Overview	viii
Acronyms	xiv

PART I. COGNITIVE RESEARCH ON BASIC SKILLS

1. The Pedagogy of Poverty	3
Neurocognitive Research: The Key to the Black Box	8
2. Health, Nutrition, and Cognitive Processing	11
Health and Nutritional Obstacles to Learning	12
Developmental Delays and the Importance of Preschool	15
Policy Implications	18
3. Nervous System Linkages with School Performance	21
Policy Implications	23
4. Memory and Basic Skills Acquisition	24
Knowledge Intake: Attention Span and Prospects for Improving It	25
The Peculiarities of Memory: Eternal as Well as Fleeting	25
Working Memory: A Concept Critical for Effective Education	27
Why Is Working Memory So Important for School Work?	28
How Information Learned in School Is Consolidated	30
Policy Implications	35
Research Needs	35
5. Literacy Acquisition and the Biology of Reading	36
Reading Benchmarks and Norms	41
Reading Issues Affecting the Poor	42
Phonics Versus “Whole Word” Methods	44
Policy Implications	47
Research Needs	49
6. Why Mother-Tongue Instruction Improves Achievement	50
The Benefits of Bilingual Education	53
Policy Implications	57
Research Needs	57
7. The Development and Teaching of Numeracy	58
The Effects of Language Switching in Math	60
Policy Implications	61
Research Needs	61
8. The Cognitive Effects of Classroom Events	62
“Chalk and Talk” Lecturing (Very Effective for Brief Periods)	64
Practice, Questions, Feedback, Discussion (<i>Very Effective</i>)	65
Individual Seatwork (Limited Effectiveness)	66
Projects (Limited Effectiveness for Basic Skills)	67
Noninstructional Activities (<i>Ineffective</i>)	67

Policy Implications.....	70
Research Needs	70
PART II. RESOURCES FOR EFFECTIVE INSTRUCTION	
9. Which Instructional Methods Are Most Efficient?	73
The Pros and Cons of Constructivism and Discovery Learning	75
The Pros and Cons of “Direct Instruction”	77
Policy Implications.....	79
10. Use and Wastage of Instructional Time	80
Schools Open fewer than the Official Number of Days.....	80
Teacher Absenteeism.....	82
Student Absenteeism	84
Wastage of Class Time.....	84
Policy Implications.....	87
Research Needs	88
11. A Textbook for Every Student to Take Home	89
Policy Implications.....	92
12. Improving Instructional Support	93
Classroom “Climate” and Student Achievement.....	93
The Case of the Missing Homework	94
Curricular Effects on Student Achievement.....	95
Effects and Interpretation Difficulties of Achievement Tests	97
Effects of School Facilities on Achievement and Attendance	99
Policy Implications.....	101
13. Student Grouping and Class Size Effects	102
Formation of Student Groups: Learning Potential and Issues	104
Student Performance in Multigrade Classes.....	108
Policy Implications.....	111
PART III. PERFORMANCE OF TEACHERS AND EDUCATIONAL SYSTEMS	
14. Teacher Incentives and Motivation	115
Motivation and Incentives—Extrinsic and Intrinsic	115
Self-Efficacy and the Challenge of Never-Ending Tasks.....	119
Increasing Accountability	120
Policy Implications.....	122
15. Performance and Training of Educators	123
Social Status and Attitudes toward Students.....	123
Attitudes toward Teaching.....	124
Teacher Training Institutions May Not Teach Effectively	126
Improving the Effectiveness of Teaching Behaviors.....	127
Improving the Effectiveness of Training Events	128
Policy Implications.....	130
16. The Seven Pillars of Basic Skills for All	132
Benchmarks and Monitoring Indicators.....	134
Invest More in the Lower Grades	136
Efficient Access Goal	137
Disseminating Lessons from Research.....	137
ANNEX: COGNITIVE NEUROSCIENCE BASICS FOR EDUCATION	141
I. Neuropsychology Essentials	141
A. Neural Development in Young Organisms	141
B. Nerve Wiring and Survival of the Fittest Memories	143

C. Brain Architecture and Learning Functions	145
D. Memory Systems	150
E. Nature, Culture, and Circumstances	152
F. Cultural Differences in Students' Cognition	155
G. Gender-Related Issues in Cognition	157
II. The Lens of Cognitive Science.....	159
A. Attention	159
B. Storage of Information in Cognitive Networks.....	161
C. The Uses and Abuses of Memorization.....	182
D. Copying From the Blackboard and Note-Taking.....	185
E. Transfer of Learning to Other Skills.....	186
F. How, What, and Why Learners Forget.....	187
G. Higher Cognitive Functions.....	189
H. Learning Styles: Do They Exist?	190
I. Expertise and Its Implications	190
J. Ability to Act on "Lessons Learned" by Donors and Governments.....	192
K. Age-Related Memory Changes and Their Implications for Learners	193
L. Training Implications for Middle-Aged Educators.....	194
Notes	203
References	237
Index	282

Boxes

1.1. The "Education for All" Goals	4
2.1. Health and School Attendance	12
2.2. Full-Time Schools: Special Attention for Low-Income Students	19
4.1. How Much Attention Do Students Pay in Class?	26
4.2. Chewing Gum Increases Recall of Words	32
4.3. Poor Students Forget More During End-of-Year Vacations	34
5.1. Sixty Words per Minute for All	47
5.2. With Efficient Instruction, Children Can Learn Multiple Scripts	48
6.1. How Many Years Are Needed to Teach Sufficient Language?	56
8.1. Activities and Achievement in Jamaican Schools	68
9.1. Constructivist Curricula, Illiterate Artists?	76
12.1. Youth Orchestras for the Poor in Venezuela	97
13.1. "Hole-in-the-Wall Experiment"	109
14.1. Extrinsic Teacher Incentives and "Cramming" for Exams	116
14.2. How Do Teachers Use School Grants?	118
16.1. An "Indicative Framework" for Educational Quality	135
16.2. How Well Do Schools in Niger Improve Human Capital?	140
A-1. The Sociology of Competition	166
A-2. Levels of Processing	176
A-3. The Brief Window of Opportunity for Learning	179
A-4. Useful Knowledge Tends to Be Remembered	183
A-5. Visualizing Tasks Could Improve Training Outcomes	195

Figures

1.1. Burkina Faso, a Poor Country with Large Enrollment Increases	5
1.2. Fulani-Speaking Girls in Rural Niger	8
2.1. Cumulative Number of Words Addressed to Children	16
2.2. Biological Needs for Learning	20

3.1.	Learning Skills by Automizing Small Units	23
4.1.	Structure and Types of Human Memory	27
4.2.	Memory Capacity	28
4.3.	Best-Fit Relationship Between Working Memory and Age	29
5.1.	Slow and Skilled Reading Areas	38
5.2(a) and (b).	Performance at the End of Grade 1 in Common Words	40
6.1.	Grade 4 Students Still Learning the Names of Clothes in French	52
6.2.	Poor Children Studying in Official Languages	54
6.3.	Non-Native Speakers Need Several Years to Catch Up	55
9.1.	Different Dimensions and Methods of Teaching	74
10.1.	Instructional Time Indicators in Basic Education	81
10.2.	A Teacher's Class Book in Honduras	83
10.3.	Instructional Time Loss Model	87
12.1.	Dark Classroom in Rural Niger	100
13.1.	Cooperative Learning Techniques in Tanzania	106
15.1.	Primary-School Teachers Meeting Qualification Standards	125
15.2.	Notes Dictated in a Teacher Training Institute	127
16.1.	Relatively Few Students Meet Mastery Criteria	133
16.2.	The Seven Pillars of Basic Skills for All	134
A-1.	Brain Potential of Younger and Older People	142
A-2.	Neuron Assemblies	144
A-3.	fMRI Equipment	145
A-4.	Functional Magnetic Resonance Imaging	146
A-5.	Brain Areas that Are Important for Learning	148
A-6.	Stimulation Facilitates Connections among Nerve Cells	154
A-7.	Illustrations of a Simple Cognitive Network	162
A-8.	Accumulation of Nodes to Create Complex Concepts	163
A-9.	Connected Knowledge and Probability of High Test Scores	164
A-10(a).	Items Linked in Series, Like a Poem	168
A-10(b).	Various Types of Links	168
A-11.	Information Retention and Prior Knowledge	170
A-12.	Some Concepts are Semantically Closer Than Others	171
A-13.	Information is Encoded along with Context	172
A-14.	Bizarre Interactive Images Are Best Retained	174
A-15.	Concepts With High and Low Degree of "Fan"	177
A-16.	Primacy and Recency Effects	181
A-17.	Forgetting Rates of Complex Procedures	188

Tables

1.1.	Quantitative versus Qualitative Indicators of School Participation	6
2.1.	Amount of Parental Interaction with Children in U.S.	15
8.1.	Most and Least Effective Means to Learn New Information	63
10.1.	Instructional Hours in Countries Using "Split-Shift" Schooling	82
10.2.	Provider Absenteeism Rates by Country and Sector	83
10.3.	Studies Relating Time Use and School Effectiveness	85
16.1.	Viability of Instructional Interventions for the Disadvantaged	139
A-1.	Improving the Effectiveness of Instructional Activities	197
A-2.	Policy Changes that May Improve Instructional Outcomes	199
