Executive Summary	1
Infrastructure Improvements Have Been Modest in Latin America and the Caribbean Over the Past Decade	3
Private Entry Did Not Make Up for Public Retrenchment	4
Message 1: The Region Needs to Spend More on Infrastructure	7
Message 2: The Region Also Needs to Spend Better	9
Message 3: Governments Remain at the Heart of Infrastructure Service Delivery	11
Message 4: Bringing Back the Private Sector Requires Learning from the Past	12
Facing the Challenges and Setting Priorities	13

Chapter 1	Infrastructure in Latin America and the Caribbean—Some Progress, But Not Enough	15
	Coverage and Quality Have Improved, But Slowly	15
	Slow Infrastructure Gains Imply Reduced Growth and Competitiveness	19
	Inadequate Infrastructure Also Undercuts the Fight Against Poverty and Inequality	24
Chapter 2	The Issue: Insufficient Improvement in the Management of Too Few Resources	27
	Private Investment Has Not Made Up for Public Cutbacks	28
	The Backlash Against Private Participation Is Not Entirely Fair	34
	Government Has a Crucial Role to Play—With Regulation, Cost Recovery, and Redistribution	43
Chapter 3	Key Challenges for Infrastructure in the Region	53
	Raising Social and Economic Returns	53
	Managing Privatization and Other Private Participation More Effectively	60
	Developing New Sources of Financing	68
Appendix A	Infrastructure Coverage and Quality in Latin America and the Caribbean	85
Appendix B	Infrastructure Investment Needs	99
Appendix C	Infrastructure Investment in Latin America, 1980–2001	109

3.4	IFC Partial Risk Guarantee for Bond Issue by Triple A, Colombia	73
3.5	Tapping Pension Funds to Finance Infrastructure in Chile	76
3.6	Best and Worst Practices with Significant Rating Value for Financial Management of Local Governments	79
3.7	Paranacidade: Linking Municipal Finance to Capacity Building	82
3.8	Local Currency Financing for Mexico's Subnational Infrastructure Needs	84

Figures

ES.1	Latin America Has Lost Ground to the East Asian Tigers, China, and Middle-Income Countries	3
ES.2	Primary Deficit and Public Infrastructure Investment in Latin America	5
ES.3	Respondents Who Think Privatization Has Been Beneficial	6
1.1	Businesses That Consider Infrastructure a Serious Problem, by Region	23
1.2	Productivity Gains from a 20 Percent Improvement in Selected Investment Climate Variables in Various Latin American Countries and Indonesia	24
2.1	Total, Public, and Private Infrastructure Investment in Eight Major Latin American Countries, 1980–2001	29
2.2	Forms of Private Participation in Infrastructure in Latin America and the Caribbean, 1990–2003	30
2.3	Forms of Private Participation in Infrastructure in Latin America and the Caribbean, 1990–2003	33
2.4	Population Expressing Dissatisfaction with Infrastructure Privatizations in Various Latin American Countries, 1998 and 2004	34

3.1	Urban Households Facing Affordability Problems at Different Monthly Cost Levels, by Country	69
A.1	Telephone Mainlines per 1,000 People	87
A.2	Mobile Phones per 1,000 People	89
A.3	Telephone Faults Reported per 100 Lines	90
A.4	Mainlines per Telecom Employee	90
A.5	Internet Users per 1,000 People	91
A.6	Electricity Generating Capacity, Medians by Region	92
A.7	Electric Power Transmission and Distribution Losses	93
A.8	Population with Access to Improved Water Sources, 2002	94
A.9	Population with Access to Improved Sanitation Facilities, 2002	95

Tables

1.1	Infrastructure Coverage in Latin America and the Caribbean, China, and other Middle-Income Countries, Various Years	17
1.2	Urban and Rural Piped Water Connections in Various Latin American Countries, by Expenditure Quintile	19
1.3	Potential Increases in per Capita GDP Growth in Various Latin American Countries from Improved Infrastructure Quantity and Quality	22
1.4	Potential Reductions in Inequality (Gini Coefficient) in Various Latin American Countries from Improved Infrastructure Quantity and Quality	26
2.1	Changes in Public Investment and Fiscal Balance and Contributions to Fiscal Adjustment in Various Latin American Countries, 1995–98 Compared with 1980–84	30
2.2	Residential Water Tariffs and Cost Recovery Levels, by Income Group and Region	47
2.3	Residential Electricity Tariffs and Cost Recovery Levels, by Income Group and Region	48
3.1	Main Project Risks in Emerging Market Infrastructure	64
A.1	Road Density Is Much Lower in Latin America and the Caribbean Than in Middle-Income Countries or China	86
A.2	Quality of Roads in Selected Latin American and Caribbean Countries, Based on Government Assessments	87
A.3	Telephone Subscriptions in Latin America and the Caribbean per 1,000 People	88

A.4	Households Reporting Access to Electricity	92
A.5	Improved Water Sources in Latin America and the Caribbean	95
A.6	Improved Sanitation Facilities in Latin America and the Caribbean	96
A.7	GDP per Capita in PPP Terms	96
A.8	Countries in Latin America and the Caribbean and Middle-Income Aggregates	97
B.1	Different Approaches to Estimating Expenditure Needs in Infrastructure—The Example of Mexico	100
B.2	How Much Would Be Needed for Latin America and the Caribbean to Reach Levels of Infrastructure per Worker Levels Similar to Those of Korea?	102
B.3	Investments Needed to Achieve Universal Coverage in Water, Electricity, and Sanitation in Latin America by 2015	103
B.4	Investment Needed Over 2005–15 to Respond to Firm and Individual Demand	103
B.5	The Cost of Investments Needed for Latin America and the Caribbean to Reach Infrastructure Coverage per Worker Levels Similar to Those of Korea	105
B.6	Estimated Annual Investment Needed to Achieve Universal Access to Water, Sanitation, and Electricity in Latin America and the Caribbean by 2015	107
C.1	Infrastructure Investment in Latin America, 1980–2001	109
