

INDICE

Foreword	xi
Abbreviations and acronyms	xiii
Overview	1
From policy to practice	2
Main themes for the future	3
Assisting countries with environmental stewardship	
Lending. To whom, how much, and what for	6
Problems encountered, lessons learned	8
Strategies for environmental management	9
CLIMBING THE LEARNING CURVE	10
Minimizing adverse impacts of bank-financed investments	12
Environmental assessment	13
resettlement	14
Building on the synergies between development and the environment	
Poverty reduction and the environment	16
Efficient resource use and the environment	
Addressing regional and global environmental challenges	18
Regional environmental initiatives	
Global environmental programs	19
Building capacity for the task	20
Equipping the bank	
Building partnerships for change	21
Improving openness and accountability	
Strengthening the private sector role. The IFC and MIGA	22
Notes	23
Part 1. the fourfold agenda	25
1. Assisting countries in environmental stewardship	26
Managing the environmental portfolio	27
Pollution and the urban environment	32
Implementing projects in pollution control and the urban environment	36
New lending for the brown agenda in fiscal 1994	37
Technical assistance for the urban environment	38
Regional strategies for pollution prevention	43
Research on pollution control	44
Natural resource management and the rural environment	45
Implementing new policies for forest and water resources	46
Implementing natural resource management projects	48
New lending for the green agenda in fiscal 1994	50
Technical assistance and research on natural resource management	53
Supporting national environmental management	
Implementing institution-building projects	56
New lending for environmental institution building in fiscal 1994	57
National the environmental strategies	60
Integrating the environmental into bank country economic work	62
National legal and institutional assistance	64
Measuring environmental progress	67
Economic valuation and resource accounting	69

Notes	70
2. Minimizing adverse impacts of bank-financed investments	71
Overview of the portfolio	72
EAs in project preparation	
Avoiding and minimizing negative impacts	74
Enhancing project design	76
Progress in public consultation	81
New EA approaches	84
Cost of EA	87
The emerging implementation experience	89
Preconditions for effective implementation	90
Supervision of implementation	
Building capacity in borrowing countries	92
Building capacity in the bank	94
Eternal interactions and relations	
Involuntary resettlement	95
Note	101
3. Building on the positive synergies between development and the environment	102
Poverty, population, and the environment	103
Poverty reduction and natural resource management	105
Women in ecosystems management	109
Social and natural resources	111
Efficient use of resources and the environment	114
Improving energy conservation and efficiency	115
Progress with “Clean” technologies and practices including renewable energy	117
Eliminating subsidies for use of resources	119
Economywide policies and the environment	121
Note	124
4. Addressing regional and global environmental challenges	125
Regional seas and river basin programs	126
Combating desertification	130
The global environment facility	132
The GEF portfolio	134
Local participation	139
Sustainable recurrent cost financing	141
Regional cooperation	145
Institutional issues and capacity building	147
Partnerships with other institution	150
Combating ozone depletion	151
Part 2. equipping the bank and reaching out	155
5. Building capacity for the task	156
Building internal capacity	157
Environmental training	161
Thematic teams and collaboration across work units	162
Better tools and indicators	163
Improving openness and accountability	165
Expanded access to information	166

Creating and independent inspection function	168
International cooperation	169
Interagency activities	170
Bilateral collaboration	171
Environmental training for borrowers	174
Working with nongovernmental organizations	175
Conferences	177
Broader external relations and communications	178
Notes	179
Part 3. strengthening the private sectors role	180
6. Strengthening the private sectors role: the IFC and MIGA	181
The trend towards ecoefficiency	183
Environmental risk management	187
The environmental performance	189
Expanded training in environmental risk management	193
The environmental business sector	196
Global environmental activities	198
Future directions	
Note	
Annexes	
A. Environment-and social-related operational policies and banks procedures	199
B. Guidance on identification of world bank environmental projects and components	207
C. Projects with environmental objectives and components approved in fiscal 1994	211
D. Ongoing environmental projects under implementation	229
E. Projects with full environmental assessment approved in fiscal 1994, category a projects	235
F. Global environmental facility (GEF) and multilateral fund for the implementation of the Montreal protocol (MFMP) investment approved in fiscal 1994	253
Bibliography	263
