<i>Executive Summary</i>	<i>xvii</i>
Overview	1
Part I Monitoring the Development Agenda	19
1 Sustaining and Broadening the Growth Momentum	25
2 Achieving Better Results in Human Development	59
3 Scaling Up Aid: Opportunities and Challenges in a Changing Aid Architecture	91
4 Harnessing Trade for Inclusive and Sustainable Growth	117
5 Leveraging through the International Financial Institutions	143
Part II Special Theme: Environmental Sustainability ..	179
6 Ensuring Environmental Sustainability at the National Level	181
7 Global Environmental Sustainability: Protecting the Commons	205
<i>References</i>	237
ANNEX Monitoring the MDGs: Selected Indicators	251

Boxes

0.1	MDGs and the environment	5
1	Assessing whether countries are on or off track	21
2	Statistical capacity building: furthering progress	23
1.1	Recent revisions of purchasing power parities	27
1.2	The recent financial market turbulence	28
1.3	Growth in Africa: rising but uneven.	33
1.4	Management of natural resource revenues.	36
1.5	Impact of oil price increases on low-income countries	38
1.6	Rising food prices and their policy implications.	39
1.7	Vietnam: Growth with equality leads to dramatic success in reducing poverty.	42
1.8	Private remittances: positive effects and risks.	44
1.9	The Commission on Growth and Development	46
1.10	Institutions, inequality, and growth	52
2.1	Comparing inequality in health in India and Mali	62
2.2	The Education for All Fast-Track Initiative	65
2.3	Improving educational quality and stimulating growth	72
2.4	Indicators of environmental risk factors—DALYs	79
2.5	Exposure to indoor air pollution: Evidence from Bangladesh.	84
3.1	Improving the predictability of aid: Ghana and Tanzania	106
3.2	Debt Management Performance Assessment Tool	113
4.1	Trade data and trade restrictiveness indicators.	121
4.2	The World Bank Logistics Performance Index	131
4.3	WTO negotiations and climate change	139
4.4	Will carbon labeling help or hinder developing-country trade?	141
5.1	Bank-Fund Collaboration: Joint Management Action Plan	150
5.2	Lending by the IMF.	152
5.3	Global Emerging Markets Local Currency Bond Initiative	154
5.4	Supporting the preparation of poverty reduction strategies: The case of Mozambique.	158
5.5	The IMF's programs for improving statistical capacity	159
5.6	Malaysia-Africa Knowledge Exchange Seminar: An example of South-South knowledge sharing	160
5.7	Coordination among donors in Bolivia	162
5.8	Recent examples of country-level harmonization with regional development banks	163
5.9	The Africa Action Plan: progress in implementation	165
5.10	World Bank country systems pilot	175
5.11	Carbon Partnership Facility and Forest Carbon Partnership Facility	176
6.1	The importance of environmental income to the poor	183
6.2	MDG 7 indicators	184
6.3	Assessing the performance of subsidies	200
6.4	Adjusted net savings as a sustainability indicator.	202
7.1	Weather-index insurance	217
7.2	Adaptation to climate change	218
7.3	Sources of carbon finance under the UNFCCC	228

2007-7-14

11/11/08

Figures

1 At the global level, progress and prospects vary widely across MDGs 20

2 Progress toward MDGs is slowest in fragile states 22

3 Most countries are off track to meet most MDGs 22

1.1 Poverty head count 31

1.2 Per capita GDP growth rates by country group, 2003–07 32

1.3 Number of emerging-market and developing countries
by annual real GDP per capita growth rates, 2003–07. 32

1.4 Commodity price indexes, 1991–2007. 34

1.5 Terms-of-trade changes by country group, 1991–2007 35

1.6 Real per capita GDP growth rate for low-growth fragile states,
adjusted for terms-of-trade changes, 1991–2007 37

1.7 Annual change in Gini coefficient in 59 developing countries 40

1.8 Decompositions of change in the Gini coefficient. 41

1.9 Average ranking of “ease of doing business,” by region and income group 49

1.10 Aggregate labor productivity gains in Latin America, by firm size 51

1.11 CPIA governance indicators, 2000–06. 54

1.12 GDP growth vs. adjusted net savings 56

1.13 Adjusted net saving trends, 1990–2005 56

2.1 Regional disparities in primary school completion and participation, 1990–2005 62

2.2 Incidence of public health spending on poorest and richest quintiles, 1989–2001. . . . 63

2.3 Incidence of public education spending on poorest and richest quintiles, 1985–2001 . . . 63

2.4 Differences in Laotian education achievement across age, gender,
and ethnic group, 2002–03 64

2.5 Relationship between health and education inequality and income inequality 66

2.6 Relationship between health and education inequality and per capita income 67

2.7 Absenteeism among primary health care workers, 2002–03 69

2.8 Relationship of health quality to income and public health care expenditures 73

2.9 Stunting and wasting for under-five children, 2000–present. 75

2.10 The relationship between malnutrition, poverty, and education. 77

2.11 Relation of reductions in under-five malnutrition to increases in income 78

2.12 Environmental disease burden in DALYs per 1,000 people, 2002 80

2.13 Environmental contribution to disease burden. 81

2.14 Economic burden associated with poor environmental health 82

2.15 Trends and projections of access to water and sanitation
in developing countries, 1990–2015 83

2.16 Access to clean water and sanitation by expenditure quintile, 32 African countries 83

3.1 DAC members' net ODA flows and 2010 target 93

3.2 DAC members' ODA. 94

3.3 Distribution of DAC members' ODA by type 95

3.4 Top 10 recipients of the increase in net ODA, 2002–06. 95

3.5 Rising trend in aid from non-DAC bilaterals and NGOs 97

3.6 Net ODA to Sub-Saharan Africa 98

3.7 Conflict risk, aid, and peacekeeping. 99

3.8 Humanitarian aid, 1970–2006. 101

B0410708

B07708

B07708

3.9	Concentration of DAC donors and multilaterals in selected countries, measured by programmable aid	104
3.10	In-year predictability is improving	105
3.11	Strong growth in assistance for health, 2000 and 2006	109
3.12	Ethiopia: Distribution of aid within the health sector	110
3.13	Reduction of debt stock for the 33 post-decision-point HIPCs	111
3.14	Risk of debt distress in post-completion-point HIPCs	113
4.1	Change in OTRI, 2000–06	124
4.2	Producer support estimates for OECD members, 1999–2006	125
4.3	Nominal rate of assistance to farmers in high-income and developing countries, 1960 to 2004	125
4.4	Nominal rate of assistance to farmers in developing countries, 1960 to 2004	126
4.5	Gross subsidy equivalents of assistance to farmers in developing and high-income countries, 1960–2004	127
4.6	Change in the average MA-OTRI for all exports, 2000–06	129
4.7	Higher growth is associated with lower trade restrictiveness	130
4.8	Countries with better trade logistics have higher trade-to-GDP growth	132
4.9	Restrictiveness of services trade policies, 2007	133
4.10	Services trade restrictiveness indices, by sector	133
4.11	Distribution of aid for trade by income group and region, and by category, average 2002–06	137
4.12	Environmental goods confront significant trade restrictiveness	138
5.1	MDBs' gross disbursements, by type of flow and region, 2000–07	151
5.2	World Bank knowledge service inputs, by type, 2002–07	160
5.3	World Bank portfolio of global partnership funds by theme and host institution	161
5.4	Progress toward operational development strategies in low-income countries	164
5.5	Policy and poverty selectivity of concessional assistance by the MDBs	166
5.6	IBRD and IDA disbursements by sector and themes	167
5.7	Active World Bank environment and natural resource portfolio, by thematic distribution, as of June 30, 2007	177
5.8	ADB projects with environmental elements by theme, 2006	177
1	Framework for monitoring environmental sustainability	180
6.1	Annual deforestation by region and for top 10 countries, 2000–05	185
6.2	Internal freshwater resources per capita, by region and income group, 2005	186
6.3	Trends and projections in freshwater availability, West Asia	187
6.4	Annual freshwater withdrawals, by region and income group, 2002	187
6.5	Total water withdrawal relative to renewable water resources, selected countries	188
6.6	Sustainability in energy- and mineral-rich economies	189
6.7	Annual particulate matter (PM10) concentrations, 1990–2004	190
6.8	Use of biomass products and waste, by income, 1990–2004	191
6.9	Adjustments to the saving rate: The case of Bolivia in 2002 and 2005	193
6.10	Relative importance and composition of natural capital, 2005	194
6.11	Natural capital per capita across regions of the world, 2005	195
6.12	Evolution of the value of natural capital	196
6.13	Environmental Performance Index, by income group and region, 2008	197
6.14	Evolution of the CPIA environment score, 1999–2006	198

6.15	CPIA environment score and its subcomponents, 2006	199
7.1	Projections of surface temperatures for three IPCC scenarios	208
7.2	Impacts of increases in temperature and precipitation on agricultural yields, 2079–99	210
7.3	Estimated death rate from climate change in 2000, by WHO subregion	212
7.4	Vulnerability to sea level rise	214
7.5	World GHG emissions, by sector, 2000	219
7.6	Per capita GHG emissions in 2000, including emissions from land use change	221
7.7	Annual CO ₂ emissions under the A1FI scenario, 1965–2035	222
7.8	Cumulative atmospheric CO ₂ under the A1FI scenario, 1965–2035	222
7.9	Change in annual CO ₂ emissions by carbon intensity class, 1994–2004	223
7.10	Energy intensity by region, 2004	224
7.11	CO ₂ emissions from land use changes, 1850–2000	227
7.12	Kyoto targets and changes in GHG emissions for Annex B countries	230
7.13	Proportion of terrestrial and marine area protected	231
7.14	Living Planet Index, 1970–2003	231
7.15	Living Planet Indexes for terrestrial, marine, and freshwater organisms	232
7.16	Global trends in the world's marine stocks since 1974	233

Tables

1.1	Summary of world output	26
1.2	Net financial flows to developing countries	43
1.3	International remittances	43
1.4	The quality of macroeconomic policies in low-income countries, 2003–07	47
1.5	Status of investment climate reform, 2003–07	48
1.6	Low coverage and high cost of Africa's infrastructure	50
1.7	Total per capita wealth and its components, by developing region and economy type	55
1.8	Per capita natural wealth and its components, by developing region and economy type, 2005	55
1.9	Adjustments to savings, 2005	57
2.1	Selected measures of health inequality, by region and income group, 2000–present	61
2.2	Selected proximate measures of health care quality for selected countries	71
2.3	Downward trends in under-five malnutrition, 1990–2005	74
2.4	Deaths and DALYs lost due to solid fuel use	85
2.5	Projected health effects of climate change	86
2.6	Cost per DALY of alternative interventions for addressing environmental hazards, US\$ per healthy year gained	86
4.1	OTRI and TTRI, by income group, 2006	122
4.2	OTRI and TTRI, by developing country region, 2006	123
4.3	OTRI and TTRI for the four largest traders, 2006	123
4.4	Gross subsidy equivalents of assistance to farmers, by region, 1960–2004	126
4.5	MA-OTRI and MA-TTRI by income group, 2006	128

4.6	Aid for trade, 2006, and annual average, 2002–06	136
4.7	Increase in trade volumes from liberalizing clean energy technologies	138
5.1	Strategic shifts by IFIs	146
5.2	IBRD cofinancing by types of cofinancier, 1998–2007	153
5.3	Record expansion of IDA	155
5.4	Reports posted by agency at Country Analytical Work Web site, 2007	157
5.5	MDB gross disbursements to fragile states, 2002–07	167
5.6	A comparison of MDB assessment systems	170
6.1	The targets under MDG 7	181
6.2	Environmental links to the MDGs	182
6.3	Top 10 emitters of industrial water pollution, 2001	190
6.4	Access to electricity, by region, 2005	191
6.5	Top 10 users of biomass products and waste, 1990–2004	192
7.1	Likelihood of various CO ₂ e concentrations exceeding various increases in global mean surface temperature	206
7.2	Changes in mean global temperature and sea level associated with various IPCC scenarios	207
7.3	Possible impacts of climate change in the mid-to-late-21st century	209
7.4	Estimated DALYs attributed to climate change in 2000	211
7.5	Ten countries most affected by a one meter rise in sea level	215
7.6	Weather damage index (WDI), by country and region	215
7.7	GHG emissions, by sector and region, 2000, metric tons of CO ₂ e	220
7.8	Comparison of GHG emissions for Annex I and non-Annex I countries	223
7.9	Comparison of industrial energy efficiency across countries	225
7.10	Availability of renewable resources relative to current consumption, by World Bank region	226
