

INDICE

Foreword	xi
Acknowledgements	xv
Abbreviations and acronyms	xvii
Overview	1
Why are tropical forests a concern?	1
This reports aims, audience, and scope	2
This reports arguments and structure	5
Setting the stage: two contrasting cases of poverty, wealth, biodiversity, and deforestation	19
Poverty, biodiversity loss, and deforestation in Madagascar	
Wealth, biodiversity loss, and deforestation in Brazils cerrado	21
Part I: the where and why of deforestation and forest poverty	25
1. Forest differ	
Three stylized forest types	27
From stylized types to mapped domains	31
The uneven distribution of forest populations	37
Trends in forest change	40
Threatened species concentrated in less-remote areas and mosaiclands	47
Summary	50
2. Incentives and constraints shape forest outcomes	53
The view from the forest plot:: comparing the returns to forestry and agriculture	54
How do agroclimate, prices technology, tenure, and other factors affect deforestation and income?	60
Forest trajectories: roads, markets, and rights shape outcomes for environments and income	71
Summary	78
3. poverty in forest stems from remoteness and lack of rights	81
Poverty rates and poverty density: two ways of viewing poor areas	82
Remote forests high poverty rates, low poverty densities	84
Incomes of forest dwellers depend on rights and access to forestlands	88
Forests, poverty, and deforestation: ambiguous relationships	93
Summary	104
4. Deforestation imposes geographically varied environmentally damages	109
Biodiversity loss a local and global concern	110
How does deforestation affect water, air, and weather?	115
Deforestation spurs climate change	125
Forest loss sometimes irreversible	131
Part II: institutional and policy responses	135
5. Improving forest governance	
Who should have rights over forests? Which, rights?	137
How should society balance environmental services against production of food, fiber and wood?	
Balancing interests while enforcing commitments	139
Catalytic innovations in institutions and technology	140
Summary	150

6. Local and national policies: framing rights and incentives for forest management	153
The challenge of forest conflict	154
Forest rights and restrictions a range of possibilities	155
Public management of forest: protected areas and concessions	161
Community control of forest balancing rights and responsibilities	171
Private property specifically in mosaiclands	178
Other development policies with forest spillovers	188
Summary	193
7. Mobilizing global interest for forest conservation	
Forest carbon finance: and ungrasped opportunity	195
Why carbon finance makes sense for climate	
Why carbon finance makes sense for forests and rural development	196
Financing avoided deforestation: problem and solutions	197
Implementing incentives for avoided deforestation	203
Related opportunities for biodiversity conservation	209
Summary	209
8. Conclusions and recommendations	21
International level	213
National level	215
Accelerating the forest transition	218
A.1 Findings of studies assessing how road proximity affects deforestation	220
A.2 Findings of studies on Appendix A: tables how roads affect development	230
A.3 forest management and tenure	236
Appendix B: data and methods	240
References	247
Index	277
