

1 Introduction to Business Forecasting 1

Introduction	1
Forecasting in Business Today	2
Forecasting in the Public and Not-for-Profit Sectors	10
Computer Use and Quantitative Forecasting	12
Subjective Forecasting Methods	13
Sales Force Composites	13
Customer Surveys	14
Jury of Executive Opinions	15
The Delphi Method	16
Some Advantages and Disadvantages of Subjective Methods	16
New-Product Forecasting	17
Two Simple Naive Models	18
Evaluating Forecasts	21
Using Multiple Forecasts	25
Sources of Data	26
Forecasting Retail Car Sales	29
Overview of the Text	31
Using SORITEC	32

2 The Forecast Process, Data Considerations, and Model Selection 44

Introduction	44
The Forecast Process	44
Trend, Seasonal, and Cyclical Data Patterns	47
Data Patterns and Model Selection	54

A Statistical Review	55
Descriptive Statistics	56
The Normal Distribution	61
The Sampling Distribution of the Mean	64
The Student's t-Distribution	66
From Sample to Population: Statistical Inference	68
Hypothesis Testing	70
Correlation	75
Correlograms: An Alternative Method of Data Exploration	77
Retail Car Sales: Exploratory Data Analysis and Model Selection	84
Using SORITEC for Exploratory Data Analysis and Basic Statistics	90

3 Moving Averages and Exponential Smoothing 103

Moving Averages	104
Simple Exponential Smoothing	107
Holt's Exponential Smoothing	112
Winters' Exponential Smoothing	116
Adaptive-Response-Rate Single Exponential Smoothing	119
Using Single Smoothing after Deseasonalizing a Data Series	122
Summary	125
Forecasting Retail Car Sales with Exponential Smoothing	126
Using SORITEC for Moving Averages and Exponential Smoothing	129

4 Introduction to Forecasting with Regression Methods 157

The Bivariate Regression Model	157
Visualization of Data: An Important Step in Regression Analysis	159
A Process for Regression Forecasting	162
Forecasting with a Simple Linear Trend	163
Using a Causal Regression Model to Forecast	167
Statistical Evaluation of Regression Models	171
Basic Diagnostic Checks for Evaluating Regression Results	171
Using the Standard Error of the Regression	175
Serial Correlation	177
Forecasting Private Housing Starts	183
Cross-Sectional Forecasting	188
Forecasting Retail Car Sales with Bivariate Regression	189
Using the SORITEC Software for Bivariate Regression	193

5 Forecasting with Multiple Regression 208

The Multiple-Regression Model	208
Selecting Independent Variables	209

Forecasting with a Multiple-Regression Model	210
The Regression Plane	214
Statistical Evaluation of Multiple-Regression Models	216
Three Quick Checks in Evaluating Multiple-Regression Models	222
Multicollinearity	225
Serial Correlation: A Second Look	227
Adding Another Causal Variable to Eliminate Serial Correlation	228
The Cochrane-Orcutt Solution to Serial Correlation	230
Alternative-Variable Selection Criteria	231
Accounting for Seasonality in a Multiple-Regression Model	232
Extensions of the Multiple-Regression Model	238
Advice on Using Multiple Regression in Forecasting	240
Forecasting Retail Car Sales with Multiple Regression	242
Using SORITEC for Multiple Regression	247

6 Time-Series Decomposition 264

The Basic Time-Series Decomposition Model	265
Deseasonalizing the Data and Finding Seasonal Indexes	266
Finding the Long-Term Trend	272
Measuring the Cyclical Component	273
Overview of Business Cycles	274
Business Cycle Indicators	275
The Cycle Factor for Private Housing Starts	277
The Time-Series Decomposition Forecast	280
Forecasting Retail Car Sales by Using Time-Series Decomposition	285
Using SORITEC for Time-Series Decomposition	287

7 Box-Jenkins (ARIMA) Type Forecasting Models 305

Introduction	305
The Philosophy of Box-Jenkins	307
Moving-Average Models	309
Autoregressive Models	318
Mixed Autoregressive and Moving-Average Models	321
Stationarity	325
The Box-Jenkins Identification Process	327
Box-Jenkins: A Set of Numerical Examples	334
Example 1	334
Example 2	334
Example 3	336
Example 4	336
Forecasting Seasonal Time Series	340
Retail Car Sales and Seasonal Differencing	344
Using SORITEC for Box-Jenkins Analysis	348

8 Computationally Intensive Statistics: The Bootstrap 362

- Computationally Intensive Statistical Techniques 362
- The Bootstrap 363
- Steps in the Bootstrapping Process 365
- Extensions of the Bootstrap Technique 368
- Bootstrapping Time-Series Data 373
- Conclusion 378

9 Combining Forecast Results 385

- Introduction 385
- Bias 386
- An Example 387
- What Kinds of Forecasts Can Be Combined? 391
- Considerations in Choosing the Weights for Combined Forecasts 392
- Three Techniques for Selecting Weights When Combining Forecasts 396
 - An Application of the Regression Method for Combining Forecasts 398
- Forecasting Retail Car Sales with a Combined Forecast 399
- Using SORITEC to Combine Forecasts 404

10 Forecast Implementation 415

- The Forecast Process 415
 - Step 1: Make Objectives Clear 416
 - Step 2: Determine What to Forecast 417
 - Step 3: Establish Time Dimensions 417
 - Step 4: Database Considerations 418
 - Step 5: Model Selection 418
 - Step 6: Model Evaluation 419
 - Step 7: Forecast Preparation 419
 - Step 8: Forecast Presentation 419
 - Step 9: Tracking Results 420
- Choosing the Right Forecasting Techniques 421
 - Sales Force Composite (SFC) 421
 - Customer Surveys (CS) 423
 - Jury of Executive Opinion (JEO) 423
 - Delphi Method 423
 - Naive 424
 - Moving Averages 424
 - Simple Exponential Smoothing (SES) 424
 - Adaptive-Response Exponential Smoothing (ADRES) 424
 - Holt's Exponential Smoothing (HES) 425
 - Winters' Exponential Smoothing (WES) 425

Regression-Based Trend Models	425
Regression-Based Trend Models with Seasonality	426
Regression Models with Causality	426
Time-Series Decomposition (TSD)	426
ARIMA	427
Future Directions: Expert Systems in Forecasting	432
Artificial Intelligence and Expert Systems Defined	432
Expert-System Advantages	433
Expert-System Disadvantages	437
Current Forecasting Applications	438
Potential Forecasting Expert Systems	439
Expert-System Development Guidelines	441
Summary	444
Appendix	447
Index	473
