

## TABLE OF CONTENTS

### *Part I. How are the poor doing and why?*

#### **Chapter 1. Two Decades of Economic and Social Development in Urban Colombia: A Mixed Outcome**

##### **1. Introduction ..... 2**

- *Adverse macro environment in the late nineties: recession and risk deterioration*
- *Supply shocks and multiple structural changes*
- *Objective and main findings*
- *Opposing trends in social development and crime intensity indicators*

##### **2. Social Progress in Urban Colombia ..... 6**

- 2.1 Schooling and education: increasing trend with pro-cyclical fluctuations
- 2.2 Child labor: pro-cyclical with a decreasing trend
- 2.3 Child malnutrition and infant mortality: continuous improvement
- 2.4 Access to basic infrastructure: progressive gains with regional disparities
- 2.5 Life expectancy: advancing with gender bias
- 2.6 Violence: continuous deterioration since the 1970s

##### **3. Economic Welfare, Income Distribution and Poverty: Are Urban Colombians Better-Off Than Two Decades Ago? ..... 13**

- 3.1 Poverty Measures: substantial long-term progress with a recent set back
- 3.2 Average household income per capita
- 3.3 Welfare as average income corrected by inequality:  
The Gini coefficient and the Sen Welfare Index
  - *The evolution of income inequality*
  - *Adjusting for inequality along the lifecycle: the Paglin-Gini index*
  - *Average income corrected by inequality: the Sen Welfare Index*
- 3.4 Welfare comparisons for any distributional weights:  
First Order and Generalized Lorenz Dominance

##### **4. Poverty Profile: Faces of the Poor - Vulnerable Groups and Household Characteristics ..... 28**

- 4.1 Basic factors of income per capita generation: the poor versus the non- poor
  - *From basic income generating factors to the faces of the poor*
- 4.2 Faces of the poor: groups at risk and household characteristics
- 4.3 The poverty profile and the marginal effect of key household characteristics
  - *Skill endowment*
  - *Demographics*
  - *Labor Market*
  - *Homeownership*
  - *Idiosyncratic shocks*
- 4.4 Unemployment by skill, age and region

## STRUCTURE OF VOLUME II

### *Part I. How are the poor doing and why?*

- Chapter 1. Two Decades of Economic and Social Development in Urban Colombia: A Mixed Outcome**  
By Carlos Eduardo Vélez, Mauricio Santamaría, Natalia Millán and Bénédicte de la Brière
- Chapter 2. Poverty and Welfare in Rural Colombia During the Last Two Decades**  
By Carlos Eduardo Vélez, Bénédicte de la Brière and Natalia Millán
- Chapter 3. The Reversal of Inequality Trends in Colombia, 1978-1995: A Combination of Persistent and Fluctuating Forces**  
By Carlos Eduardo Vélez, Jose Leibovich, Adriana Kúgler, Cesar Bouillón and Jairo Núñez
- Chapter 4. Who Bears the Burden of Crime and Violence in Colombia?**  
By Alejandro Gaviria

### *Part II. What is government doing for the poor?*

- Chapter 5. Public Social Expenditure in Colombia: Incidence and Sector Priorities in the 1990s**  
By Carlos Eduardo Vélez and Vivien Foster
- Chapter 6. Subsidized Health Insurance, SISBEN and Demand for Health Care Among the Poor in Colombia**  
By Giota Panopoulou

<b>5. Labor Markets and Poverty Dynamics in Booms and Recession:</b> .....	<b>42</b>
5.1 The decomposition of poverty changes in terms of growth and inequality	
5.2 The evolution of income per capita in terms of employment, wages, skill endowments, and dependency ratios (1978-99)	
• <i>The dynamics of poverty in terms of basic income generating factors</i>	
• <i>Four types of labor market attachment: differences in poverty levels</i>	
• <i>Differences in income and poverty dynamics across types of labor market attachment and head skills 1978-99</i>	
5.3 The dynamics of poverty in the recession: lower wages or jobs lost?	
• <i>Asymmetric dynamics of quantities and prices during the recession: job loss for wage earners versus salary reduction for the self-employed</i>	
• <i>The effects of labor market dynamics on households by heads' skill level and labor market occupational choices</i>	
<b>6. Sources of Income Inequality: An Introduction</b> .....	<b>51</b>
6.1 Decomposition of inequality by household characteristics	
6.2 Inequality and composition of income: labor income and other sources	
• <i>Shorrocks decomposition</i>	
6.3 Labor Income Inequality: checking for hours of working week and lifecycle bias	
<b>7. Summary and Conclusions</b> .....	<b>55</b>

## **Chapter 2. Poverty and Welfare in Rural Colombia During the Last Two Decades**

<b>1. Introduction</b> .....	<b>62</b>
• <i>Macro-economic and sectoral environment</i>	
• <i>Concentration of Land and Credit</i>	
• <i>Displacement population and armed conflict in the rural areas</i>	
• <i>Illicit Crops and Rural Development</i>	
• <i>Main findings</i>	
• <i>Strong improvement in access to social services</i>	
• <i>Rural welfare improves until the mid nineties</i>	
• <i>Poverty determinants and faces of the poor</i>	
• <i>Extreme poverty dynamic: growth is crucial</i>	
• <i>Regional comparisons: Central and Atlantic regions win, Pacific and Central loose</i>	
<b>2. Social Progress in Rural Colombia</b> .....	<b>70</b>
2.1 Schooling and education: persistent progress with regional convergence	
2.2 Child Labor: a declining trend with some regional disparities over the business cycle	
2.3 Basic infrastructure services (1995 and 1999): Access in rural cabeceras is comparable to urban centers	

<b>3. Economic Welfare, Poverty and Income Distribution: How Has Welfare in Rural Colombia Evolved During the Last Two Decades?.....</b>	<b>74</b>
3.1 Poverty Measures: clear progress in the 1980s plus smaller improvements, if not, deterioration, in the late 1990s.	
3.2 Average household income per capita: strong improvement in the 80s, slowdown in the early 90s and some recovery after 1995. Regional discrepancies	
3.3 Rural welfare as average income corrected by inequality: The Gini coefficient and the Sen welfare index	
• <i>The Sen Welfare Index: rising inequality has diminished potential welfare gains</i>	
3.4 Welfare comparisons independent of distributional weights: First Order and Generalized Lorenz Dominance	
<b>4. Faces of the Poor: Vulnerable Groups and Household Characteristics .....</b>	<b>88</b>
4.1 Basic factors of income per capita generation: the poor versus the non-poor	
4.2 Faces of the poor: Typical characteristics of households with higher poverty risk	
• <i>Vulnerable Groups: Children and recent migrants</i>	
4.3 The poverty profile and the marginal effect of key household characteristics	
• <i>Idiosyncratic shocks</i>	
4.4 Unemployment by skill, age and region	
Unemployment peaks for the young (18 to 25) and those with intermediate skills	
<b>5. Sources of Extreme Poverty: Decomposition in Terms of Growth, Prices and Inequality .....</b>	<b>102</b>
<b>6. Summary and Conclusions .....</b>	<b>103</b>

### **Chapter 3. The Reversal of Inequality Trends in Colombia, 1978-1995: A Combination of Persistent and Fluctuating Forces**

<b>1. Introduction .....</b>	<b>110</b>
<b>2. The Colombian Income Distribution: 1978, 1988 and 1995.....</b>	<b>111</b>
2.1 The Loss of the Inequality Gains of the 60s and 70s	
2.2 Main forces driving the dynamics of income distribution	
2.2.1 The Evolution of the socio-demographic structure of the working population	
• <i>Higher and more egalitarian school attainment</i>	
• <i>Higher labor force participation –particularly among women</i>	
• <i>Decreasing fertility rates</i>	
2.2.2 Macro events and changes in demand for labor	
• <i>Satisfactory growth performance, but declining elasticity of employment to GDP</i>	
• <i>Increasing difficulties for low skill job creation in the 1990s</i>	
• <i>Rising costs of wage-earning job creation relative to self-employment</i>	
• <i>Negative shocks and adverse policies in early 1990s reduce agricultural output and encourage more labor-intensive crops</i>	
• <i>Rural credit and land concentration: two distinct phases</i>	
<b>3. The Determinants of Household Income: 1978, 1988 and 1995 .....</b>	<b>116</b>
3.1 Changes in the earnings equations	
• <i>Increasing heterogeneity in returns to education and more convexity of the earnings function</i>	
3.2 Changes in participation and occupational choice behavior	

*Part II What is government doing for the poor?*

**Chapter 5. Public Social Expenditure in Colombia:  
Incidence and Sector Priorities in the 1990s**

<b>1. Introduction</b> .....	<b>160</b>
<b>2. Public Social Expenditure in the 1990's: An Overview</b> .....	<b>160</b>
<b>3. The Nature of Social Programs</b> .....	<b>163</b>
3.1 Institutional Structures	
3.2 Financing Mechanisms	
3.3 Targeting Mechanisms	
3.4 Value of Subsidies	
3.5 Scope of social programs	
<b>4. Pro-Poor Coverage Dynamics in the 1990's</b> .....	<b>173</b>
4.1 Education	
4.2 Healthcare	
4.3 Utilities	
<b>5. The Distributional Impact of Public Social Expenditure</b> .....	<b>180</b>
<b>6. Expansion Priorities in Social Programs</b> .....	<b>184</b>
<b>7. Impact of Decentralization</b> .....	<b>187</b>
• <i>Healthcare and education and the certification process</i>	
<b>8. Summary and Conclusions</b> .....	<b>191</b>

**Chapter 6 Subsidized Health Insurance, SISBEN and  
Demand for Health Care Among the Poor in Colombia**

<b>1. Introduction</b> .....	<b>198</b>
<b>2. The Health Sector Reform</b> .....	<b>198</b>
2.1 Main Characteristics: The contributory and the subsidized regime	
2.2 SISBEN classification in level 1 or 2 seemingly equates affiliation to the subsidized regime	
<b>3. Affiliation and Health Care Utilization Patterns</b> .....	<b>202</b>
3.1 Affiliation Patterns for Households at SISBEN LEVELS 1,2 and 3	
3.2 Health Care Utilization Patterns for Household Heads at SISBEN levels 1 and 2	
<b>4. Determinants of a SISBEN Classification Document Take-up</b> .....	<b>208</b>
4.1 Theoretical Considerations	
4.2 Methodology	
4.3 Empirical Results	
4.3.1 Estimates for the SISBEN level 1 and 2 populations	
4.3.2 Estimates for the SISBEN level 3 population	

19/02/10

**4. Understanding Income Distribution Dynamics in Colombia:  
Factor Decomposing by Simulations, 1978-1988 and 1988-1995..... 123**

4.1. Urban Areas: The reversal of the inequality trend by the combination of persistent and fluctuating forces

4.1.1 Individual Labor Earnings

- *Structural parameters of the earnings equation*

4.1.2 Household income inequality and structural parameters:  
Discrepancies relative to individual income distribution

- *Participation and occupational choice*

4.1.3 Endowment effects and non-labor income

- *Paradoxically, education endowment equalization deteriorates income inequality in urban areas, but not in rural areas*
- *Family size is always equalizing*
- *Non-labor income effect: always unequalizing and moderate*

4.2 Rural Areas: The Reversal of Inequality Losses from 1988 to 1995

- *1988-1995: The Persistent Equalizing Effect of All Observable Factors Generates Lower Income Inequality*

**5. Conclusions and Discussion ..... 133**

85404

**Chapter 4. Who Bears the Burden of Crime and Violence in Colombia?**

1. Introduction ..... 142

2. Crime and Violence in Colombia: A Quick Overview..... 142

3. Stylized Facts: Danger, Fear and Retreat .....146

4. Methodology and Estimation Results .....149

- Distribution of crime across victims
- The fear of crime among the better-off
- Domestic violence against women: the other side of the coin

5. Caveats .....155

6. Conclusions .....156

1. C. M. ...

01/20/12

187/00/10

5. **The Effect of Holding a SISBEN Classification Document on the Utilization of Health Care Services and Out-of-Pocket Expenditure** ..... 216

    5.1 Theoretical Considerations

    5.2 Methodology

    5.3 Empirical results

        5.3.1 Health care utilization and the possession of SCD

        5.3.2 Health care expenditure and SCD holding

        5.3.3 Other explanatory variables

6. **Conclusions** ..... 222

**Appendixes**

**to Chapter I**

- 1.A Data, Methodological Considerations
- 1.B Statistical Appendix
- 1.C Implications of Imputed Rent Adjustment for Poverty and Inequality in Colombia
1. Introduction.
2. Alternative models
3. Estimation Results
4. Poverty and Inequality Measures Under Alternative Imputed Rent Models
5. Summary and Conclusions

**to Chapter II**

- 2.A. Statistical Appendix

**to Chapter III**

- 3.A. Data, Methodological Considerations
- 3.B Analytical Framework Decomposing the Dynamics of Income Distribution
- 3.C Statistical Appendix

**to Chapter V**

- 5.A Derivation of Unit Value of Subsidies for Public Service
- 5.B Statistical Appendix
