<b>1. WORLO VIEW</b>	
Introduction	1
Millennium Development Goal, targets, and indicators	12
<b>Tables</b>	
1.1 Size of the economy	14
1.2 Millennium Development Goals: eradicating poverty and Improving lives	18
1.3 Millennium Development Goals: protecting our common environment	22
1.4 Millennium Development Goals: overcoming obstacles	26
1.5 Women in development	28
1.6 Key indicators for other economies,	32
<b>Text figures and box.</b>	
<b>1.a</b> Poverty rates have been falling In all regions except. Sub-Saharan Africa	1
<b>1.b</b> a But more than 1.1 billion people remain in extreme poverty	1
<b>1.c</b> Most regions are on a path to cut extreme poverty - by half by 2015	2
<b>1.d</b> With continuing growth the number of people living In "" extreme poverty will fall	3
<b>1.e</b> And the proportion of people In extreme poverty will .reach an all-time low in 2015	3
<b>1.f</b> But more than 2 billion people will live on less than \$2 a day	3
<b>f.g</b> And more than half the population of South Asia and ..Sub-Saharan Africa will be very poor	3
<b>1.h</b> The undernourished are everywhere	3
<b>1.i</b> Malnourished children are among the most vulnerable	4
<b>1.j</b> To reach the goal, all children need to complete primary school	5
<b>1.k</b> Schools need to do more to lower costs and attract students	5
<b>1.l</b> Many grits still do not have equal access to education	6
<b>1.m</b> Literacy rates have been rising as more children remain in school, but grits lag behind boys	6
<b>1.n</b> Few countries are on track to meet the child mortality target	7
<b>1.o</b> To reduce early childhood deaths, Immunization programs- must be extended and sustained	7
<b>1.p</b> Extreme risks of dying from pregnancy or childbirth in some regions	8
<b>1.q</b> The presence of skilled health staff lowers the risk of " maternal death	8
<b>1.r</b> HIV strikes at youth-and women are particularly vulnerable	9

1.s Treated bednets are a proven way to combat malaria, but they are still not widely used	9
1.t Greenhouse gas emissions rise with income	10
1.u Access to water and sanitation services will require large investments	10
1.v Slums are growing in newly urbanized areas	10
1.w Aid has increased, but not by as much as domestic subsidies to agriculture	11
1.x New commitments by donors, the first major increase in more than a decade, will still meet only a fraction of the need	11
1.2a Location of indicators for Millennium Development Goals 1-5	21
1.3a Location of indicators for Millennium Development Goals 6-7	25
1.4a Location of indicators for Millennium Development Goal 8	27
1.5a Income and gender affect children's access to basic health care	31
<b>2. People</b>	
Introduction	35
<b>Tables</b>	
2.1. Population dynamics	38
2.2. Labor force structure	42
2.3. Employment by economic activity	46
2.4. Unemployment	50
2.5. Poverty	54
2.6. Social indicators of poverty	58
2.7. Distribution in income or consumption	60
2.8. Assessing vulnerability	64
2.9. Enhancing security	64+
2.10. Education inputs	68
2.11. Participation in education	72
2.12. Education efficiency	80
2.13. Education outcomes	84
2.14. Health expenditure, services, and use	88
2.15. Disease prevention: coverage and quality	92
2.16. Reproductive health	96
2.17. Nutrition	100
2.18. Health risk and future challenges	104
2.19. Mortality	108
<b>Text figures and boxes</b>	
2a. Poverty and illiteracy are related	35
2.b. Defining income Poverty	36
2.c. Why public services fail poor people	37
2.d. Poor women are much less likely to receive expert care in childbirth	37
2.3.a. Women tend to suffer disproportionately from underemployment	49
2.6.a. Education lowers birth rates dramatically for rich women -but not for poor ones	59
2.10.a. Education suffers in primary schools with high teacher absence rates	75

2.11.a. Girls from rural areas and poor households have the lowest attendance rates in Guinea	79
2.13.a. There is a strong positive relationship between primary school enrollment ratios and literacy among youth	87
2.14.a. High health personnel absence rates lower the quality	
2.15.a. Children in rural households are less likely to use bednets	
2.16.a Does household wealth affect antenatal care?	99
2.18.a. HIV prevalence rates vary by method of data collection	107
2.18.b. In some countries men know more about preventing HIV than women do	107
2.19.a. Under-five mortality rates are higher in poor households than in rich ones	111
<b>3. ENVIRONMENT</b>	
Introduction	113
3.1. Rural environment and land use,	116
3.2. Agricultural inputs	120
3.3. Agricultural output and productivity	124
3.4. Deforestation and biodiversity	128
3.5. Freshwater	132
3.6. Water pollution	136
3.7. Energy production and use	140
3.8. Energy efficiency dependency. and emissions	144
3.9. Sources of Electricity	148
3.10. Urbanization	152
3.11. Urban environment	156
3.12. Traffic and congestion	160
3.13. Air pollution	164
3.14. Government commitment	166
3.15. Toward a broader measure of savings	170
<b>Text figures and boxes</b>	
3a. High - income countries use more than half the world energy	114
3b. Emissions of carbon dioxide vary widely. even among the five largest producers of emissions	115
3c. Emissions of some greenhouse and ozone-depleting gases have begun to fall or slow since Rio	115
3.1a. All regions are becoming less rural	119
3.2.a. The 10 countries with the most arable land per person in 1999-2001-and the 10 with the least	123
3.3.a. The 15 countries with the highest cereal yield in 2001-Q3-and the 15 with the lowest	127
3.5.a The distribution of freshwater resources is uneven	135
3.5.a Latin America and the Caribbean has more than 20 times the freshwater resources per capita as the Middle East and North Africa	135
3.6.a High- and middle-income countries account for most water pollution from organic waste	139

<b>3.7.a.</b> Energy varies by country, even among the five largest energy users	143
<b>3.7.b</b> People in high-income countries use more than five times as much energy as do people in low-income countries	143
<b>3.8.a</b> Per capita emissions of carbon dioxide vary, even among the five largest producers of emissions	147
<b>3.9.a</b> Sources of electricity generation have shifted differently in different income groups	141
<b>3.10.a.</b> More people now live in urban areas in low-income countries than in high-income countries	155
<b>3.10.b.</b> Latin America was as urban as the average high-income country in 2002	155
<b>3.11.a</b> The use of public transportation for work trips varied widely across cities in 1998	159
<b>3.12.a.</b> The 10 countries with the most vehicles per 1,000 people in 2001- and the 10 with the fewest	163
<b>3.14.a.</b> The Kyoto Protocol on climate change	166
<b>3.14.b.</b> Global atmosphere concentrations of chlorofluorocarbons have leveled off	167
<b>3.14.c.</b> Global focus on biodiversity and climate change	168
<b>4. ECONOMY</b>	
Introduction	175
<b>Tables</b>	
<b>4.1.</b> Growth of output	182
<b>4.2.</b> Structure of output	186
<b>4.3.</b> Structure of manufacturing	190
<b>4.4.</b> Growth of merchandise trade	194
<b>4.5.</b> Structure of merchandise exports	198
<b>4.6.</b> Structure of merchandise imports	202
<b>4.7.</b> Structure of service exports	206
<b>4.8.</b> Structure of service imports	210
<b>Text figures and boxes</b>	
<b>4a.</b> Economic growth varies by region	175
<b>4b.</b> With two decades of rapid growth, East Asia and Pacific has caught up with Latin America and the Caribbean	176
<b>4a.</b> Recent economic performance	178
<b>4b.</b> Key macroeconomic indicators	179
<b>4.3.a</b> Manufacturing continues to show strong growth in East Asia	193
<b>4.5.a.</b> Some developing country regions are increasing their share of merchandise exports	201
<b>4.6.a</b> Top 10 developing country exporters in 2002	205
<b>4.7.a</b> Top 10 developing country exporters of commercial services in 2002	209
<b>4.8.a</b> Developing economies are consuming less transport services	213
<b>4.10.a.</b> Per capita consumption has risen in Asia, fallen in Africa	221
<b>4.11.a.</b> Some developing economies spend a large part of their current revenue on interest payments	225

4.12.a Interest payments are a large part of government expenditure for some developing economies	229
4.13.a Poor countries rely more on indirect taxes	233
4.15.a Worker remittances are an important source of income for many developing economies	241
4.16.a Since 2000, GDP has been than external debt for the heavily indebted poor countries	245
4.17.a. When the present value of a country's external debt exceeds 220 percent of exports or 80 percent of GNI the World Bank classifies as severely indebted	249
<b>5. States and Markets</b>	
<b>Instruction</b>	251
5.1. Private sector investment	254
5.2. Investment climate	
5.3. Business environment	
5.4. Stock markets	266
5.5. Financial depth and efficiency	270
5.6. Tax policies	274
5.7. Relative prices and exchange rates	278
5.8. Defense expenditures and arms transfers	282
5.9. Transport infrastructure	286
5.10. Power and communications	290
5.11. The information	294
5.12. Science and technology	298
<b>Text figures and boxes</b>	
5a. Higher income economies often have less regulated labor economies	253
5.1.a. Foreign direct investment has expanded rapidly in many developing countries. contributing to increased productivity	
5.10.a. 1 Mobile phone subscribers are approaching (or surpassing) 500 per 1,000 people in some developing and transition economies	293
<b>6. Global Links</b>	
Introduction	303
<b>Tables</b>	
6.1. Integration with the global economy	306
6.2. Direction and of merchandise trade	310
6.3. OECD trade with low- and middle-income economies	313
6.4. Primary commodity prices	316
6.5. Regional trade blocs	318
6.6. Tariff barriers	322
6.7. Global private financial flows ,	326
6.8. Net financial flows from Development Assistance Committee members	330
6.9. Aid flows from Development Assistance Committee members	334
6.10. Aid dependency	334
6.11. Distribution of net Aid by Development Assistance Committee	338

members	
<b>6.12.</b> Net financial flows from multilateral institutions	342
<b>6.13.</b> Foreign labor and population in selected OECD countries	346
<b>6.14.</b> Travel and tourism	348
<b>Text figures and boxes</b>	
<b>6a.</b> More Than half of world out is globally traded	303
<b>6b.</b> Aid after Monterrey,	304
<b>6c.</b> Immigrant an important labor in some high-income economies	305
<b>6.2.a.</b> Rich markets for developing country exports	312
<b>6.3.a.</b> Manufactured goods from developing countries dominated imports by OECD countries in 2002	315
<b>6.8.a.</b> Who were the largest donors in 2002	331
<b>6.9.a.</b> Official development assistance from selected non DAC donors, 1998, 2002	333
<b>6.10.a.</b> Aid dependency	334
<b>6.11.a.</b> Distribution of net aid by Development Assistance Committee Members	338
<b>6.12.a.</b> Net financial flows from multilateral institutions	342
<b>6.13.a.</b> Foreign labor and population in selected OECD countries	346
<b>6.14.a.</b> Travel and tourism	348
<b>Text figures and boxes</b>	
<b>6a.</b> More than half of world output is globally trade	303
<b>6.b.</b> Aid after Monterrey	304
<b>6.c.</b> Immigrant labor plays an important role in some high – income economies	305
<b>6.2.a. Rich markets for developing country exports</b>	312
<b>6.3.a.</b> Manufactured good from developing countries dominated imports by OECD countries in 2002	315
<b>6.8.a.</b> Who were the largest donors in 2002?	337
<b>6.9.a.</b> Official development assistance from selected non – DAC donors, 1998- 2002	333
<b>6.10.a.</b> Where did aid go in 2002?	337
<b>6.11.a.</b> Top aid recipients front top DAC donors reflect historical alliances and geopolitical events	341
<b>6.13.a.</b> Migration to OECD countries is growing	347
<b>6.14.a.</b> Tourism is highest in high – income countries	351
