
Financial Price Risk Reflected in the Firm's Financial Statements 518
The Balance Sheet 520
Statement of Consolidated Income and Statement of Changes in Financial Position 524
Illustration 21–1: Looking for Financial Price Risk in the Firm's Balance Sheet 523
Illustration 21–2: Looking for Financial Price Risk in the Firm's Statement of Consolidated Income 527
Illustration 21–3: Looking for Financial Price Risk in the Firm's Statement of Changes in Financial Position 529
The Letter to the Shareholders in the Annual Report
External Measures of Financial Price Risk 531
Illustration 21–4: Looking for Financial Price Risk in the Letter to the Shareholders 532
Box: Duration in the Context of a Factor Model 534
Internal Measures of Financial Price Risk 536
Statistical Analysis of Revenues and Expenses 538
Simulation Analyses—Cash Flow Sensitivity
VAR Doesn't Fit Many Nonfinancial Firms 539
The Logic of the Cash Flow Sensitivity Approach 539
Defining Exposures 544
Box: Framing Exposures 540
Simulating Financial Prices
Illustration: Cash Flow Sensitivity for a Hypothetical Manufacturing Firm 544

22 Implementing a Risk Management Program 550

Lessons Learned from the Events of 1994 550
Losses by Industrial Corporations 550
Codelco 550
Gibson Greetings 550
Box: Leveraged Swaps 551
Procter & Gamble 552
Mead 552
Air Products 552
Federal Paper 552
Caterpillar 552
Lessons Learned 552
Rule 1: Make Sure You Know How Much Is at Risk 553
Rule 2: Make Sure That Everyone Is on the Same Page 553
Designing Effective Policies and Procedures 553
Goals for Risk Management 554

Identify and Quantify Exposures 557
Define a Risk Management Philosophy 558
"One-Off" or "Integrated" Risk Management? 558
Integrating the Management of Different Market Risks 558
Integrating the Management of Market and Property/Casualty Risk 558
Integrating the Management of Market Risk throughout the Firm 559
Implementation 559
Derivatives versus "Natural" Hedges 559
Box: Arguments against Managing FX Risk by Matching Currencies 560
Passive versus Active Risk Management 562
Box: "Active" Hedging 560
Which Instruments? For What Purposes? By Whom? In What Amounts? 561
Authored Box: Hedging Interest Rate Risk without Using Up Bank Lines
Roger Burge, Eurotunnel 562
Counterparties: Who? How Much Exposure? 565
Box: Calculating Credit Exposures 566
Evaluate and Control 569
The Role of the Board of Directors 569
Responsibility 1—Approval of Policies 569
Box-G-30 Recommendation 1 570
Responsibility 2—Ensuring Capability 570
Responsibility 3—Evaluation 571
Responsibility 4—Continuing Oversight 572
Some Items for a "Directors' Checklist" 573

23 Uses of Risk Management Products by Banks and Other Financial Institutions 576

Asset-Liability Management 576
Measuring the Institution's Exposure to Interest Rate Risk 577
Cash Flow Exposures—Maturity Gap 577
Illustration 23–1: Using Financial Statement Data to Quantify the Impact of Interest Rate Changes on a Bank's Net Interest Income: The "Gap" Methodology 577
Value Exposures—Duration and Convexity 579
Illustration 23–2: Using Market Data to Quantify the Impact of Interest Rate Changes on the Value of a Bank's Portfolio or Equity 581
Managing Cash Flow Risk 584
Rate Mismatches 584
Maturity Mismatches 585
Managing Value Risk 585
Changing the Duration of the Portfolio 585
Illustration 23–3: Using an Interest Rate Swap to Change the Duration of a Portfolio 586
Changing the Convexity of the Portfolio 587
Hedging Callable Bonds 587
Hedging Mortgages or Mortgage-Backed Securities 588
The Impact on the Financial Institution 589
The Investment Portfolio 589
The Credit Portfolio 591
Applying Modern Portfolio Theory to the Loan Book 591

ASIDE: CreditMetrics 592
Using Credit Derivatives to Restructure the Loan Book 597

24 Uses of Risk Management Products by Institutional Investors 599

Authored Box: Integrating Risk Management and Strategy
Lisa K. Polsky, Morgan Stanley 605
Using Derivatives in Portfolio Construction 608
Using Derivatives in Strategic Asset Allocation 608
Using Derivatives for Portfolio Rebalancing 608
Using Derivatives for Alpha Transport 610
ASIDE: Alpha 610
Using Derivatives to Satisfy Constraints 611
Authored Box: Using Derivatives to Optimize a Portfolio
Claude R. Lamoureaux and Robert G. Bertram, Ontario Teachers' Pension Plan 612
Using Derivatives in Tactical or Insured Asset Allocation 614
Tactical Asset Allocation 614
Insured Asset Allocation (a.k.a. *Portfolio Insurance*) 616
Using Derivatives to Reduce the Riskiness of the Portfolio 617
Using Derivatives to Reduce Interest Rate Risk 617
Protecting Future Cash Flows 618
Protecting the Value of a Bond 618
Asset-Liability Management 620
Using Derivatives to Reduce Foreign Exchange Rate Risk 620
Authored Box: Should FX Be Treated as an Asset Class?
Ronald G. Layard-Leisching, Pareto Partners 620
Using Derivatives to Reduce Asset Price Risk—Equity Price Risk 622
Using Derivatives to Increase the Expected Return of the Portfolio 626
By Reducing Transaction Costs 626
By Exploiting Mispricing, i.e., Arbitrage 628
By Accessing Otherwise Unavailable Assets 630
By Using Derivaties to Implementing a View More Effectively 632
Concluding Remarks 634
Controls 634
Obligations? 636
Authored Box: A Fiduciary Duty to Use Derivatives?
George Crawford, Stanford Law School 637
