Abbreviations and Data Notes	xxi
<b>Chapter 1 Prospects for Developing Countries: Coping with a Global Slowdown</b>	<b>1</b>
A simultaneous downturn in the industrial countries	4
Global environment: trade	9
Global environment: financial markets	13
The outlook for developing countries	16
Risks to the outlook	24
Long-term prospects: growth and poverty reduction	27
Conclusions	33
Notes	33
References	34
<b>Chapter 2 Market Access and the World's Poor</b>	<b>37</b>
A changing landscape of merchandise trade	38
Labor-intensive exports can spur pro-poor growth	38
Market access barriers limit export opportunities of developing countries	44
Liberalizing trade to promote development	56
Notes	63
References	64
<b>Chapter 3 Trade in Services: Using Openness to Grow</b>	<b>69</b>
Surging trade and investment in services	70
Service reforms can promote efficiency and growth	76
Domestic policy: emphasizing competition and regulation	81
Multilateral engagement: buttressing domestic reforms	84
Notes	90
References	92

<b>Chapter 4</b>	<b>Transport Services: Reducing Barriers to Trade</b>	<b>97</b>
	High transport costs penalize exports	98
	Why some countries pay more for transport services: geography and income	103
	Why some countries pay more: policy-driven factors	109
	Unleashing competition in international transport: policy implications	120
	Notes	123
	References	125
<b>Chapter 5</b>	<b>Intellectual Property: Balancing Incentives with Competitive Access</b>	<b>129</b>
	Intellectual property rights and development	130
	Costs of enforcing IPRs	136
	IPRs policies for promoting development	139
	Other policies can support technological progress	144
	Multilateral actions and IPRs in a development round	145
	Notes	149
	References	149
<b>Chapter 6</b>	<b>Envisioning Alternative Futures: Reshaping Global Trade Architecture for Development</b>	<b>153</b>
	Reshaping global trade architecture for development	154
	Envisioning alternative futures	166
	Conclusions	176
	Annex 1	177
	Notes	178
	References	182
<b>Appendix 1</b>	<b>Regional Economic Prospects</b>	<b>187</b>
<b>Appendix 2</b>	<b>Global Commodity Price Prospects</b>	<b>211</b>
<b>Appendix 3</b>	<b>Global Economic Indicators</b>	<b>233</b>
<b>Figures</b>		
1.1	Industrial production in the G-3 countries falls in 2000–2001	5
1.2	European industrial production falls	8
1.3	U.S. NAPM and manufacturing industrial production excluding high tech, 1994–2001	9
1.4	GDP growth in OECD countries	9
1.5	Import growth across industrial centers	10
1.6	Export shares for developing countries excluding transition economies	11
1.7	Distribution of countries by share of primary commodities in total merchandise exports	11
1.8	Episodes of world growth slowdown and agricultural and mineral export prices	12
1.9	OPEC output and crude oil prices	13
1.10	Gross capital market flows to developing countries	14

1.11	Emerging market spreads and share of global capital flows	14
1.12	Industrial- and developing-country GDP growth, 1981–2003	17
1.13	Composition of developing-country exports	18
1.14	Major destinations for developing-country exports	19
1.15	Total external debt in developing countries, 2000	19
1.16	Emerging market stripped spreads, 1999–2001	20
1.17	Global dynamics of recessions in industrial countries	26
1.18	Income and population shares	29
1.19	World poverty, 1820–1998	31
1.20	Under-5 mortality—hopes and aspirations	32
2.1	Changing global trade patterns	39
2.2	A rising share of exports in GDP is associated with faster growth	40
2.3	Increases in exports and agricultural production go hand in hand	41
2.4	In globalizing economies the poor participate in stronger growth	44
2.5	Tariffs still impede trade	45
2.6	Support to agriculture in the Quad is growing . . . partly due to the fall in commodity prices	51
2.7	Despite preferences, LDC exports to the Quad often face high tariffs	54
2.8	LDC exports can grow fast when tariff preferences are significant	56
2.9	Opposite patterns of tariff incidence in manufactures and agriculture	56
3.1	Trade in services has grown faster than trade in goods—and developing countries' share in world exports has increased, 1985–98	71
3.2	Transport has declined while “other” services have increased	72
3.3	FDI in services is concentrated in the OECD countries—but the growth rates are higher for many developing countries	73
3.4	Software is cheaper to develop in India	75
3.5	Services liberalization indices: telecoms & financial services	79
3.6	Greater liberalization in services is associated with more rapid growth	79
3.7	WTO members have been reluctant to make market access commitments on the movement of natural persons	86
4.1	Transport costs are often higher than tariffs	100
4.2	Tourism earnings in developing countries, 1998	101
4.3	Potential market access explains variations in income	102
4.4	Shipping a container from Baltimore, Maryland, around the world: Distance is only half the costs story	105
4.5	Ocean freight rates, 1970–99	106
4.6	Decomposing the costs of door-to-door shipments	108
4.7	Potential door-to-door cost savings on containerized imports in Brazil	109
6.1	Regional integration agreements are proliferating—and now span the globe	155
6.2	Developing countries could reap income gains of over \$500 billion from full trade liberalization	168
6.3	Unskilled wages rise substantially relative to cost of living—implying a substantial reduction in poverty	175
6.4	Reform has costs, but they are largely outweighed by the gains	176
6.5	World trade booms, particularly in food and agriculture	177

## Tables

1.1	Global conditions affecting growth in developing countries and world GDP growth	3	
1.2	Merchandise export volumes, annual average percentage change		10
1.3	All developing countries: key indicators	18	
1.4	First year effects of a 2% of GDP decline in investment in the United States, Europe, and Japan	25	
1.5	Short-term claims of international banks outstanding in selected developing countries	26	
1.6	Withdrawal of short-term lending by industrial-country banks to selected developing regions: the first-year impact on GDP		27
1.7	Long-term prospects: forecast and scenario growth of world GDP per capita	28	
1.8	Regional breakdown of poverty in developing countries		30
2.1	Major export booms in textiles and clothing and effects on economic performance and poverty	42	
4.1	Ad valorem freight rates for U.S. imports: 1938, 1974, and 1998		105
5.1	TRIPS: who gains?	133	
5.2	TRIPS-consistent IPRs standards: options for developing countries		141
6.1	Agriculture accounts for the bulk of the gains from merchandise trade liberalization	171	
6.2	Global gains are sensitive to productivity—openness linkages		171
6.3	Services liberalization generates substantial windfall gains for developing countries	172	
6.4	Labor's share of national income rises substantially	173	
6.5	Developing countries increase their market share	176	

## Boxes

1.1	Japan and the developing countries	7	
2.1	The aftermath of trade liberalization in agriculture: lessons from Haiti		43
2.2	U.S. sugar policy and its impact on imports	48	
2.3	Wheat production with CAP support	49	
2.4	Bringing support to agriculture and export subsidies under multilateral rules: a long-awaited endeavor	50	
2.5	A primer on the agreement on textiles and clothing	52	
2.6	Anti-dumping—and better alternatives	53	
2.7	Mushroom wars	55	
2.8	Calculating effective tariffs faced by the poor	57	
2.9	Designing appropriate safety nets to ensure trade forms are pro-poor		59
2.10	The banana dispute: good intentions . . . bad policies?	61	
3.1	Why do services matter for development?	70	
3.2	Whose regulations and for what purpose? Challenges in electronic commerce	74	
3.3	Welfare gains from service liberalization: the case of Tunisia		78
3.4	Challenges in implementing procompetitive regulation	83	
3.5	Financial sector liberalization: the need for policy coherence		85
3.6	Ensuring barrier-free trade in electronically delivered products		88
4.1	The Kenyan-European cut-flower supply chain	99	

---

4.2	Inefficient internal transport systems contribute to the concentration of China's export industries in coastal regions	104
4.3	Lessons from customs reforms in Mexico	111
4.4	Maritime shipping in West Africa	113
4.5	How important are public and private barriers to trade in maritime services?	115
4.6	Lessons from reforming Argentina's ports	117
4.7	EU noise regulations and their potential effect on air service to Central Asian countries	119
5.1	An overview of intellectual property rights	131
5.2	Pharmaceutical policies and the limits of TRIPS	138
6.1	Reshaping global trade architecture for development: the four-part policy agenda	158
6.2	The recently renovated integrated framework	160
6.3	Environmental standards and trade	161
6.4	Improving labor standards in a way that works	163
6.5	Standards development facility: coordinated action to bridge the standards gap	165
6.6	The complexities of measuring openness and growth	169
6.7	World Bank programs: activities to support trade-led pro-poor growth	177
