

INDICE

Figures, Tables, and Boxes	IX
Foreword	XI
Acknowledgments	XIII
Executive Summary	XVII
1. Background and Rationale	1
Rationale	2
2. Analytic Framework	7
Epidemic Potencial	7
Epidemic Phase	11
Biological Factors	11
Behavioral and Structural Factors	13
3. HIV and Related Surveillance in the South Asia Region	15
Indice	15
Nepal	17
Pakistan	17
Bangladesh	18
Sri Lanka	18
Afganistán, Bhutan, and the Maldives	19
4. Sexual and Injecting Drug Use Behaviors	21
Female Sex Workers	21
Clients of Female Sex Workers	23
Men Having Sex with Men	25
General Population	26
Injecting Drug Users	27
Female Sex Workers, Clients, and MSM Who Also Inject Drugs	29
IDUs Who Also Have Risky Sex	30
5. HIV Prevalence and Spr	31
Female Sex Workers	31
Men Having Sex with Men	32
Injecting Drug Users	33
Other High – Risk Male Groups	35
General Population	36
6. Country – Especific Analyses	41
India	41
Nepal	60
Pakistan	64
Bangladesh	68
Sri Lanka	71
Afghanistan	74
Bhutan	77
The Maldives	77
7. Scaling Up HIV Prevention Programs	79
Distribution of High – Risk Networks	79
Elements of Scaling Up of Program Coverage	80
Tactics for Scaling Up Coverage	80
General Considerations	82
8. Summary of Recommendations	83

Recommendations 1: Build Capacity	83
Recommendations 2: Expand Prevention Programs	84
Recommendations 3: Devote Resources to Condom Use and Needle Exchange	84
Recommendations 4: Increase and Expand Baseline and Continued Surveillance	85
Recommendations 5: Conduct Additional Studies	85
Recommendations 6: Expand Mapping of high – Risk Populations	85
Recommendations 7: Improve Understanding of Rural Epidemics	86
Recommendations 8: Reduce Stigma	86
Recommendations 9: Improve Coordination by Expanding Cooperation	87
Appendix A: The Bank Response to AIDS in South Asia	89
Appendix B: Definition of Targeted and General Population Interventions	91
Appendix C: Country Analysis Summaries	95
References	101
Index	109
